Parcel 1 - Aquaculture Hatchery

Parcel 1 Hatchery equipment and leasehold interest in land and building (PID 10241453)

The Receiver is selling its right, title, and interest if any in a hatchery facility (the "Hatchery") situated on leased lands in Northampton New Brunswick (PID 10241453). The Hatchery is located on Route 105 Northampton, Carleton County, New Brunswick, 17 kilometers south of Woodstock, New Brunswick, 90 kilometers west of Fredericton, New Brunswick, and 32 kilometers south-east from the United States/Canada Border crossing (which connects the United States' Interstate-95 to the Trans-Canada Highway).

The Hatchery is currently subject to a 3rd party lease agreement dated 12 August 2016 between the Receiver and Kelly Cove Salmon Ltd. (the "2016 Hatchery Lease") which expires 31 July 2017. The terms of the 2016 Hatchery Lease will be binding upon the Purchaser of this Parcel through that date.

Established in 1992, the Hatchery is a fully integrated land-based commercial facility. Using a flow-through rearing system which is fed by the adjacent Saint John River the Hatchery has the capacity to rear 5,000,000 Atlantic salmon juveniles (i.e. smolt) at any one time. The maximum water requirement for the Hatchery is 45,424 litres per minute (9,992 IGPM / 12,000 USGPM) and is supplied by pumping from eleven (11) on-site wells. Wastewater from the Hatchery is treated through two settling ponds prior to its discharge in the Saint John River.

The Hatchery is currently authorized to cultivate and culture finfish (Atlantic salmon and rainbow trout) until 2019. This authorization flows from New Brunswick Commercial Aquaculture License #IF-0052 (which provides for the right to cultivate finfish in an Inland Aquaculture Site), and Approval to Operate I-8682, issued under the New Brunswick Water Quality Regulations, (which approves the operation of an aquaculture facility consisting of a hatchery and grow out tank field for the culturing of juvenile rainbow trout and Atlantic Salmon to smolt size). The Hatchery covers approximately 10.63 acres (4.3 hectares), and is zoned as "Rural and Resource 2" within the South-Central Carleton County Zoning Map.

In addition to the main Hatchery structure, located on site is an office building, a work shop, a control/electrical building, a Quonset hut, a river intake pump house, three (3) head houses, eleven (11) well houses, a feed building, and hatchery tanks, the details of which are provided below.

a) Office building

The office building is a one (1) and two (2) storey building with a construction area of 14,791 sq. ft on the main level and 4,550 sq. ft. on the second level. The building has a wood frame, a sheet metal roof and exterior, and a foundation made of concrete. It was built in 1992 and had additions made to it in 2000 and 2009. The main level is heated by a heat pump and includes an electrical room and a fish

tank room with hatchery area. The second floor is heated by electricity and has a three (3) piece washroom, kitchen, lunch room, storage room, and two (2) private offices.

b) Workshop

The workshop was built in 1992 and measures approximately 1,000 sq ft. It has a metal exterior and roof cover, is insulated by fiberglass, and is heated by a suspended electric fan heater. Further, the shop has a 14 ft. interior wall height, a 4 ft. concrete foundation and slab floor, one overhead door, and is equipped with mezzanine storage.

c) Control/Electrical Building

Built in 1992 with additions in 2000, the control building houses the main electrical control systems and back-up generators for the fish-rearing tanks, as well as a heat pump and water-circulation system. The control building measures approximately 860 sq. ft., has a wood frame, and a sheet metal roof/exterior. Included in the control building are 900 hp and 500 hp diesel generators.

d) Quonset Hut

The Quonset Hut is an arch dome tubular steel storage structure with tarp exterior and roll up tarp doors at each end. The structure has a gravel floor, does not have a foundation, and measures 23 ft x 39 ft.

e) River intake pump house

The river intake pump house contains two river pumps that feed water to heat exchangers. The pump house measures approximately 168 sq. ft, is built on a wood frame, and has metal siding and roofing.

f) Head Houses

The property contains three (3) head houses. One has a poured concrete foundation, metal siding and roofing, and has three sections (measuring 11.5' x 20', 24' x 16.5' (with basement) and 6' x 11'). The 11.5' x 20' has a 6 foot overhead roll up door and is used for chemical storage. The second measures 16' x 16', has a basement and a poured concrete foundation, and has metal siding and roofing. The third measures 24' x 24', and also has a full basement with poured concrete foundation, metal roofing, and metal siding.

g) Well houses

Eleven (11) individual well houses are located on the property. Each of these well houses are designed to protect the pump systems used for on-site deep water wells.

h) Feed Building

The feed building was constructed in 2009 and measures approximately 864 sq. ft. The building has a wood frame, a metal exterior, and has two (2) overhead doors for loading/unloading animal feed. The building has an asphalt floor and is heated by a suspended electric forced-fire fan heater.

i) Hatchery Holding Tanks

On site are twenty-five (25) 40' diameter x 6'H, 200 cubic meter fiber glass holding tanks. Each tank is equipped with two (2) feeders and an aeration pump. These holding tanks are accessed via a Catwalk. There are also three (3) 82' diameter x 6'H, 1,000 cubic meter fiber glass holding tanks. Each has four (4) feeders, and are likewise accessible via a catwalk.

Hatchery Layout

The PID on which the Hatchery is situated, is subject to a lease in favour of Gray Aqua Farms Ltd. dated 7 June 2003 terminating 30 June 2022 (the "GAF Lease"). Among other terms and conditions, the GAF Lease provides for: (a) a minimum annual rental payment of 1% of gross sales volume (subject to a minimum annual payment of \$25,000/annum); (b) the ability to renew the lease at the Lessee's option; (c) the ability to assign the lease to a third party; and, (d) a first right of refusal to acquire the site should a bona fide offer be received by the third party lessor of the property.

The Receiver is also selling its right, title, and interest in various Hatchery equipment as part of Parcel 1. This equipment is located at the Hatchery, as well as the warehouse and yard discussed in Parcel 2.1, and includes:

The Plant is currently subject to a 3rd party lease agreement dated April 2014 between Gray Aqua Processing Ltd. and Hermitage Processing Inc. (the "Plant Lease") which expires 14 April 2019. The terms of the Plant Lease will be binding upon the Purchaser of this Parcel through that date.

The plant utilizes HVAC wall

mounted electrical heating units and receives electricity from an 800 amp, 347/600 volt, 3 phase, 4 wire disconnect.

Located on the main floor is the main processing line, a holding tank, a cooling room (which has a high temperature of -1 Celsius and is equipped with a 20 horsepower condensing unit), a shipping area, a receiving area, several offices, a lab, and staff washrooms. Dry storage, additional offices, and a laundry room are located on the second floor of the building.

Included within the property is a wharf that extends 170 ft along the shoreline. The wharf is constructed out of treated wooden cribs with rock ballast, and includes wheel guards and several bollards. In total, the wharf measures approximately 1,700 sq. ft.

The Processing Plant and wharf are located on approximately .507 acres (.205 hectares) of real property. This property is owned outright in fee simple, and can be identified by Registration Number 468146 in the Newfoundland & Labrador Registry of Deeds.

The water treatment plant is located on the north side of the processing plant. The water treatment plant was built in 2012, measures approximately 1,500 sq. ft, is constructed on a slab, has a wood frame, and uses metal covering for the roof and interior/exterior walls.
