LEGAL DESCRIPTION SCHEDULE

Portion of unsurveyed Crown land being the foreshore and bed of Williston Lake, Cassiar District as shown on sketch below:

MANAGEMENT PLAN SCHEDULE

Construction of an access road within boundaries shown on Legal Description Schedule. The road will be 2.9 k.m. long and have a width of no more than 10 metres.

The constructed road will be used for industrial log hauling and will not be used for public access.

Road construction and utilization on the lakeshore of Williston Lake is to occur outside of the wetted perimeter.

No upland materials are to be deposited on the lakeshore for road construction. Road construction is to entail grading of the existing lakeshore materials only.

Road grading is to occur such that no depressions are left on the lakeshore that might entrap fish at higher lake water levels.

The road is to be aligned such that vegetation removal along the lakeshore is unnecessary. The road right of way to access the lakeshore is to be kept as narrow as is feasible thereby minimizing removal of lake riparian vegetation. Riparian vegetation is to be replanted at road closure.

Machinery and equipment utilized for road grading and vehicles that utilize the temporary road are to be completely clean and free of fuel, lubricants and hydraulic fluids. Any refuelling of vehicles and equipment must occur a minimum of 100 metres from the lake or any watercourse in the vicinity.

All machinery utilized to construct the temporary road and all vehicles that utilize the temporary road must be in good working order and no fuels, lubricants or other deleterious substances are to enter the lake or any watercourses on site.

All works must be conducted in a manner that minimized the release of sediment and sediment-laden water into the lake environment or any watercourse on site. Sediment and erosion control measures must be applied as required in order to achieve this.

Rip rap utilized for the low level log damp structure is to be clean (<1% fines <1 cm) and washed offsite as appropriate.

Ensure that equipment used in construction does not interfere with navigation and that all materials, equipment, temporary structures and debris are removed from the waterway upon completion of work.

Excavated trench material should be either spread out evenly on the bed of the waterway or removed. No large boulders should be left on the waterway.

The banks of the waterway should be restored to an even contour and protected from erosion as

necessary.

Ensure that all site workers read, understand and agree to above.
