RE: DOCUMENT REGISTRATION ADVICE

The document you recently submitted has been registered.

Enclosed for your records is a registered copy of the Builder's Lien.

PLEASE NOTE:

Pursuant to Section 43 (1) of the Builders' Lien Act, this/these Lien(s) expire(s) within 180 days from the date registered unless a legal action is commenced and a Certificate of Lis Pendens is filed in respect of the Lien(s).

Sincerely,

Sabrina Tsang-MacKenzie
Land Analyst
Agreement Maintenance, Registrations and Rentals Unit

Statement of Lien Upon Interest in Crown Minerals

This statement of lien applies in respect of the following (check the appropriate box):

- ☐ To work done or materials furnished in respect of improvements, other than improvements to an oil or gas well or to an oil or gas well site, in which case this lien is to be registered with the Minister of Energy not later than 45 days from the last day that the work was last done or the materials were last furnished.
- ☒ To work done or materials furnished in respect of improvements to an oil and gas well or to an oil or gas well site in which case this lien is to be registered with the Minister of Energy not later than 90 days from the last day that the work was done or the materials were last furnished.

ENERGETIC SERVICES INC. of C/O 517 10 AVE SW SUITE 900, CALGARY AB T2R 0A8, claims a lien under the Builders' Lien Act upon the interest in minerals of

Owner: ARC RESOURCES LTD.
Address: 308 4 AVE SW SUITE 1200
PO BOX 6776 STN D
CALGARY AB T2P 2E7

in the following land:

Agreement Type/Number	Land
054 5414040196	6-13-081:33-NE

The mineral is Petroleum and Natural Gas below the base of the Bluesky-Bullhead.

The lien is claimed in respect of the following work or materials, that is to say: Transporting production fluid to and from an oil and gas well site., which work was or is to be done for or which materials were or are to be furnished for GLENOGLE ENERGY INC., 444 5 AVE SW SUITE 1400, CALGARY AB T2P 2T8

The work was completed or the materials were last furnished on the 13 day of May, 2020

The sum claimed as due or to become due is \$228,032.63

The address for service of the lienholder hereunder is

TO: The Minister of Energy for Alberta

THIS IS TO CERTIFY THAT court proceedings have been taken in Court to enforce a certain Builders' Lien registered by the Plaintiff, respecting the crown mineral lease filed in the lands described as:

6-13-081:33-NE
Petroleum and Natural Gas to the base of the Bluesky-Bullhead.
Mineral Agreement No.: 054 5414040196

as registration number 2001456 on the agreement number 054 5414040196.

which lien was registered pursuant to the provisions of the Builders' Lien Act by the Minister of Energy on the 22nd day of May 2020 as Registration Number 2001456 against the registered interest of ARC Resources Ltd. and any other interest except fee simple interest.

DATED at the City of Calgary, in the Province of Alberta, this 13 day of November 2020

APPENDIX B

NOTICE OF REVISION OR DISALLOWANCE – ENERGETIC

NOTICE OF REVISION OR DISALLOWANCE

IN THE MATTER OF THE CCAA PROCEEDINGS OF GLENOGLE ENERGY INC., GLENOGLE ENERGY LIMITED PARTNERSHIP AND 1651558 ALBERTA INC. (collectively, "Glenogle", the "Company" or the "APPLICANTS")

TO:

Energetic Services Inc.
c/o Miles Davison LLP
900, 517 – 10 Avenue SW
Calgary, AB T2R 0A8
Attention: Calvin C. Robb

PLEASE TAKE NOTICE that this Notice of Revision or Disallowance is being sent pursuant to an order of the Honourable Justice J.T. Neilson of the Court of Queen's Bench of Alberta, Judicial Centre of Calgary, dated May 12, 2022 (the "**Claims Procedure Order**"). All capitalized terms not otherwise defined in this Notice of Revision or Disallowance shall bear the meaning given to them in the Claims Procedure Order, which is posted on the website of the Monitor, at www.ey.com/ca/glenogleenergy (the "**Monitor's Website**").

The Monitor has reviewed your Proof of Claim dated June 2, 2022 and has revised or disallowed your Secured/Priority Claim or D&O Claim for the following reasons:

Your claim relates to work performed at the 16-33 battery, which location's underlying mineral leases were lienied by you. Glenogle Energy Inc. does not own any mineral rights at the lienied property, and therefore, the claimed security is not valid.

On this basis, the Monitor is disallowing the entirety of your claim as it is an unsecured claim. Unsecured claims are not being considered under this Claims Procedure since there are no funds available for unsecured creditors.

Subject to further dispute by you in accordance with the provisions of the Claims Procedure Order, your Secured/Priority Claim or D&O Claim will be allowed as follows:

	Submitted	Allowed
Debtor Entity / D&O	Glenogle Energy Inc.	N/A
Classification	Secured	N/A
Claim Value	\$228,032.63	\$0

If you intend to dispute this Notice of Revision or Disallowance, you must, **no later than 5:00 p.m. (Calgary time) on the day that is 15 Calendar Days after your receipt of this Notice of Revision or Disallowance**, deliver a Notice of Dispute by registered mail, e-mail (in PDF format), courier or facsimile transmission to the following address:

Ernst & Young Inc.
Monitor of Glenogle Energy Inc.
Suite 2200, 215 – 2nd Street S.W.
Calgary, Alberta T2P 1M4
Attention: Jessica Murray
Fax: 403-206-5075
Phone: 403-206-5394
E-mail: Jessica.Murray@parthenon.ey.com

Any Claimant who fails to deliver a Notice of Dispute by the date and time set out above shall be deemed to accept the classification and the amount of its Secured/Priority Claim or D&O Claim as set out in this Notice of Revision or Disallowance and such Secured/Priority Claim or D&O Claim as set out herein shall constitute a Secured/Priority Claim or D&O Claim, and the Claimant will have those rights set out in the Claims Procedure Order with respect to such Secured/Priority Claim or D&O Claim.

If you do not deliver a Notice of Dispute of Revision or Disallowance by the deadline stated above, you shall be forever barred from making or enforcing any Secured/Priority Claim or D&O Claim against any of the Applicants, their Directors and their Officers (other than with respect to such Claim as has been allowed in this Notice of Revision or Disallowance), and all such Secured/Priority Claims and D&O Claims will be forever extinguished.

Dated at Calgary, Alberta, this 27th day of June, 2022

APPENDIX C

NOTICE OF DISPUTE – ENERGETIC

**NOTICE OF DISPUTE OF REVISION OR DISALLOWANCE OF THE CLAIMANT
LISTED HEREIN**

IN THE MATTER OF THE CCAA PROCEEDINGS OF GLENOGLE ENERGY INC., GLENOGLE ENERGY LIMITED PARTNERSHIP AND 1651558 ALBERTA INC. (collectively, "Glenogle", the "Company", or the "Applicants")

By order of the Court of Queen's Bench of Alberta (the "**Court**") dated May 12, 2022 (as may be amended, restated or supplemented from time to time (the "**Claims Procedure Order**"), in the proceeding commenced by the Applicants under the *Companies' Creditors Arrangement Act*, R.S.C. 1985, c. C-36, as amended (the "**CCAA**"), the Monitor has been authorized to conduct a secured and priority claims process (the "**Claims Procedure**"). A copy of the Claims Procedure Order, with all schedules, may be found on the Monitor's website at: www.ey.com/ca/glenogleenergy (the "**Monitor's Website**"). Capitalized terms used in this Notice of Dispute not otherwise defined in this letter shall have the meaning given to them in the Claims Procedure Order.

Name of Claimant: Energetic Services Inc.
Address: Miles² Davison LLP / Attention: Matthew Prieur
900, 517 - 20 Avenue SW
Calgary, Alberta T2R 0A8
Telephone Number: 403-298-0339
Facsimile Number: 403-263-6840
E-mail Address: mprieur@milesdavison.com

PLEASE TAKE NOTICE THAT, pursuant to the Claims Procedure Order, we hereby give you notice of our intention to dispute the Notice of Revision or Disallowance dated June 27, 2022 issued by the Monitor, in respect of our Secured/Priority Claim. We accept / dispute the following portion(s) of our Secured/Priority Claim as revised and / or disallowed in the said Notice of Revision or Disallowance:

	Allowed (per Notice of Revision or Disallowance)	Revised per Claimant
Debtor Entity / D&O	N/A	Glenogle Energy Inc.
Classification	N/A	Secured
Claim Value	\$ 0	\$228,032.63

Reason for the dispute (attach copies of any supporting documentation):

The lien lands comprise a multi-well battery, a centralized collection point connected by pipeline to several nearby oil/gas production wells. Energetic Services Inc. was hired by Glenogle Energy Inc. to attend the lien lands for the purpose of hauling away the produced oil and water. Energetic's services were in connection with the recovery of a mineral. Energetic was never provided any knowledge of the lands on which Glenogle's oil/gas production wells are situated, only the lien lands. Caselaw establishes that a lien can extend to adjacent lands if a common purpose is established between the lien lands and the adjacent lands. Glenogle held oil/gas production wells on adjacent lands that produced through pipelines that are connected to the battery on the lien lands, therefore a common purpose lien can be established on behalf of Energetic. Attached is a comprehensive summary of the caselaw on common purpose liens.

Per: Matthew Prieur

Name of Claimant:

Energetic Services Inc.

If Claimant is other than an individual, print name and title of authorized signatory

Name: Matthew Prieur

Title: Counsel for Energetic Services Inc.

Summary of Factors in Support of Extending a Lien to Adjacent Lands

- i. There is a common purpose between the site where the work was done and the land upon which the lien was registered (*MJ Limited* at para 4, *McTaggart* at p. 376, *Smoky River Coal* at para 30, *Anvil Range Mining* at para 39);
- ii. There is geographical proximity between the land upon which the lien was registered and the adjacent lands (*MJ Limited* at para 53, *Bardeck, Anvil Range Mining* at para 40);
- iii. The improvement benefits both lands (*McTaggart* at p. 376 and 377);
- iv. The improvements on the two lands cannot be regarded as separate, i.e. neither serves a purpose nor is functional without the other (*Stettler* at para 98, 100 and 104);
- v. The lands are owned by the same entity (*McTaggart* at p. 376);
- vi. The lands are operated together (*Anaka* at para 16)
- vii. The improvement is singular, rather than several independent improvements (*Stettler* at para 98, 100 and 104, *Smoky River Coal* at para 27 and 28);
- viii. The contract between the parties specifically references the adjacent lands (*Re Gauntlet* at para 14), although the opposite view has also been upheld (*Ed Miller* at para 47); and
- ix. The owner will not be prejudiced by extending the lien to the adjacent lands. (*304034 Alberta Ltd.* at para 2, 3 and 5)

Notes

- i. Some authority stands for the proposition that a lien cannot extend to adjacent lands that were not liened as the current wording of the Act is not broad enough. This view has largely been rejected. (*MJ Limited* at para 37 and 38)
- ii. The scope of the “common purpose” in services provided should not be limited to the precise lands named in a contract. (*Ed Miller* at paras 46-50)
- iii. Historically it was considered improper to lien the surface of lands for any work done in connection with the recovery of a mineral. Current caselaw and legislation does not suggest that this principle no longer applies or that it is at odds with standard practice when filing a lien in connection with the recovery of a mineral. (*The Mechanics’ Lien Act* at s. 6(4) and 6(5))
- iv. Factors to consider whether “offsite” work remains lienable (*Northern Dynasty* at para 28 – citing *PTI Group Inc.* at para 18):
 - A. whether the contractors, sub-contractors and owners contemplated that the services provided were necessary to expedite the construction of the improvement.
 - B. whether the off-site services could have been provided on the site.
 - C. whether the improvement could have been carried out absent such off-site services.
 - D. whether in all of the circumstances, the off-site services were so essential to the construction of the improvement and so directly connected with it, that it can be said that the services in question were “primary” in nature.

Court of Queen's Bench of Alberta

**Citation: MJ Limited (MJ Trucking) v Prairie Mountain Construction (2010) Inc, 2016
ABQB 395**

**Date: 20160713
Docket: 1401 12549
Registry: Calgary**

2016 ABQB 395 (CanLII)

Between:

MJ Limited operating as MJ Trucking

Plaintiff

- and -

**Prairie Mountain Construction (2010) Inc.,
Govan Brown Ltd.,
The City of Calgary and Ken Almer**

Defendants

Reasons for Judgment of J.T. Prowse, Master in Chambers

[1] The issue in this case is the validity of a builders' lien mistakenly filed against the wrong parcel of land.

[2] MJ Trucking entered into a subcontract with Prairie Mountain Construction (2010) Inc. ("Prairie Mountain") to provide earthmoving services and to supply gravel to a construction site at the East Calgary Landfill, on land owned by the City of Calgary. The project involved the construction of an administration building for the City.

[3] MJ Trucking was not paid by Prairie Mountain and it filed a builders' lien to collect what it was owed. The City land which MJ Trucking liened is evidenced by three certificates of title. Unfortunately for MJ Trucking, these three parcels are not the land upon which MJ Trucking provided services, but rather adjacent land.

[4] Prior case law indicates that a lien can be valid even if it is not registered against the land where the work was done, provided that the liened land and the land where the work was done are part of a project having a common purpose, the logic being that all components of a common project are improved when any portion of the common project is improved.

[5] For the reasons which follow, I have concluded that MJ Trucking has not provided sufficient evidence that the land liened and the land upon which the work was done formed part of a common project. Consequently MJ Trucking's lien is invalid.

The facts

[6] MJ Trucking provided trucking services (hauling of gravel and earthmoving) as a subcontractor of Prairie Mountain at the East Calgary Landfill.

[7] Prairie Mountain was itself a sub-contractor of the Defendant Govan Brown Ltd. ("Govan").

[8] Govan was under contract with the City of Calgary to construct an administration building known as the East Calgary Landfill Depot Project (the "project").

[9] When MJ Trucking was not fully paid by Prairie Mountain for the work it had done, it needed to ascertain the legal description of the land upon which it had worked in order to file a lien.

[10] The principal of MJ Trucking, Mohamed Jeha, attended at the East Calgary Landfill. He obtained a municipal address from an employee at the entranceway building to the East Calgary Landfill, a building (the only building) which was immediately adjacent to the place where the MJ Trucking work had been done. He confirmed the municipal address by a Google search.

[11] Mr. Jeha also contacted the City by telephone and obtained confirmation of the municipal address of the East Calgary Landfill. He was advised to obtain the legal description from the municipal tax office at City Hall.

[12] Mr. Jeha then attended at the Calgary City Hall municipal building and requested the legal description for the municipal address of the East Calgary Landfill. He was provided with the legal description of three certificates of title, which he then provided to his legal counsel, who then registered a builder's lien against those three titles.

[13] Govan has since determined that the liened land is reflected on a different certificate of title from the land upon which Govan was constructing the administration building.

[14] Accordingly Govan applies to have the MJ Trucking lien declared invalid on the basis that it was registered against the wrong land, and to obtain back the security which it posted in lieu of the lien.

[15] MJ Trucking now understands that the East Calgary Landfill encompasses a large undemarcated tract of land involving many more than the four certificates of title in question (that is, more certificates than the three liened titles and the one "project" title).

lands was its nerve centre. The freehold lands, in my opinion, were enjoyed with the improvement on the leasehold lands, and the claim registered against the freehold lands was valid and proper. The B.A. property and the freehold lands, in common with the leasehold lands, were all subject to the right of the plaintiff to have its lien enforced. Accordingly, although the building materials were supplied for the construction of a building on the leasehold lands, the plaintiff has a valid and subsisting lien on the freehold lands ...

[36] In *Wayne's Electric Ltd. v. Carpathian Hotels Ltd.*, *supra*, the Court declined to validate a lien filed on land adjacent to land where a motel was being constructed.

[37] The Court specifically commented on the change in language to the lien legislation, as follows:

Counsel for the plaintiff submits that lot D, against which the lien is filed, is land enjoyed with lot 3, and accordingly the lien should be valid as against lot D. There is an evidentiary dispute as to whether lot D is enjoyed with lot 3. Whether it is is irrelevant.

The concept of land "enjoyed with" other land went out of vogue in this province with the coming into force of the *Mechanics' Lien Act*, S.A. 1960, c. 64. Prior to that time the Act gave a lien "in the improvement and the land occupied thereby or enjoyed therewith". That legislation is discussed by Greschuk, J., *Crown Lumber Co. v. Saulsberry*, [1961] 34 W.W.R. 370 (Alta.T.D.).

Section 4 of the present Act gives the lien claimant "a lien upon the estate or interest of the owner in the land *in respect of which the improvement is being made*". It cannot be clearer. Only the land upon which the improvement is made is subject to the lien. No other land, even though owned by the same person, is subject to the lien. The lien is solely a creature of statute and extends only to that which the statute provides. The statute is unequivocal as to which land is subject to the lien.

[38] In my view, the passage quoted above is not consistent with subsequent case authority, outlined below.

[39] In *Prairie Roadbuilders Ltd. v. Stettler*, 1983 CarswellAlta 147 (Master), the Court upheld a lien on a sewage lagoon, even though the work was physically done on adjoining streets, not on the lagoon itself.

[40] The headnote describes the situation as follows:

A small village in the defendant county contracted with the defendant K. for the construction of a sewage system, consisting of a gathering system running under the village streets connected to a trunk sanitary line running along a public highway road allowance to a lagoon site. When the contractor abandoned the project, builders' liens were registered by the plaintiff and other creditors against the lagoon site alone, since the streets were not lienable. An application was brought to determine if the lagoon was lienable and if so, what lien claimants had a right to lien it.

Analysis

[53] In my view, the case law reviewed above supports the proposition that a builders' lien under current Alberta legislation can be validly registered on land, even though the improvement was not made on that land, provided that there is a common purpose, including at least some geographical proximity, between the site where the work was done and the land upon which the lien was registered.

[54] Applying that principle to the MJ Trucking lien, I find the evidence presented by MJ lacking as to whether there was a common purpose between the project site where the administration building was being constructed, and the nearby land upon which the lien was placed.

[55] The evidence before me does not show how the improvement being constructed was connected to the land which was liened. Is the present plan for the liened land to be used eventually for landfill purposes (it is bare unused land at the present), or is it intended for other uses?

[56] Likewise, the evidence before me does not establish whether the workers operating out of the newly constructed administration building are doing work related to the operations of the East Calgary Landfill site, and specifically how?

[57] In my mind it is not sufficient for MJ Trucking to simply establish that both the administration building and the liened land are located in a geographical area which has been labelled as the "East Calgary Landfill Site" by its owner the City of Calgary.

[58] Consequently, I find that the MJ Trucking lien is invalid and I order the Clerk of the Court to return to Govan the security it posted with respect to the MJ Trucking lien.

Costs

[59] If the parties cannot agree on costs they may seek a ruling from me in that regard.

Heard on the 16th day of June, 2016.

Dated at the City of Calgary, Alberta this 13th day of July, 2016.

J.T. Prowse
M.C.C.Q.B.A.

ALBERTA

SUPREME COURT

GRESCHUK, J.

Re Mechanics' Lien Act

Crown Lumber Company Limited
v. McTaggart Motors (Stettler) Limited et al

1961 CanLII 544 (AB QB)

C. D. Oughton, for plaintiff.

G. E. Trott, for defendant Canadian Credit Men's Trust Association (Trustee for Dunlop, a Bankrupt).

March 16, 1961.

GRESCHUK, J. — In these proceedings, commenced to enforce a mechanics' lien, the trial of an issue was directed to determine whether or not the plaintiff has a valid and subsisting lien under *The Mechanics' Lien Act*, RSA, 1955, ch. 197, now *The Mechanics' Lien Act*, 1960, ch. 64, upon the estate and interest of the defendant McTaggart Motors (Stettler) Ltd. (hereinafter referred to as "McTaggart Motors") in lots 29, 30 and 31 in block 3, townsite of Stettler plan LIV, reserving thereout all mines

"an improvement for an owner, contractor or sub-contractor, has by virtue thereof a lien for so much of the price of the work, service or materials as remains due to him *in the improvement and the land occupied thereby or enjoyed therewith*, or upon or in respect of which the work or service is performed, or upon which the materials are to be used."

The question as to what land in addition to that occupied by the improvement a mechanics' lien attaches is one of fact to be determined from all the circumstances. *Steedman v. Sparks & McKay*; *Steedman v. Dom. Lumber & Coal Co. Ltd.* [1930] SCR 351, at 357. It is also well settled that the non-filing of a mechanics' lien against a parcel of land on which is situate the improvement or building upon which the materials giving rise to the lien have been furnished, does not prevent a duly filed lien attaching to other lands enjoyed together with the first mentioned parcel. *Jackson Water Supply Co. v. Bardeck, Jennings and Hanskins* (1915) 8 WWR 468, 31 WLR 151, 8 Alta LR 305; *Wray & Sons Ltd. v. Stewart and Roy* [1958] OWN 65. In *Security Lbr. Co. Ltd. v. Anaka* [1927] 1 WWR 975, at 979, 21 Sask LR 459, Lamont, J.A. stated:

"Whether more than one plot is enjoyed with the building is a question of fact in each case. One test to be applied in determining the question is, do the several plots upon which a lien is claimed, as used by the owner, constitute a single tract or unit? Were they operated together, and for a common purpose, and was the building calculated to facilitate that common purpose and intended to benefit the whole?"

In the present case, the freehold and leasehold lands were separated by a lane which had been leased from the town of Stettler for the purpose of storing new and used cars, and for all practical purposes, the leasehold and freehold lands were contiguous. Prior to the construction of the new building one business with various departments was carried on by McTaggart Motors on five different parcels of land, the main offices and tools and machines for the installation of parts and the making of repairs to motor vehicles being housed in the old building situated across the street from the freehold lands. After the construction of the new building, the main offices and all of the machines and tools for the installation of parts and the making of repairs were transferred to the new building. At all times prior and subsequent to the construction of the new building the freehold lands were used for the storage of new and used cars and tires. Before the construction of the new building the leasehold lands were also used for the storage of new

and used cars. All of the accounting records for all departments wherever situate, were kept in one set of books, although each department was listed under a separate heading to determine whether a department was operating at a profit or a loss. The books, as I have already indicated, showed only one net profit for the whole business each year. Each department, to some extent, was dependent upon the other. As the signs on all of the properties indicated, McTaggart Motors was one business operated as a single unit. All of the lands, including the freehold lands, were operated together for a common purpose. The construction of the new building was calculated to facilitate that common purpose and was intended to benefit the whole business. Having regard to the facts and circumstances of the present case, I am satisfied that the freehold lands were an integral part of the main operations of the company of which the main building on the leasehold lands was its nerve centre. The freehold lands, in my opinion, were enjoyed with the improvement on the leasehold lands, and the claim registered against the freehold lands was valid and proper. The B.A. property and the freehold lands, in common with the leasehold lands, were all subject to the right of the plaintiff to have its lien enforced. Accordingly, although the building materials were supplied for the construction of a building on the leasehold lands, the plaintiff has a valid and subsisting lien on the freehold lands, being lots 29, 30 and 31 in block 3, plan LIV, within the meaning of sec. 6 (1) (b) of *The Mechanics' Lien Act*.

The second question which I must consider and determine is whether the affidavit verifying the claim invalidates the lien when it is taken by an employee who had no personal knowledge of the facts contained in the claim for lien. Counsel for the trustee in bankruptcy contends that since the plaintiff failed to comply with the provisions of sec. 23, subsecs. (3), (4) and (5) of *The Mechanics' Lien Act*, there is no affidavit verifying the claim for lien and the lien is a nullity and absolutely ceases to exist. He submits that the curative provisions of sec. 27, subsecs. (1), (2) and (3) do not assist the plaintiff, and cites *McArthur & Co. v. Fagan* [1928] 2 WWR 6, 39 BCR 554; *Kydd Bros. v. Taylor*; *Plumbing Supplies Co. v. Taylor* [1932] 3 WWR 109; *Empire Brass Mfg. Co. v. Milligan* [1935] 3 WWR 189; *Burchill v. Marino* [1951] 2 DLR 518 (N.B.); *Polson v. Thomson* (1916) 10 WWR 865, 34 WLR 745, 26 Man R 410; *Braden v. Brown*; *Wm. O'Neil Co. v. Brown* [1917] 3 WWR 906, 24 BCR 374. I cannot agree with these submissions or the authorities cited. REASONS FOR JUDGMENT
of the
HONOURABLE MR. JUSTICE S.J. LoVECCHIO

INTRODUCTION

[1] This is the second of two applications to determine the priority of certain charges and encumbrances against certain interests and assets of Smoky River Coal Limited. Being in the coal mining business, Smoky holds interests in various Crown coal leases and also in certain related surface leases. The first application related to Smoky's Crown coal leases and this application concerns the related surface leases and mining facilities.

[27] Counsel for Smoky submitted that the proper approach is set out in the decision of Master Funduk in *Prairie Roadbuilders Ltd. v. Stettler*¹⁰ which considered whether builders could lien one part of a sewage system when they had worked on another. At page 320, Master Funduk said:

In my view, in this case the improvement is the total project, which is the entire sewage disposal system. The collection system and the lagoon system cannot be regarded as separate improvements. They go together. Neither serves a purpose without the other. Neither is functional without the other.

And at p.323

...I do not consider it essential that separate parcels of land be contiguous in order for them to be regarded as “one property” for lien purposes. What is critical is that there be only *one* improvement. That makes the separate parcels “one property” for lien purposes.

What was done by the lien claimants who worked on, or provided materials for, the improvement under the streets land *was directly related to the process of construction of the project, being a useable sewer system*. What was done by those persons for that part of the improvement under the streets land was just as essential to the project as what was done by those persons for that part of the improvement which is physically situate on the lagoon land.

[28] Counsel for Smoky argued on the facts of this case that there were “several independent improvements”. I do not agree.

[29] The evidence has satisfied me that the mine and the mine site is an integrated operation in which no part exists purely for its own sake. The operation exists as a whole and work done in one section of it is necessarily done to improve the effectiveness of the whole operation. Can it really be said, for instance, that a road through the mine site to a facility on a different part of the mine site did not improve that facility such that the corresponding Builder’s Lien should be limited to the land under the road? Surely not, for the facility would be inaccessible without the road.

[30] In short, the mine site was an integrated operation in which work done on specific areas of the mine site was performed for the common purpose of improving the mine and the mine site as a whole. The Lienholders who performed work within the area of the surface leases comprising the mine site are entitled to assert their lien claim against all the areas of the mine site including the two quarter sections covered by the certificates of title and vice versa.

[IV Construction and builders' liens](#)

[IV.4 Property or interest subject to lien](#)

mine. It is an entirely different question for services rendered to or materials supplied to a mine, a lien is sought to be attached to such property in Whitehorse, upon which the lien claimant did no work. These are difficult distinctions to keep in mind, but it is essential that this be done, and that one not descend to simple logic in making the determination on the basis solely of the words of the statute as they may be appropriately be interpreted.

38 To accomplish the latter, one must be satisfied on a balance of probabilities that the house in Whitehorse is land enjoyed with the mine.

39 My interpretation is that there must be some connection, either in purpose or geographical, which approaches a necessary connection. Where the use of the land in question (i.e. the land upon which the Faro houses are situate, the land upon which the Whitehorse house is situate) results from an election of one optional function as opposed to several others, is there that degree of necessary connection to enable one to say pursuant to the statute that the Faro or Whitehorse land is enjoyed therewith, meaning therewith the mine?

40 All of the cases cited, which bind the land sought to be attached with the mine or with the work performed, involve either adjacent properties or properties in such close proximity that the reasonableness of the finding of being "in respect of or enjoyed therewith", has virtually no uncertainty when analyzed. Either the action or activities on the lands sought to be attached are absolutely necessary or, at least, reasonably necessary, to the operation of the property, to which the court was provided or is so closely geographically located that a contradictory argument is untenable.

41 It is a great leap of statutory interpretation to suggest that the integrated operation referred to in *Curragh*, being the joining of several mineral properties, notwithstanding that some of them have not yet been exploited, and fences, driveways, storage sheds and even the mill performing a separate function from the extraction of ores, all being held out as an integrated operation, should or can be considered the same as bringing into the integrated operation assets which the owner has opted to use and which may or may not, over an extended period, be enjoyed with the mines. The point is that at any given moment, the company could decide to alter their use of these properties — to rent them out to people who are totally unconnected with the mine. Since that is the case, the enjoyment therewith, if it exists, can only be said to be temporary, so long as that possibility exists in the corporate mind of the owner.

42 It seems to me, therefore, that to be enjoyed therewith, is intended to mean some usage of a permanent and necessary nature without which the operation of the mine would be substantially effected.

43 In this regard, the case of *Gustafson v. Ennis* (1911), 18 W.L.R. 6 (Y.T. Terr. Ct.), a case of the Yukon Territorial Court, is to be distinguished on its facts.

44 In support of counsels position that the words "enjoyed therewith" should be interpreted to encompass the Lomak Terminal and all of the other assets sought to be attached, the case of *Wray & Sons Ltd. v. Stewart* (1957), [1958] O.W.N. 65 (Ont. C.A.) is cited. This case is a mechanics lien case and the principal fact is stated to be as follows:

There is a ditch on or near the boundary line between the two parcels of land, but there is no boundary line fence or obstruction or erection to prevent the two parcels of land being used by the owner in the same way as though they constituted one parcel only.

And further, the court states:

It is not possible to formulate a rule applicable in all cases to determine whether a building or any other thing enumerated in s. 5 of the *Mechanics Lien Act* is enjoyed with other land against which a claim for lien has been filed.

45 It is my view that the *Wray & Sons Ltd.* case is easily distinguished on its facts from the task of determining whether or not properties 200 kilometres apart involved in a different process than pure mining is appropriately within the description of lands enjoyed therewith (a mine).

(Edmonton No. 8303-22699)

August 24, 1983.

[1] FUNDUK, Master:— The residents of the hamlet of Erskine, Alberta, wanted that which is taken for granted by many, a sanitary sewer system. The hamlet is situate in the county of Stettler No. 23. To provide such a sewer system the county entered into a contract with Krinke Plumbing Ltd. whereby the latter was to construct the system.

[2] Krinke performed part of the contract and then abandoned it on 2nd November 1981, leaving the usual plethora of lien claimants and other creditors.

[3] The project consists of a gathering system and a sewage lagoon. The gathering system consists of sewer pipes under the streets of the hamlet, to which are connected the sewer drain pipes of the residences. The main pipes under the streets eventually channel down to a trunk sanitary line which runs outside the hamlet, along a road allowance for a public highway, then under the highway to a lift station on the lagoon site. The lagoon site contains storage cells for the effluent.

[4] The land on which the lagoon is situate is registered in the name of the county. All of the liens are registered against this land. The streets of the hamlet are not liened and

[98] I would reject the application of s. 6 of the Act to this category of lien claimants. If s. 6 did apply, these lien claimants would not be able to “charge” the lagoon land. In my view, s. 6 negates the general lien concept only where there is more than one parcel of land and there are *separate* improvements on each parcel. An example of that situation is *Wexxon Dev. Ltd. v. Glow Const.* (1980), 13 Alta. L.R. (2d) 243, 15 R.P.R. 206, 40 A.R. 261 (Q.B.), where there were separate lots and a separate house on each lot.

[99] A number of decisions were cited by counsel. Many of them deal with a situation where an improvement is confined to one parcel of land only and the question is whether adjoining lands, which have not been improved, are lienable. An example is *Carron Ltd. v. Willen Estates Ltd.* (1977), 3 B.C.L.R. 334, 80 D.L.R. (3d) 38 (Co. Ct.). Another example is *Waynes Elec*, *supra*.

[100] I do not believe that *Big Bend Const. Ltd. v. Donald* (1958), 25 W.W.R. 281, reversed on other grounds 26 W.W.R. 336 (Alta. C.A.), can be taken literally. It is simply the same kind of situation found in *Waynes Elec*. Riley J. does state at p. 286:

I have already pointed out that at all events no lien could be placed against lot 2. *Liens are created and extend only to the very land on which improvements are incorporated.* (see sec. 6 [3]), and further, only such land as was properly chargeable with the lien may be sold by an order of the judge (see sec. 41 [3]). (The italics are Funduk, Master's.)

[101] The fact was that there had been no improvement to lot 2. That was why it was not lienable. I cannot agree that quote means that in the case of an improvement covering two or more parcels of land the improvement has to be “split” between the various parcels for builder's lien purposes. In my view, the above statement by Riley J. has no bearing where there is only one improvement which covers two or more parcels of land.

[102] *George Wimpey Can.* is also of the same nature as *Waynes Elec*.

[103] The improvement in *George Wimpey Can.* was confined solely to road allowances, which were not lienable. The question was whether abutting lots, to which no improvement had been made, were lienable. The court held not.

[104] Some of the decisions cited by counsel are the “one contract” situations where the lien claimant has a general lien, even where there are separate improvements. The classic decision on this is *Ont. Lime Assn. v. Grimwood* (1910), 22 O.L.R. 17. There is a suggestion by Middleton J. that a lien can be confined to the value of what is put in the “building”. He states, at p. 21:

This differs materially from the case where one owner chooses to enter into an entire contract for the supply of material to be used upon several buildings. From the nature of the contract, the onus is here shifted, and the claimant can ask to have his lien follow the form of the contract, and that it be for an entire sum, upon all the buildings. If the owner desires to invoke the statute to the extent of having the lien upon any building confined to the value of the material going into that building, the onus is upon him to shew the facts, which must be peculiarly within his own knowledge, and if, as often must be the case, the facts cannot be ascertained, less violence will be done to the statute by construing it as indicated than by rendering it nugatory in many instances in which the Legislature apparently intended a lien to exist.

[105] Taken literally, it can be argued that that quote supports the submission that the lien claimants who did work on, or provided material for, that part of the improvement under the streets land would not be entitled to lien the lagoon land.

[106] However, two points must be emphasized. First, Middleton J. was dealing with a case of separate improvements on separate parcels of land.

[107] Second, what did he mean in commenting on the owners desire “to invoke the statute to the extent of having the lien upon any *building* confined to the value of the material going into that building”? (The italics are mine.) How was the owner attempting to “invoke the statute”?

[108] The statute before Middleton J. was the Mechanics’ and Wage-Earners’ Lien Act, 1910 (Ont.), c. 69. It did not have anything comparable to s. 6 of our Act. There was no express statutory base for “splitting” the lien. The Ontario Act gave a lien on the “erection, building, railway, land, wharf, pier, bulkhead, bridge, trestlework, vault, mine, well, excavation, fence, sidewalk, paving, fountain, fishpond, drain, sewer, aqueduct, roadbed, way, fruit and ornamental trees, and appurtenances, and the land occupied thereby or enjoyed therewith or upon or in respect of which such work or service is performed”.

[109] The thrust of the charge was on the improvement. Accordingly, in the case of one contract and separate improvements, if the owner wanted to challenge the charge on an improvement the burden lay on him to show that the lien should be on any particular *improvement* only, rather than all improvements.

[110] Section 4 of our Act gives a lien *on the land* for which an improvement is done. By looking at the land, rather than the improvement itself, a “splitting” of the lien becomes academic except where the improvements are separate and on different parcels of land.

Saskatchewan Supreme Court

[APPEAL]

Citation: Security Lumber Co., Ltd. v. Anaka

Date: 1927-03-28

Mechanics' Lien Act, S, 4—"Land Occupied by the Building or Enjoyed Therewith"—Whether Two Quarter Sections Farmed as One Farm—Land Held by Trustee.

Where land has been surveyed into plots or tracts, whether quarter sections or subdivision lots, and a plan of such survey has been registered, if a building is erected on one of such surveyed plots, the whole of such plot is *prima facie* "land occupied by the building or enjoyed therewith," within the meaning of *The Mechanics' Lien Act*. It is however open to an owner to show that the whole of such plot is not enjoyed with the building, as where there is a city lot, which, according to the registered plan, runs from one street through to another, and the owner has employed separate contractors to erect a house, one on each end of the lot; in such a case it would be open to the owner to show that only part of the lot was occupied by. or enjoyed with each house. On the other hand, it is open to a lienholder to show that more than one registered plot is enjoyed with the building, although such building stands wholly on one plot. Whether more than one plot is enjoyed with the building is a question of fact in each case. One test to be applied in determining the question is, do the several plots upon which a lien is claimed, as used by the owner constitute a single tract or unit; were they operated together, and for a common purpose, and was the building calculated to facilitate that common purpose and intended to benefit the whole?

This was an appeal by the plaintiff from the judgment of Ross, D.C.J., of the Judicial District of Yorkton, dismissing its action under a mechanics' lien on the ground that the quarter section of land, against the title of which the lien was registered, was not enjoyed with the building for which the material, the subject of the mechanics' lien, was furnished, and was not subject to the lien. The appeal was argued before the Court of Appeal (HAULTAIN, C.J.S., LAMONT, MCKAY and MARTIN, JJ.A.) and was dismissed with costs.

H. J. Schull, K.C., for plaintiff, appellant: The lien conferred by *The*

1927 CanLII 184 (SK CA)

1338, 32 W.X.R. 73, 23 D.X.R. 676, the British Columbia Court of Appeal held that the lien for clearing certain blocks in a townsite subdivision, attached to two quarter sections. The reason for so holding was that the plaintiffs' contract was to clear the two quarter sections, although there was a clause therein which gave the defendants a right to terminate the contract at any time on giving 15 days' notice, and therefore the whole of the two quarter sections must be considered as one tract, and further that both quarters had benefited by the work done. It must not be overlooked, however, that the British Columbia statute gave a lien on the building, work, etc., and "the lands occupied or *benefited* thereby or enjoyed therewith."

[14] In *Wentworth Lbr. Co. v. Coleman*, 3 O.W.R. 618, Osier, J.A., said:

It is in short, in general, a question of fact to what property the lien extends beyond that actually occupied by the building itself * *

* * It appears that the whole block of land, a parcel of 53 acres, had been used in connection with an hotel thereon called the Brant House, and that it was bought by the defendants for the purpose of erecting thereon a new and modern hotel called the Hotel Brant and as grounds in connection therewith. A significant fact is that the contract between the parties for erection of that hotel is expressed to be for the erection of "an hotel for the proprietors on lands and premises situate and known as the Brant House property."

I think it might well be concluded that the whole of this property was property enjoyed in connection with the new hotel within the meaning of the section.

[15] In addition to the above, the following cases are instructive: *Davis v. Crown Point Mining Co.*, 3 O.X.R. 69; *Orr v. Fuller*, 172 Mass. 597; *Worsing v. Pennyslvania Hotel Co.* (1910) 26 L.R.A. (N.S.) 831.

[16] These authorities seem to me to support the conclusion that, where land has been surveyed into plots or tracts, whether quarter sections or subdivision lots, and a plan of such survey has been registered, if a building is erected on one of such surveyed plots, the whole of such plot is *prima facie* land occupied by the building or enjoyed therewith, within the meaning of *The Mechanics' Lien Act*. It is however open to an owner to show that the

whole of such plot is not enjoyed with the building, as where a city lot, which, according to the registered plan, runs from one street through to another, and the owner has employed separate contractors to erect a house, one on each end of the lot; in such a case it would be open to the owner to show that only part of the lot was occupied by or enjoyed with each house. On the other hand, it is open to a lienholder to show that more than one registered plot is enjoyed with the building, although such building stands wholly on one plot. Whether more than one plot is enjoyed with the building is a question of fact in each case. One test to be applied in determining the question is, do the several plots upon which a lien is claimed, as used by the owner, constitute a single tract or unit? Were they operated together, and for a common purpose, and was the building calculated to facilitate that common purpose and intended to benefit the whole? In the case at bar it cannot, in my opinion, be said that Wasyl Anaka farmed the north-east quarter of 36 and the south-west quarter of 31 as one farm. As a matter of fact he did not farm the north-east quarter of 36 at all; all he did was to assist his brother. The house built with the plaintiffs' materials was not intended to be of assistance to the farming operations on the north-east quarter of 36, for it was not intended that John Anaka, who directed the operations on that quarter, should live in it, or that it should in any way be common to the two quarters.

[17] I therefore agree with the trial Judge that the north-east quarter of 36 was not land occupied by or enjoyed with the house erected on the south-west quarter of 31.

[18] The appeal should be dismissed with costs.

[19] MCKAY, J.A.—I agree that this appeal should be dismissed with costs.

[20] MARTIN, J.A. concurs with Lamont, J.A.

Appeal dismissed with costs.

Court of Queen's Bench of Alberta

**Citation: Re. Gauntlet Energy Corporation (Companies' Creditors Arrangement Act), 2003
ABQB 1014**

Date: 20031209
Docket: 0301 09612
Registry: Calgary

In the Matter of the Companies' Creditors Arrangement Act,
R.S.C. 1985, c. C-36, as amended

And the Matter of the Business Corporations Act, R.S.A. 2000, c. B-9

And in the Matter of
Gauntlet Energy Corporation

**Reasons for Decision
of the
Honourable Mr. Justice Sal J. LoVecchio**

Introduction

[1] Gauntlet Energy Corporation applied for an Order approving the distribution of \$788,262.02 to a number of its creditors. This amount represents the net proceeds arising from the previously Court approved sale by Gauntlet to Encana Corporation of certain mineral leases.

[2] One of the creditors, Noyes Supervision (1981) Ltd., asserts that it should receive \$629,890.01 of this amount rather than the \$8,576.07 proposed. All of the other beneficiaries are in agreement with their proposed treatment.

[3] At the conclusion of the application, I approved the distribution proposed by Gauntlet and signed an Order. As the issue raised by Noyes is important, I indicated that I would provide written reasons for my decision. These are those reasons.

Background

[4] Gauntlet and Noyes entered into a Service Agreement dated June 20, 2001. A copy of the Agreement is Exhibit A to the Affidavit of Mr. Nielson sworn November 25, 2003 and it is part of the record.

Agreement does not support a general lien

[12] This is not the first time an oil and gas services contract of this nature has come before this Court. There are two fairly recent decisions on the issue: **Schlumberger Holdings (Bermuda) Ltd. v Merit Energy Ltd.** (LoVecchio J.)² and **Blue Range Resource Corp. (Re)**³ (Romaine J).

[13] While Noyes does not face the lack of common ownership among the lands with respect to which it seeks to assert a general lien, a decisive factor for the Court of Appeal in denying the general lien in **Schlumberger**, the other factors considered at the trial level of that case are problematic for Noyes.

[14] Specifically, the Agreement is very general in its terms and provides no estimate of the number of wells to which it will apply. The map references in Exhibit “B” to the Agreement emphasize the generality of the arrangement rather than make it more specific. There is no exclusivity to the relationship and while the Agreement is on its face for an indeterminate period, it may be terminated on 15 days notice by other party.

[15] Further, the Agreement is on a best efforts basis by Noyes and provides no guarantee of its availability. Paragraphs 1(h) and (i) make it clear that invoicing for work is on a project by project basis and the price list contained in the Agreement which is to be utilized for billing purposes is on a well by well basis. Noyes billed Gauntlet and filed its proof of claim in these proceedings on this itemized basis.

[16] Similar non-exclusive, project by project arrangements were examined in **Blue Range** and were held not to form the basis for a general lien.

[17] I note that the Agreement was entered into after the reasons in **Blue Range** and **Schlumberger** were released. Those decisions emphasize that the Courts will be very careful to ensure that the underlying basis for the general lien is sound, given that the result will be to give priority to the general lien claimant over other creditors. The issue of general liens is important to oil and gas service providers and recipients, as well as the financiers involved. It would not be difficult for service contractors to have a clause inserted into their agreements expressly providing that that all or a significant portion of the lands of the company for whom they were delivering services would stand as security for the works they were performing on any individual well or

of the work done or material furnished in respect of the improvement on the lot less a proportionate share of any money paid to the person claiming the lien in respect of the work done or the material furnished for all the lots to which the lien attaches; and Section 8(2) reads: In this section, “lot” means a lot, block or parcel.

J. T. Prowse, for R. Angus Alberta Limited.

R. M. Curtis, for Shell Canada Limited.

(Edmonton Nos. 7903-07417, 7903-07431, 7913-051, 7903-09728, 8103-27681)

12th July 1982.

[1] PURVIS J.:— In 1978 Syncrude Canada Ltd. entered into a series of contracts with Keno Construction Ltd. relating to the construction of Syncrude's oil extraction plant near Mildred Lake, Alberta. Keno employed several subcontractors to provide services and to supply materials in order to carry out its obligations to Syncrude. When Keno encountered financial difficulties several subcontractors filed builders' liens and in late 1979 five builders' lien actions were commenced in this court based on equipment rental, earthmoving and material supply contracts. The five actions were ordered to be tried together.

[2] A petition for a receiving order against Keno was filed in the Court of Queen's Bench by R. Angus Alberta Limited. Gilbert S. Ramsay, chartered accountant, was appointed interim receiver. On 23rd July 1979 on a further petition, Ramsay was appointed trustee in bankruptcy.

[3] On 1st November 1979 this court ordered that an amount, \$1,413,259.53, paid by the owner, Syncrude, be held by the trustee and invested in an interest-bearing trust account.

[4] Principal and interest were made subject to the direction and control of the court. The order further directed that Syncrude be discharged from any liability in respect of liens and that the money in court stand in place of the lien security. All liens listed in the order were discharged.

[5] On 29th November all defendants other than Keno were removed as defendants leaving the trustee Ramsay as the only defendant in all five actions.

and just rental of the equipment while used on the contract site. The periods during which the option to purchase the equipment expired at varying dates between 16th April 1979 and 15 February 1980 and the lessee no longer has it within his power to acquire ownership. That power ceased to exist when he surrendered the equipment to the lessor even if it had not already ceased to exist by terms of the option.

[45] In summary, the payments accrued due to Ed Miller and R. Angus under their agreements with Keno retained their character as rental payments. Since the options were never exercised and cannot now be exercised, the payments never did change from rentals to payments on purchase price, and the lessor is entitled to a lien for reasonable and just rental of equipment for the time it was used on the contract site.

III

[46] The land upon which Syncrude was erecting its oil recovery and processing plant is located in northeast Alberta on a tract many thousands of acres in area. The services described in the contracts were to be performed in eight different locations within the large tract. The locations were described in the portion of the Keno/Syncrude contracts headed "Job Specification" and to a certain extent by red markings made by the witness Harper on the topographical map, Ex. 27.

[47] It has been argued that the term "contract site" should be interpreted to mean the specific locations described in the contracts or to the locations marked in red on Ex. 27. I do not accept this narrow interpretation. It is my opinion that work performed anywhere on the large tract covered by the Syncrude leases is work performed on the contract site. The plaintiffs in this case have established their lien rights and the legislation should be liberally interpreted to achieve its objectives.

[48] In *Steedman v. Sparks & McKay*, [1930] S.C.R. 351 at 357, [1930] 3 D.L.R. 185, Smith J. stated:

The statute gives a lien on the estate of the owner, in the building and appurtenances and the land occupied thereby or enjoyed therewith, and it is a question of fact in each case what land this includes, to be determined from all the circumstances.

[49] In *Crown Lumber Co. v. McTaggart Motors Ltd.* (1961), 34 W.W.R. 370, Greschuk J. of the Supreme Court of Alberta stated it is well settled that one test to be applied in determining the extent of the owner's land which could become subject to a lien is — do the several plots upon which a lien is claimed, as used by the owner, constitute a

single tract or unit? Were they operated together for a common purpose, and was the building calculated to facilitate that common purpose and intended to benefit the whole?

[50] In the case before me it is my view that the work performed by the claimants and materials supplied were for a common purpose and did in fact benefit the whole and a properly filed and valid lien must attach to the whole tract on which the complex is located.

IV

[51] It is a question of fact in each case whether or not materials or services have been supplied under multiple separate contracts or under a prevenient arrangement.

[52] A prevenient arrangement is found where a series of contracts is linked together by some preliminary understanding to the point that the court can conclude that there is one continuing contract contemplated by the preliminary arrangement.

[53] The importance of determining whether or not the claim is made under a chain of separate contracts or under a prevenient arrangement is that the legislation provides that liens which are not registered within 35 days of the date that the last material or service is furnished cease to exist. Where there are multiple contracts, it is necessary for the claimant to file a lien within 35 days of the completion of each contract. On the other hand, where a prevenient arrangement exists, one lien can be filed covering all claims as long as it is filed within 35 days of the date that the last material or service was provided under the last contract. This would be so even if a period in excess of 35 days intervenes between the completion of one contract and commencement of another.

[54] Reported cases dealing with this question contain many examples of circumstances in which a prevenient arrangement has been found to exist and other cases where that argument was rejected. The onus is upon the claimant who invokes prevenient agreement to establish that the materials and services were supplied pursuant to that agreement. If he does not do so it is assumed that materials were supplied or services provided under separate contracts.

[55] The leading authority on this subject is *Menzies and Herbert Ltd. v. Rocky Mountain School Div.*; *Rocky Mountain School Div. v. Atlas Lumber Co.*, [1954] S.C.R. 589, [1955] 1 D.L.R. 161. In that case the Supreme Court of Canada per Locke J. at pp. 604-5 adopted the following as a correct statement of the law:

Alberta Court of Queen's Bench
304034 Alberta Ltd. (Tyro Contracting & Developments) v. Cox Brothers
Contracting & Associates Ltd.
Date: 1987-03-23

J.M. Ross, for applicant.

J.P. Poirier, for respondent.

(Edmonton No. 8703-00554)

March 23, 1987.

[1] MASTER QUINN: – This is an application to have a builders' lien removed from the title to the land against which it is registered on the ground that it was registered against the wrong parcel. The improvement created was a warehouse, and it was in fact constructed on lots 3 and 4, which are owned by Fountain Tire Ltd. The lien claimant supplied material that was used by the general contractor in the construction of the warehouse. The lien was registered inadvertently against lot 1, which is also owned by Fountain Tire Ltd. Lot 1 is contiguous with lots 3 and 4 except that it is separated from them by a 20-metre wide service road. There is no evidence as to who owns the service road. There is a dispute between the parties as to whether the lien was filed within the time allowed, but counsel have asked me to rule only on the question of the validity of the lien relating to the fact that it was filed on the wrong parcel.

[2] The question that must be decided is whether the lien is saved by s. 27(1) of the Builders' Lien Act, R.S.A. 1980, c. B-12, on the ground that there has been substantial compliance with s. 25 of the said Act notwithstanding the error. In *Wayne's Elec. Ltd. v. Carpathian Hotels Ltd.* (1981), 34 A.R. 588, Master Funduk held that where a lien is filed against the wrong land it cannot be saved by said s. 27(1). The facts in that case were, if anything, even stronger in favour of the lien claimant than the facts in the present case. In *Nor-Min Supplies Ltd v. C.N.R.* (1979), 27 O.R. (2d) 390, 10 R.P.R. 62, 106 D.L.R. (3d) 325, the Ontario Court of Appeal held that a lien inadvertently filed on the wrong land (although the land was owned by the same owner as owned the right land) was saved by s. 18 of the Ontario Mechanics' Lien Act, R.S.O. 1970, c. 267. Houlden J.A. said that the court was not attempting to make a definitive statement of the

scope of s. 18, but the court decided the section saved the lien. He summarized the facts as follows:

- (a) The lien was registered in the proper Registry Office.
- (b) Save for the wrong description, the claim for lien complied in all respects with the requirements of s. 16.
- (c) The land on which the lien was registered was linked by the main line of the C.N.R. to the land on which it should have been registered.
- (d) The owner of both parcels of land was the same person.
- (e) No one was prejudiced by the lien being registered against the wrong lands.

[3] For reasons stated in my decision in *Lab-Spec Indust. Ltd. v. Camwil Const. Ltd.* (1985), 65 A.R. 330, I prefer the approach of the Ontario Court of Appeal in the *Nor-Min Supplies Ltd.* case to the more draconian view of Master Funduk in the *Wayne's Elec. Ltd.* case.

[4] I would accordingly hold that although the lien claimant does not have a valid lien against lot 1, it does have a valid and subsisting lien on lots 3 and 4.

[5] In the present case there was no evidence of any prejudice to the landowner. Counsel opposing the validity of the lien cited *McDonald v. McKenzie* (1914), 7 Alta. L.R. 435, 7 W.W.R. 604, 29 W.L.R. 890, 19 D.L.R. 418 (T.D.). In that case the lien was filed on lots 5 and 6, block 50, whereas it should have been filed on lots 5 and 6, block 51. In my opinion, that case is of no assistance here because the reasons for decision do not disclose whether the parcels in question were owned by the same person, or whether they were physically close to each other.

Order accordingly.

THE MECHANICS' LIEN ACT

CHAPTER 197

An Act respecting Liens of Mechanics, Wage-earners and Others

1. This Act may be cited as "*The Mechanics' Lien Act*". Short title
[R.S.A. 1942, c. 236, s. 1]

Interpretation

2. In this Act,

- (a) "contractor" means a person contracting with or employed directly by an owner or his agent to do work or perform services upon or in respect of or to place or furnish materials to be used for any improvement; Interpre-
tation
"contractor"
- (b) "contract work" and "work" includes the doing of work and the performance of services upon, and the placing or furnishing of materials for, any improvement; "contract
work" and
"work"
- (c) "improvement" includes structure, erection, building, railway, tramway, wharf, pier, bulkhead, bridge, trestlework, vault, mine, or water, gas, oil or other well, gas or oil pipe line, excavation, fence, sidewalk, pavement, fountain, fishpond, drain, sewer, ditch, flume, aqueduct, roadbed, way, fruit or ornamental trees and the appurtenances to any of them; "improve-
ment"
- (d) "judge" means a judge of the Supreme Court or of a district court exercising jurisdiction in civil causes to the amount claimed in any proceedings under this Act, whether brought in respect of one or more than one lien; "judge"
- (e) "labourer" includes a workman, servant, labourer, mechanic or other person employed in any kind of labour, whether employed under a contract of service or not; "labourer"
- (f) "material" or "materials" includes every kind of moveable property; "material"
or
"materials"
- (g) "owner" extends to "owner"
- (i) a person, body corporate or politic, including a municipal corporation and a railway company, having an estate or interest in land, at whose request, express or implied, and
- (A) upon whose credit,
- (B) upon whose behalf,

- (c) with whose privity and consent, or
- (d) for whose direct benefit,
any contract work is done, and
- (ii) a person claiming under such person or body corporate or politic and whose rights are acquired after the commencement of the work;
- "Registrar" (h) "Registrar" means a Registrar within the meaning of *The Land Titles Act*;
- "statutory period" (i) "statutory period" means the time within which a lien must be registered;
- "sub-contractor" (j) "sub-contractor"
 - (i) means a person not contracting with or employed directly by the owner or his agent for the performance of contract work but contracting with or employed by a contractor, or under him by another sub-contractor, but
 - (ii) does not include a labourer;
- "wages" (k) "wages" means money earned by a labourer for work done, whether by time or as piece work or otherwise. [R.S.A. 1942, c. 236, s. 2]

Application of Lien

Highways **3.** Nothing in this Act extends to a public street or highway, or to any work or improvement done or caused to be done thereon by a municipal corporation.
[R.S.A. 1942, c. 236, s. 3]

Agreement ousting Act void **4.** (1) A verbal or written agreement, express or implied, on the part of a labourer that this Act shall not apply, or that the remedies provided by it shall not be available for his benefit is null and void.

(2) This section does not apply to a manager, officer or foreman or to any other person whose wages are more than twelve dollars per day. [R.S.A. 1942, c. 236, s. 4]

Non-party to agreement entitled to lien **5.** No agreement deprives a person of the benefit of the lien under this Act who is not a party to the agreement and who is otherwise entitled to a lien under this Act.
[R.S.A. 1942, c. 236, s. 5]

Creation and Extent of Lien

Creation of lien **6.** (1) Unless he signs an express agreement to the contrary and in that case, subject to the provisions of section 4, a person

- (a) who performs any work or service upon or in respect of, or
- (b) who places or furnishes any materials to be used in the making, constructing, erecting, fitting, altering, improving, demolishing or repairing of,

an improvement for an owner, contractor or sub-contractor, has by virtue thereof a lien for so much of the price of the work, service or materials as remains due to him in the improvement and the land occupied thereby or enjoyed therewith, or upon or in respect of which the work or service is performed, or upon which the materials are to be used.

(2) Materials shall be considered to be furnished to be used within the meaning of this Act when they are delivered either upon the land upon which they are to be used or upon some other land in the vicinity thereof designated by the owner.

(3) The lien given by subsection (1) in respect of materials attaches to the land as therein set out where the materials delivered to be used are incorporated into an improvement on the land, notwithstanding that the materials may not have been delivered in strict accordance with the provisions of subsection (2).

(4) When a lienholder's claim is for work, service or material supplied for a mining or drilling operation, or to prospect for or recover a mineral, the lien given by subsection (1) attaches only to the mineral and does not attach to the surface of the land.

(5) If a person registers a lien against the surface title in a case referred to in subsection (4), he is liable for legal or other costs and any damages incurred by or resulting to the holder of the surface title by reason of the registration of the lien against the surface title. Wrongful registration of lien

[R.S.A. 1942, c. 236, s. 6; 1943, c. 31, s. 1; 1952, c. 51, s. 2]

7. The lien arises at the date of the commencement of the work, or at the date of the first delivery of material. Date of lien

[R.S.A. 1942, c. 236, s. 7; 1943, c. 31, s. 2]

8. The right of a lienholder may be assigned by an instrument in writing and, if not assigned, passes upon his death to his personal representative. Assignment of lien

[R.S.A. 1942, c. 236, s. 8]

9. Where contract work is done in respect of land Work on land owned by married person

(a) belonging to a married woman or in which she has an interest, or

(b) belonging to a married man or in which he has an interest,

and the work is done with the privity and consent of the spouse of that married person, the spouse shall, for the purposes of this Act, be conclusively presumed to be acting as the agent of that married person as well as for himself or herself, as the case may be, in respect of such part of the

**Reasons for Decision
of the
Honourable Madam Justice G.D.B. Kendell**

[27] Even if I am incorrect in finding that the Hangingstone Project site is the “contract site”, *Trotter and Morton* stands for the proposition that a lien filed against the wrong parcel of land may still be valid, as long as the “work” performed at the wrong land (i.e. the gravel pit) is found to be part of the overall project.

[28] In her oral decision, the Learned Master referred to the Alberta Court of Appeal decision in *PTI Group Inc v ANG Gathering & Processing Ltd*, 2002 ABCA 89, where Berger J.A. had stated at para 18:

The remedy contemplated by the Act, as both Moir and Lieberman JJ.A. recognized (*in Hett et al. v. Samoth Realty Projects Ltd. (1977) 3 Alta. L.R. (2d) 97 at 105*), must be subject to some limit. That limit will largely be determined by the factual matrix of each case that presents for adjudication. The relevant inquiries will include:

- a) whether the contractors, subcontractors and owners contemplated that the services provided were necessary to expedite the construction of the improvement.
- b) whether the off-site services could have been provided on the site.
- c) whether the improvement could have been carried out absent such off-site services.
- d) whether in all of the circumstances, the off-site services were so essential to the construction of the improvement and so directly connected with it, that it can be said that the services in question were “primary” in nature.

[29] It is not contested that the sand and gravel were necessary for the Hangingstone Project construction. It is not contested that the Hangingstone Project site did not have the sand and gravel necessary for the project. I heard no evidence the Hangingstone Project site could have been improved without the sand and gravel, thus I am I am prepared to find that the improvements could not have been carried out in the absence of the sand and gravel.

[30] The final question is, were the services of Tyalta so integral and essential to the construction of the project, that it can be said to be primary in nature? The Learned Master below stated at page 60 of the Proceedings Transcript:

Now I understand Mr. Kirwin’s [Counsel for NDV] argument that this case is not directly on point. They are talking about primary versus secondary services, but I think the analysis of off-site and the focus on the factual matrix of each case presented for adjudication is applicable to this situation where we have -- obviously the aggregate is necessary. We have got over a \$6 million contract to provide aggregate to this Hangingstone Project. The off-site services could not have been provided on site. The evidence is there were other gravel pits around but certainly not on the Hangingstone site itself.

[31] I find that the test in *PTI Group Inc* is applicable in this case, and has been met. The two sites clearly have a common purpose: the construction of the Hangingstone Project site. The “work” performed is an integral part of the overall project.

PROOF OF CLAIM

(See attached for instructions)

IN THE MATTER OF THE CCAA PROCEEDINGS OF GLENOGLE ENERGY INC., GLENOGLE ENERGY LIMITED PARTNERSHIP AND 1651558 ALBERTA INC. (collectively, the "APPLICANTS", and individually, an "APPLICANT")

Regarding the Secured/Priority Claim or D&O Claim of
Bidell Gas Compression Ltd. (referred to in this form as "the Claimant").
(name of Claimant)

ONLY SUBMIT A PROOF OF CLAIM IF YOU HAVE A SECURED/PRIORITY CLAIM OR A D&O CLAIM (AS THOSE TERMS ARE DEFINED IN THE CLAIMS PROCEDURE ORDER).

THERE WILL BE NO DISTRIBUTION TO UNSECURED CREDITORS (UNLESS THEY HAVE A D&O CLAIM). UNSECURED CREDITORS (UNLESS THEY HAVE A D&O CLAIM) ARE NOT TO FILE A PROOF OF CLAIM.

All notices or correspondence regarding this claim to be forwarded to the Claimant at the following address:

c/o McLeod Law LLP 300, 14505 Bannister Road SE, Calgary, AB T2X 3J3

Attention: Shane B. King

Telephone Number: 403-254-3849

Facsimile Number: 403-271-1769

Attention (Contact Person): Shane B. King

Email Address: sking@mcleod-law.com

(All future correspondence will be delivered to the designated email address unless the Claimant specifically requests that hardcopies be provided)

☐ Please provide hardcopies of materials to the address above.

I, _____ (name of the Claimant or representative of the Claimant),
of _____ (City, Province or State) do hereby certify that:

I am the Claimant;

OR

I am Shane B. King, legal counsel (state position/title) of the Claimant.

I have knowledge of all the circumstances connected with the claim referred to in this form.

Check box the Applicant against whom you make this claim.

☒ Glenogle Energy Inc. ☐ 1651158 Alberta Ltd. ☐ Glenogle Energy LP ☐ Director / Officer

The Applicant or Applicants (check appropriate box(es) above) was or were, at May 14, 2020 and still is or are indebted to the Claimant in the sum of CDN\$ 527,990.20 (insert CDN dollar value of claim) as shown by the statement of account attached hereto and marked Schedule "A". Claims should not include the value of goods and/or services supplied or interest accrued after May 14, 2020. If a Claimant's claim is to be reduced by deducting any counterclaims to which the CCAA Applicant or Applicants is or are entitled and/or amounts associated with the return of equipment and/or assets by the CCAA Applicant or Applicants, please specify.

The statement of account must specify the evidence in support of the claim including the date and location of the delivery of all services and materials. Any claim for interest must be supported by contractual documentation evidencing the entitlement to interest.

☐ A. PRIORITY CLAIM OF \$ _____. That in respect of this claim, the Claimant does not hold and has not held any assets as security.

☒ B. SECURED CLAIM OF \$ 527,990.20. That in respect of this claim, the Claimant holds assets valued at \$ 527,990.20 as security, particulars of which are as follows:

Builder's Liens for services rendered with said liens registered on March 16, 2020 in the amount of \$394,237.68 and on May 26, 2020, in the amount of \$133,752.52, respectively.

Give full particulars of the security, including the date on which the security was given and the value at which the Claimant assesses the security together with the basis of valuation, and attach a copy of the security documents as Schedule "B".

☐ C. D&O CLAIM OF \$ _____. That in respect of this claim, the Claimant does not hold and has not held any assets as security.

Have you acquired this Claim by assignment? Yes ☐ No ☒
(if yes, attach documents evidencing assignment)

(if yes) Full Legal Name of original creditor(s): _____

DATED this 27th day of May, 2022

Bidell Gas Compression Ltd 6900 - 112th Avenue S.E, Calgary, AB T2C 4Z1 Ph (403) 235-5877 Fax (403) 272-7749

00405

BIDELL SERVICE TERMS AND CONDITIONS OF SALE

1. Quotation and Contract - The quotation from Bidell Gas Compression (hereinafter referred to as "Bidell"), is the document to which these terms and conditions are attached and apply. Other documents which are now or may be attached to or form part of the quotation, including addenda, specifications and drawings, and these terms and conditions, form an integral part of the quotation and resulting contract for the provision of parts or services to the Customer.

2. Conflicting Terms - These terms and conditions take priority over any conflicting terms of any contract or order issued, or other document forming part of the contract between the parties. No modifications of any order accepted by Bidell or these terms and conditions of sale shall be binding on Bidell unless specifically modified in writing and signed by an authorized representative of Bidell. All communications written and verbal, between the parties hereto with reference to the subject of the sale prior to the date of its acceptance are merged herein and this contract shall constitute the sole and entire agreement and contract between the parties as to the subject matter thereof.

3. Price - The final price for the sale of the goods or services shall be Bidell's quoted price as adjusted for any changes in scope or supply. The price is exclusive of all applicable Federal and Provincial custom tariffs, duties, sales taxes, value added taxes and other direct and similar taxes of every nature and kind whatsoever imposed. The risk of foreign currency exchange fluctuations in the cost of supplying parts shall be passed on to and assumed by the Customer.

4. Payment - Terms of payment shall be net cash within 30 days from the date of invoice, unless otherwise stated in the invoice. Invoices will be issued upon provision of service and/or upon each shipment of parts from the f.o.b. point. No holdbacks are applicable after delivery unless otherwise agreed to in writing by both parties. Payments not received by the due date shall be subject to interest at the prevailing rate on the outstanding balance until payment is received, plus any expenses incurred by Bidell in collecting overdue amounts.

5. Warranty - Bidell Service, warrants parts, rebuilt parts & service provided by Bidell to be free of defects in material or workmanship. This warranty is limited for a period of 90 days from the date of use or service, or 12 months from the date of shipment, whichever comes first.

5.1 Repair and Replacement - Bidell Parts and Service Warranty is limited to the repair or replacement of defective parts or components at Bidell's nearest repair facility. The warranty on replacement parts or services is limited in duration for a period of 90 days from the replacement date or the duration of the original warranty period, whichever is longer. Customer is responsible to pay for any transportation costs to and from a Bidell repair facility. Customer is also responsible to pay Bidell's out-of-pocket costs for transportation, lodging and subsistence, as well as additional and premium labour for any repairs taking place at other than Bidell repair facility and /or being performed outside of normal business hours.

5.2 Repairs Not Covered - This Warranty shall not apply to a rebuilt engine or power unit and any rebuilt parts used therein which in the opinion of Bidell have been damaged as a result of excessive loading, over or under speeding, heating, fire or abnormal combustion, ingestion of foreign materials, inadequate maintenance, misalignment, accident, improper installations, improper storage, improper use or any other condition or event not within the control of Bidell. Engine failures caused by REGROUND or CHROME PLATED crankshafts or failures caused by fatigue or outside force misalignment with other equipment are not covered by this Warranty. This Warranty does not obligate Bidell to provide "tune-up service" for any rebuilt engine or power unit.

5.3 Limited Warranty - The warranty provided herein by Bidell is the sole and exclusive warranty provided to the Customer and is in lieu of all other warranties, whether expressed or implied, including those found in the *Sale of Goods Act* (Alberta). Bidell is not responsible for any consequential, incidental, indirect or special damages whatsoever. In addition, Bidell shall not be liable for, including without limitation, lost revenues, downtime, diminished goodwill and damage to, or replacement of other equipment and property whether such damages are consequential, incidental, incidental, indirect or special, or otherwise. Bidell is not responsible for any punitive damages that may arise due to damage or loss.

5.4 Modifications and Repair by Others - Bidell shall not be responsible for modifications or repairs made by others unless Bidell authorizes such actions in writing prior to the time such modifications or repairs are made. Such modifications and repairs made by other than Bidell, shall, unless authorized by Bidell, void Bidell's Parts and Service Warranty on the equipment.

5.5 Claims - All warranty claims must be filed with Bidell in writing within thirty (30) days after the claim arises.

6. Security Interest - The parts shall remain the property of Bidell until the price is fully paid, and the Customer hereby grants to Bidell a security interest in the parts (and all proceeds thereof) to secure the Customer's obligation to pay for the parts. Until the price of the parts is paid in full, the Customer covenants: (a) to keep the parts (or any proceeds thereof) free and clear of all security interests, mortgages, charges, liens and other encumbrances except as hereafter approved in writing by Bidell prior to their creation or assumption; (b) to pay Bidell all reasonable costs and expenses incurred in connection with enforcing Bidell security interests in the parts, or any other remedies which Bidell is entitled to exercise, and (c) not to sell, lease or otherwise dispose of the parts or any proceeds thereof, without prior written consent of Bidell. The parts shall be entirely at the Customer's risk and will be insured by the Customer with all loss payable to Bidell between the date of notification of readiness for the delivery by Bidell, and the date of full payment. In the event of default of any payment, the unpaid balance of the price shall become due and payable immediately, and Bidell may enter the premises where the parts are located and repossess them without further demand, and may resell them notwithstanding that a part of the price may have been paid. In the event of any such default, Bidell will be entitled to exercise any additional rights and remedies available to it at law, or in equity, or under the *Personal Property Security Act* of Alberta, or otherwise arising. The Customer waives the benefit of any laws which restrict Bidell from exercising the remedies outlined herein and waives its right to receive a copy of a financing statement, financing charges statement, or a verification statement relating to the security interest granted herein.

7. Delivery and Completion - Delivery and completion dates in the quotation are approximate only and are subject to confirmation by Bidell within fifteen (15) days of time of order. Bidell may just delivery dates in its sole and unfettered discretion if, at any time during the currency of the contract, Bidell does not receive from the Customer in a timely fashion, all necessary information with respect to the parts or services. Upon notification of readiness to ship by Bidell, any delay of Customer accepting delivery shall cause storage charges for the Customer's account. If any parts are shipped in error, then Bidell's sole liability to Customer is to ship correct parts or materials to the original point of shipment as soon as such parts or material is available. This is Bidell's sole remedy for any shipment.

8. Substitutions and Additions - In the event that any drawings or specifications do not specify parts and/or specific services, Bidell shall be at liberty to utilize such materials and methods as it may deem advisable, consistent with reasonable industry practices. Any costs associated with additions, deletions or revisions to Bidell normal design required by local codes or their application or interpretation shall be for the Customer's account.

9. Intellectual Property - All right, title and interest in and to any intellectual property disclosed by, embedded in or necessary for the operation of the parts shall at all times remain with Bidell and its suppliers and Customer shall acquire no right whatsoever to all or any part of such intellectual property except the right to use same in connection with the operation of the parts.

10. Force Majeure - Failure on the part of Bidell to perform any contract of sale or deliver the service thereunder on or about the required date shall not constitute default, or give rise to claim for damages if caused by Force Majeure. Force Majeure includes acts of God, strikes, lockouts or other significant industrial disturbances, sabotage, fire, civil disturbances, explosions, breakage of or accidents to machinery, inability to obtain the necessary materials, parts or equipment, any legislative, administrative or judicial restrictions, road conditions, weather, or any other act, omission or event outside the control of Bidell, which could not have been prevented by the exercise of due diligence by Bidell. Bidell shall advise the Customer of any difficulty in performing under the contract by reason of Force Majeure and the parties shall agree to either cancel the contract as provided in Clause 10 or complete the contract with such adjustments as are reasonably compelled by the Force Majeure.

11. Cancellation and Delay - The contract shall not be subject to cancellation or delay by the Customer except with the written consent of Bidell. Customer's cancellation of contract is subject to a cancellation charge of 10% of the total price of the contract plus Bidell's actual expenses to which Bidell has become committed for fulfillment of the contract before notice of cancellation is received. In the event cancellation or delay is occasioned by the Customer, then the Customer shall indemnify and save harmless Bidell from all direct and indirect costs, losses, liabilities and commitments including loss of profit arising from the cancellation or delay.

12. Damages - Subject to the balance of the provisions of this clause, Bidell shall only be liable for the cost of replacement of any defective parts or services provided under this contract. Bidell shall not be liable to the Customer for any consequential, indirect or special damage whatsoever. In addition, Bidell shall not be liable for, including without limitation, loss of profits or revenue, loss of use of equipment and facilities, and claims by or payments to customers, suppliers or other parties who have a relationship with the Customer, whether such damages are consequential, indirect, special or otherwise. The disclaimer applies to consequential, indirect or special damages based on upon any cause of action whatever asserted against Bidell including causes of action arising out of any breach of warranty, express or implied, guarantee, product liability, negligence, tort, or any other cause pertaining to the performance or non-performance of this contract by Bidell. Bidell shall not be responsible for losses or damages arising out of the negligence of the Customer, its employees, agents or third party contractors. In no event will Bidell's maximum liability to the Customer in connection with this contract including without limitation resulting from breach of contract or any other performance or non-performance of this contract exceed the aggregate amount of the price paid to Bidell for the parts and services provided hereunder.

13. Applicable Laws and Forums - This contract shall be interpreted in accordance with and shall be governed by the laws of the Province of Alberta, and the parties agree that any disputes hereunder or with respect to this quotation or the resulting contract between the parties shall be determined exclusively by the Courts in the Province of Alberta and the parties hereby expressly attorn to the exclusive jurisdiction of the Courts in the Province of Alberta.

PRIVACY NOTICE: By requesting Bidell's products and services, or by supplying products and services to Bidell, you hereby consent to the collection, use and disclosure of your personal information for the purposes described in Bidell's External Privacy Policy including for the purpose of providing products and services described in this document. For further information, please refer to Bidell's External Privacy Policy, or contact Bidell's Privacy Office by phone at (403)235-5877.

Parts and Service Warranty Policy

Bidell Gas Compression warrants all workmanship for (3) months from time of repair on routine maintenance.

Bidell Gas Compression warrants all workmanship for (12) months from time of repair on all major overhauls whether completed in the field or in the shop.

Bidell Gas Compression warrants all new parts supplied by us to the extent of manufacturer's warranty against defects.

Customer Responsibilities

Engine must be maintained in accordance with published maintenance practices. Regular lube oil sampling must be performed and analyzed by a Bidell Gas Compression approved laboratory. Records of analysis must be made available to Bidell Gas Compression upon request. A Bidell Gas Compression representative must perform the initial 500-hour inspection.

Items not included

- All premiums, travel labour and truck kilometers.
- Any parts or components that were not fully inspected or replaced at time of overhaul and any machining or not-genuine replacement parts which were not approved by Bidell Gas Compression at time of overhaul.
- Performance complaints (including, but not limited to, lower power, poor fuel economy, etc.), unless caused by a failing or failed part.
- Fuel systems and final adjustments.
- Lubricating oil, coolant, filters, V-belts, hoses and other maintenance items replaced during any covered period unless such items are made unusable by a covered failure.
- Third party labour and expenses. Hiring of special cranes, hoists or other lifting devices to facilitate engine removal. Special transportation costs, (such as hotshot services, air freight, etc.)
- In no event will Bidell Gas Compression be responsible for consequential damages or loss of production as a result of a failure during a covered period.

BIDELL SERVICE TERMS AND CONDITIONS OF SALE

1. **Quotation and Contract** – The quotation from Bidell Gas Compression (hereinafter referred to as "Bidell"), is the document to which these terms and conditions are attached and apply. Other documents which are now or may be attached to or form part of the quotation, including addenda, specifications and drawings, and these terms and conditions, form an integral part of the quotation and resulting contract for the provision of parts or services to the Customer.

2. **Conflicting Terms** – These terms and conditions take priority over any conflicting terms of any contract or order issued, or other document forming part of the contract between the parties. No modifications of any order accepted by Bidell or these terms and conditions of sale shall be binding on Bidell unless specifically modified in writing and signed by an authorized representative of Bidell. All communications written and verbal, between the parties hereto with reference to the subject of the sale prior to the date of its acceptance are merged herein and this contract shall constitute the sole and entire agreement and contract between the parties as to the subject matter thereof.

3. **Price** – The final price for the sale of the goods or services shall be Bidell's quoted price as adjusted for any changes in scope or supply. The price is exclusive of all applicable Federal and Provincial custom tariffs, duties, sales taxes, value added taxes and other direct and similar taxes of every nature and kind whatsoever imposed. The risk of foreign currency exchange fluctuations in the cost of supplying parts shall be passed on to and assumed by the Customer.

4. **Payment** – Terms of payment shall be net cash within 30 days from the date of invoice, unless otherwise stated in the invoice. Invoices will be issued upon provision of service and/or upon each shipment of parts from the f.o.b. point. No holdbacks are applicable after delivery unless otherwise agreed to in writing by both parties. Payments not received by the due date shall be subject to interest at the prevailing rate on the outstanding balance until payment is received, plus any expenses incurred by Bidell in collecting overdue amounts.

5. **Warranty** – Bidell Service, warrants parts, rebuilt parts & service provided by Bidell to be free of defects in material or workmanship. This warranty is limited for a period of 90 days from the date of use or service, or 12 months from the date of shipment, whichever comes first.

5.1 **Repair and Replacement** – Bidell Parts and Service Warranty is limited to the repair or replacement of defective parts or components at Bidell's nearest repair facility. The warranty on replacement parts or services is limited in duration for a period of 90 days from the replacement date or the duration of the original warranty period, whichever is longer. Customer is responsible to pay for any transportation costs to and from a Bidell repair facility. Customer is also responsible to pay Bidell's out-of-pocket costs for transportation, lodging and subsistence, as well as additional and premium labour for any repairs taking place at other than Bidell repair facility and /or being performed outside of normal business hours.

5.2 **Repairs Not Covered** – This Warranty shall not apply to a rebuilt engine or power unit and any rebuilt parts used therein which in the opinion of Bidell have been damaged as a result of excessive loading, over or under speeding, heating, fire or abnormal combustion, ingestion of foreign materials, inadequate maintenance, misalignment, accident, improper installations, improper storage, improper use or any other condition or event not within the control of Bidell. Engine failures caused by REGROUND or CHROME PLATED crankshafts or failures caused by fatigue or outside force misalignment with other equipment are not covered by this Warranty. This Warranty does not obligate Bidell to provide "tune-up service" for any rebuilt engine or power unit.

5.3 **Limited Warranty** – The warranty provided herein by Bidell is the sole and exclusive warranty provided to the Customer and is in lieu of all other warranties, whether expressed or implied, including those found in the *Sale of Goods Act* (Alberta). Bidell is not responsible for any consequential, incidental, indirect or special damages whatsoever. In addition, Bidell shall not be liable for, including without limitation, lost revenues, downtime, diminished goodwill and damage to, or replacement of other equipment and property whether such damages are consequential, incidental, incidental, indirect or special, or otherwise. Bidell is not responsible for any punitive damages that may arise due to damage or loss.

5.4 **Modifications and Repair by Others** – Bidell shall not be responsible for modifications or repairs made by others unless Bidell authorizes such actions in writing prior to the time such modifications or repairs are made. Such modifications and repairs made by other than Bidell shall, unless authorized by Bidell, void Bidell's Parts and Service Warranty on the equipment.

5.5 **Claims** – All warranty claims must be filed with Bidell in writing within thirty (30) days after the claim arises.

6. **Security Interest** – The parts shall remain the property of Bidell until the price is fully paid, and the Customer hereby grants to Bidell a security interest in the parts (and all proceeds thereof) to secure the Customer's obligation to pay for the parts. Until the price of the parts is paid in full, the Customer covenants: (a) to keep the parts (or any proceeds thereof) free and clear of all security interests, mortgages, charges, liens and other encumbrances except as hereafter approved in writing by Bidell prior to their creation or assumption; (b) to pay Bidell all reasonable costs and expenses incurred in connection with enforcing Bidell security interests in the parts, or any other remedies which Bidell is entitled to exercise, and (c) not to sell, lease or otherwise dispose of the parts or any proceeds thereof, without prior written consent of Bidell. The parts shall be entirely at the Customer's risk and will be insured by the Customer with all loss payable to Bidell between the date of notification of readiness for the delivery by Bidell, and the date of full payment. In the event of default of any payment, the unpaid balance of the price shall become due and payable immediately, and Bidell may enter the premises where the parts are located and repossess them without further demand, and may resell them notwithstanding that a part of the price may have been paid. In the event of any such default, Bidell will be entitled to exercise any additional rights and remedies available to it at law, or in equity, or under the *Personal Property Security Act of Alberta*, or otherwise arising. The Customer waives the benefit of any laws which restrict Bidell from exercising the remedies outlined herein and waives its right to receive a copy of a financing statement, financing charges statement, or a verification statement relating to the security interest granted herein.

7. **Delivery and Completion** – Delivery and completion dates in the quotation are approximate only and are subject to confirmation by Bidell within fifteen (15) days of time of order. Bidell may adjust delivery dates in its sole and unfettered discretion if, at any time during the currency of the contract, Bidell does not receive from the Customer in a timely fashion, all necessary information with respect to the parts or services. Upon notification of readiness to ship by Bidell, any delay of Customer accepting delivery shall cause storage charges for the Customer's account. If any parts are shipped in error, then Bidell's sole liability to Customer is to ship correct parts or materials f.o.b. original point of shipment as soon as such parts or material is available. This is Bidell's sole remedy for any shipment.

8. **Substitutions and Additions** – In the event that any drawings or specifications do not specify parts and/or specific services, Bidell shall be at liberty to utilize such materials and methods as it may deem advisable, consistent with reasonable industry practices. Any costs associated with additions, deletions or revisions to Bidell normal design required by local codes or their application or interpretation shall be for the Customer's account.

9. **Intellectual Property** – All right, title and interest in and to any intellectual property disclosed by, embedded in or necessary for the operation of the parts shall at all times remain with Bidell and its suppliers and Customer shall acquire no right whatsoever to all or any part of such intellectual property except the right to use same in connection with the operation of the parts.

10. **Force Majeure** – Failure on the part of Bidell to perform any contract of sale or deliver the service thereunder on or about the required date shall not constitute default, or give rise to claim for damages if caused by Force Majeure. Force Majeure includes acts of God, strikes, lockouts or other significant industrial disturbances, sabotage, fire, civil disturbances, explosions, breakage of or accidents to machinery, inability to obtain the necessary materials, parts or equipment, any legislative, administrative or judicial restrictions, road conditions, weather, or any other act, omission or event outside the control of Bidell, which could not have been prevented by the exercise of due diligence by Bidell. Bidell shall advise the Customer of any difficulty in performing under the contract by reason of Force Majeure and the parties shall agree to either cancel the contract as provided in Clause 10 or complete the contract with such adjustments as are reasonably compelled by the Force Majeure.

11. **Cancellation and Delay** – The contract shall not be subject to cancellation or delay by the Customer except with the written consent of Bidell. Customer's cancellation of contract is subject to a cancellation charge of 10% of the total price of the contract plus Bidell's actual expenses to which Bidell has become committed for fulfillment of the contract before notice of cancellation is received. In the event cancellation or delay is occasioned by the Customer, then the Customer shall indemnify and save harmless Bidell from all direct and indirect costs, losses, liabilities and commitments including loss of profit arising from the cancellation or delay.

12. **Damages** – Subject to the balance of the provisions of this clause, Bidell shall only be liable for the cost of replacement of any defective parts or services provided under this contract. Bidell shall not be liable to the Customer for any consequential, indirect or special damage whatsoever. In addition, Bidell shall not be liable for, including without limitation, loss of profits or revenue, loss of use of equipment and facilities, and claims by or payments to customers, suppliers or other parties who have a relationship with the Customer, whether such damages are consequential, indirect, special or otherwise. The disclaimer applies to consequential, indirect or special damages based on upon any cause of action whatever asserted against Bidell including causes of action arising out of any breach of warranty, express or implied, guarantee, product liability, negligence, tort, or any other cause pertaining to the performance or non-performance of this contract by Bidell. Bidell shall not be responsible for losses or damages arising out of the negligence of the Customer, its employees, agents or third party contractors. In no event will Bidell's maximum liability to the Customer in connection with this contract including without limitation resulting from breach of contract or any other performance or non-performance of this contract exceed the aggregate amount of the price paid to Bidell for the parts and services provided hereunder.

13. **Applicable Laws and Forums** – This contract shall be interpreted in accordance with and shall be governed by the laws of the *Province of Alberta*, and the parties agree that any disputes hereunder or with respect to this quotation or the resulting contract between the parties shall be determined exclusively by the Courts in the Province of Alberta and the parties hereby expressly attorn to the exclusive jurisdiction of the Courts in the Province of Alberta.

PRIVACY NOTICE: By requesting Bidell's products and services, or by supplying products and services to Bidell, you hereby consent to the collection, use and disclosure of your personal information for the purposes described in Bidell's External Privacy Policy including for the purpose of providing products and services described in this document. For further information, please refer to Bidell's External Privacy Policy, or contact Bidell's Privacy Office by phone at (403)235-5877.

Parts and Service Warranty Policy

Bidell Gas Compression warrants all workmanship for (3) months from time of repair on routine maintenance.

Bidell Gas Compression warrants all workmanship for (12) months from time of repair on all major overhauls whether completed in the field or in the shop.

Bidell Gas Compression warrants all new parts supplied by us to the extent of manufacturer's warranty against defects.

Customer Responsibilities

Engine must be maintained in accordance with published maintenance practices. Regular lube oil sampling must be performed and analyzed by a Bidell Gas Compression approved laboratory. Records of analysis must be made available to Bidell Gas Compression upon request. A Bidell Gas Compression representative must perform the initial 500-hour inspection.

Items not included

- All premiums, travel labour and truck kilometers.
- Any parts of components that were not fully inspected or replaced at time of overhaul and any machining or not-genuine replacement parts which were not approved by Bidell Gas Compression at time of overhaul.
- Performance complaints (including, but not limited to, lower power, poor fuel economy, etc.), unless caused by a failing or failed part.
- Fuel systems and final adjustments.
- Lubricating oil, coolant, filters, V-belts, hoses and other maintenance items replaced during any covered period unless such items are made unusable by a covered failure.
- Third party labour and expenses. Hiring of special cranes, hoists or other lifting devices to facilitate engine removal. Special transportation costs, (such as hotshot services, air freight, etc.)
- In no event will Bidell Gas Compression be responsible for consequential damages or loss of production as a result of a failure during a covered period.

BIDELL SERVICE TERMS AND CONDITIONS OF SALE

1. **Quotation and Contract** – The quotation from Bidell Gas Compression (hereinafter referred to as "Bidell"), is the document to which these terms and conditions are attached and apply. Other documents which are now or may be attached to or form part of the quotation, including addenda, specifications and drawings, and these terms and conditions, form an integral part of the quotation and resulting contract for the provision of parts or services to the Customer.
2. **Conflicting Terms** – These terms and conditions take priority over any conflicting terms of any contract or order issued, or other document forming part of the contract between the parties. No modifications of any order accepted by Bidell or these terms and conditions of sale shall be binding on Bidell unless specifically modified in writing and signed by an authorized representative of Bidell. All communications written and verbal, between the parties hereto with reference to the subject of the sale prior to the date of its acceptance are merged herein and this contract shall constitute the sole and entire agreement and contract between the parties as to the subject matter thereof.
3. **Price** – The final price for the sale of the goods or services shall be Bidell's quoted price as adjusted for any changes in scope or supply. The price is exclusive of all applicable Federal and Provincial custom tariffs, duties, sales taxes, value added taxes and other direct and similar taxes of every nature and kind whatsoever imposed. The risk of foreign currency exchange fluctuations in the cost of supplying parts shall be passed on to and assumed by the Customer.
4. **Payment** – Terms of payment shall be net cash within 30 days from the date of invoice, unless otherwise stated in the invoice. Invoices will be issued upon provision of service and/or upon each shipment of parts from the f.o.b. point. No holdbacks are applicable after delivery unless otherwise agreed to in writing by both parties. Payments not received by the due date shall be subject to interest at the prevailing rate on the outstanding balance until payment is received, plus any expenses incurred by Bidell in collecting overdue amounts.
5. **Warranty** – Bidell Service, warrants parts, rebuilt parts & service provided by Bidell to be free of defects in material or workmanship. This warranty is limited for a period of 90 days from the date of use or service, or 12 months from the date of shipment, whichever comes first.
 - 5.1 **Repair and Replacement** – Bidell Parts and Service Warranty is limited to the repair or replacement of defective parts or components at Bidell's nearest repair facility. The warranty on replacement parts or services is limited in duration for a period of 90 days from the replacement date or the duration of the original warranty period, whichever is longer. Customer is responsible to pay for any transportation costs to and from a Bidell repair facility. Customer is also responsible to pay Bidell's out-of-pocket costs for transportation, lodging and subsistence, as well as additional and premium labour for any repairs taking place at other than Bidell repair facility and /or being performed outside of normal business hours.
 - 5.2 **Repairs Not Covered** – This Warranty shall not apply to a rebuilt engine or power unit and any rebuilt parts used therein which in the opinion of Bidell have been damaged as a result of excessive loading, over or under speeding, heating, fire or abnormal combustion, ingestion of foreign materials, inadequate maintenance, misalignment, accident, improper installations, improper storage, improper use or any other condition or event not within the control of Bidell. Engine failures caused by REGROUND or CHROME PLATED crankshafts or failures caused by fatigue or outside force misalignment with other equipment are not covered by this Warranty. This Warranty does not obligate Bidell to provide "tune-up service" for any rebuilt engine or power unit.
 - 5.3 **Limited Warranty** – The warranty provided herein by Bidell is the sole and exclusive warranty provided to the Customer and is in lieu of all other warranties, whether expressed or implied, including those found in the *Sale of Goods Act* (Alberta). Bidell is not responsible for any consequential, incidental, indirect or special damages whatsoever. In addition, Bidell shall not be liable for, including without limitation, lost revenues, downtime, diminished goodwill and damage to, or replacement of other equipment and property whether such damages are consequential, incidental, incidental, indirect or special, or otherwise. Bidell is not responsible for any punitive damages that may arise due to damage or loss.
 - 5.4 **Modifications and Repair by Others** – Bidell shall not be responsible for modifications or repairs made by others unless Bidell authorizes such actions in writing prior to the time such modifications or repairs are made. Such modifications and repairs made by other than Bidell shall, unless authorized by Bidell, void Bidell's Parts and Service Warranty on the equipment.
 - 5.5 **Claims** – All warranty claims must be filed with Bidell in writing within thirty (30) days after the claim arises.
6. **Security Interest** – The parts shall remain the property of Bidell until the price is fully paid, and the Customer hereby grants to Bidell a security interest in the parts (and all proceeds thereof) to secure the Customer's obligation to pay for the parts. Until the price of the parts is paid in full, the Customer covenants: (a) to keep the parts (or any proceeds thereof) free and clear of all security interests, mortgages, charges, liens and other encumbrances except as hereafter approved in writing by Bidell prior to their creation or assumption; (b) to pay Bidell all reasonable costs and expenses incurred in connection with enforcing Bidell security interests in the parts, or any other remedies which Bidell is entitled to exercise, and (c) not to sell, lease or otherwise dispose of the parts or any proceeds thereof, without prior written consent of Bidell. The parts shall be entirely at the Customer's risk and will be insured by the Customer with all loss payable to Bidell between the date of notification of readiness for the delivery by Bidell, and the date of full payment. In the event of default of any payment, the unpaid balance of the price shall become due and payable immediately, and Bidell may enter the premises where the parts are located and repossess them without further demand, and may resell them notwithstanding that a part of the price may have been paid. In the event of any such default, Bidell will be entitled to exercise any additional rights and remedies available to it at law, or in equity, or under the *Personal Property Security Act of Alberta*, or otherwise arising. The Customer waives the benefit of any laws which restrict Bidell from exercising the remedies outlined herein and waives its right to receive a copy of a financing statement, financing charges statement, or a verification statement relating to the security interest granted herein.
7. **Delivery and Completion** – Delivery and completion dates in the quotation are approximate only and are subject to confirmation by Bidell within fifteen (15) days of time of order. Bidell may adjust delivery dates in its sole and unfettered discretion if, at any time during the currency of the contract, Bidell does not receive from the Customer in a timely fashion, all necessary information with respect to the parts or services. Upon notification of readiness to ship by Bidell, any delay of Customer accepting delivery shall cause storage charges for the Customer's account. If any parts are shipped in error, then Bidell's sole liability to Customer is to ship correct parts or materials f.o.b. original point of shipment as soon as such parts or material is available. This is Bidell's sole remedy for any shipment.

8. **Substitutions and Additions** – In the event that any drawings or specifications do not specify parts and/or specific services, Bidell shall be at liberty to utilize such materials and methods as it may deem advisable, consistent with reasonable industry practices. Any costs associated with additions, deletions or revisions to Bidell normal design required by local codes or their application or interpretation shall be for the Customer's account.
9. **Intellectual Property** – All right, title and interest in and to any intellectual property disclosed by, embedded in or necessary for the operation of the parts shall at all times remain with Bidell and its suppliers and Customer shall acquire no right whatsoever to all or any part of such intellectual property except the right to use same in connection with the operation of the parts.
10. **Force Majeure** – Failure on the part of Bidell to perform any contract of sale or deliver the service thereunder on or about the required date shall not constitute default, or give rise to claim for damages if caused by Force Majeure. Force Majeure includes acts of God, strikes, lockouts or other significant industrial disturbances, sabotage, fire, civil disturbances, explosions, breakage of or accidents to machinery, inability to obtain the necessary materials, parts or equipment, any legislative, administrative or judicial restrictions, road conditions, weather, or any other act, omission or event outside the control of Bidell, which could not have been prevented by the exercise of due diligence by Bidell. Bidell shall advise the Customer of any difficulty in performing under the contract by reason of Force Majeure and the parties shall agree to either cancel the contract as provided in Clause 10 or complete the contract with such adjustments as are reasonably compelled by the Force Majeure.
11. **Cancellation and Delay** – The contract shall not be subject to cancellation or delay by the Customer except with the written consent of Bidell. Customer's cancellation of contract is subject to a cancellation charge of 10% of the total price of the contract plus Bidell's actual expenses to which Bidell has become committed for fulfillment of the contract before notice of cancellation is received. In the event cancellation or delay is occasioned by the Customer, then the Customer shall indemnify and save harmless Bidell from all direct and indirect costs, losses, liabilities and commitments including loss of profit arising from the cancellation or delay.
12. **Damages** – Subject to the balance of the provisions of this clause, Bidell shall only be liable for the cost of replacement of any defective parts or services provided under this contract. Bidell shall not be liable to the Customer for any consequential, indirect or special damage whatsoever. In addition, Bidell shall not be liable for, including without limitation, loss of profits or revenue, loss of use of equipment and facilities, and claims by or payments to customers, suppliers or other parties who have a relationship with the Customer, whether such damages are consequential, indirect, special or otherwise. The disclaimer applies to consequential, indirect or special damages based on upon any cause of action whatever asserted against Bidell including causes of action arising out of any breach of warranty, express or applied, guarantee, product liability, negligence, tort, or any other cause pertaining to the performance or non-performance of this contract by Bidell. Bidell shall not be responsible for losses or damages arising out of the negligence of the Customer, its employees, agents or third party contractors. In no event will Bidell's maximum liability to the Customer in connection with this contract including without limitation resulting from breach of contract or any other performance or non-performance of this contract exceed the aggregate amount of the price paid to Bidell for the parts and services provided hereunder.
13. **Applicable Laws and Forums** – This contract shall be interpreted in accordance with and shall be governed by the laws of the *Province of Alberta*, and the parties agree that any disputes hereunder or with respect to this quotation or the resulting contract between the parties shall be determined exclusively by the Courts in the Province of Alberta and the parties hereby expressly attorn to the exclusive jurisdiction of the Courts in the Province of Alberta.

PRIVACY NOTICE: By requesting Bidell's products and services, or by supplying products and services to Bidell, you hereby consent to the collection, use and disclosure of your personal information for the purposes described in Bidell's External Privacy Policy including for the purpose of providing products and services described in this document. For further information, please refer to Bidell's External Privacy Policy, or contact Bidell's Privacy Office by phone at (403)235-5877.

Parts and Service Warranty Policy

Bidell Gas Compression warrants all workmanship for (3) months from time of repair on routine maintenance.

Bidell Gas Compression warrants all workmanship for (12) months from time of repair on all major overhauls whether completed in the field or in the shop.

Bidell Gas Compression warrants all new parts supplied by us to the extent of manufacturer's warranty against defects.

Customer Responsibilities

Engine must be maintained in accordance with published maintenance practices. Regular lube oil sampling must be performed and analyzed by a Bidell Gas Compression approved laboratory. Records of analysis must be made available to Bidell Gas Compression upon request. A Bidell Gas Compression representative must perform the initial 500-hour inspection.

Items not included

- All premiums, travel labour and truck kilometers.
- Any parts of components that were not fully inspected or replaced at time of overhaul and any machining or not-genuine replacement parts which were not approved by Bidell Gas Compression at time of overhaul.
- Performance complaints (including, but not limited to, lower power, poor fuel economy, etc.), unless caused by a failing or failed part.
- Fuel systems and final adjustments.
- Lubricating oil, coolant, filters, V-belts, hoses and other maintenance items replaced during any covered period unless such items are made unusable by a covered failure.
- Third party labour and expenses. Hiring of special cranes, hoists or other lifting devices to facilitate engine removal. Special transportation costs, (such as hotshot services, air freight, etc.)
- In no event will Bidell Gas Compression be responsible for consequential damages or loss of production as a result of a failure during a covered period.

BIDELL SERVICE TERMS AND CONDITIONS OF SALE

1. Quotation and Contract – The quotation from Bidell Gas Compression (hereinafter referred to as “Bidell”), is the document to which these terms and conditions are attached and apply. Other documents which are now or may be attached to or form part of the quotation, including addenda, specifications and drawings, and these terms and conditions, form an integral part of the quotation and resulting contract for the provision of parts or services to the Customer.

2. Conflicting Terms – These terms and conditions take priority over any conflicting terms of any contract or order issued, or other document forming part of the contract between the parties. No modifications of any order accepted by Bidell or these terms and conditions of sale shall be binding on Bidell unless specifically modified in writing and signed by an authorized representative of Bidell. All communications written and verbal, between the parties hereto with reference to the subject of the sale prior to the date of its acceptance are merged herein and this contract shall constitute the sole and entire agreement and contract between the parties as to the subject matter thereof.

3. Price – The final price for the sale of the goods or services shall be Bidell’s quoted price as adjusted for any changes in scope or supply. The price is exclusive of all applicable Federal and Provincial custom tariffs, duties, sales taxes, value added taxes and other direct and similar taxes of every nature and kind whatsoever imposed. The risk of foreign currency exchange fluctuations in the cost of supplying parts shall be passed on to and assumed by the Customer.

4. Payment – Terms of payment shall be net cash within 30 days from the date of invoice, unless otherwise stated in the Invoice. Invoices will be issued upon provision of service and/or upon each shipment of parts from the f.o.b. point. No holdbacks are applicable after delivery unless otherwise agreed to in writing by both parties. Payments not received by the due date shall be subject to interest at the prevailing rate on the outstanding balance until payment is received, plus any expenses incurred by Bidell in collecting overdue amounts.

5. Warranty – Bidell Service, warrants parts, rebuilt parts & service provided by Bidell to be free of defects in material or workmanship. This warranty is limited for a period of 90 days from the date of use or service, or 12 months from the date of shipment, whichever comes first.

5.1 Repair and Replacement – Bidell Parts and Service Warranty is limited to the repair or replacement of defective parts or components at Bidell’s nearest repair facility. The warranty on replacement parts or services is limited in duration for a period of 90 days from the replacement date or the duration of the original warranty period, whichever is longer. Customer is responsible to pay for any transportation costs to and from a Bidell repair facility. Customer is also responsible to pay Bidell’s out-of-pocket costs for transportation, lodging and subsistence, as well as additional and premium labour for any repairs taking place at other than Bidell repair facility and /or being performed outside of normal business hours.

5.2 Repairs Not Covered – This Warranty shall not apply to a rebuilt engine or power unit and any rebuilt parts used therein which in the opinion of Bidell have been damaged as a result of excessive loading, over or under speeding, heating, fire or abnormal combustion, ingestion of foreign materials, inadequate maintenance, misalignment, accident, improper installations, improper storage, improper use or any other condition or event not within the control of Bidell. Engine failures caused by REGROUND or CHROME PLATED crankshafts or failures caused by fatigue or outside force misalignment with other equipment are not covered by this Warranty. This Warranty does not obligate Bidell to provide “tune-up service” for any rebuilt engine or power unit.

5.3 Limited Warranty – The warranty provided herein by Bidell is the sole and exclusive warranty provided to the Customer and is in lieu of all other warranties, whether expressed or implied, including those found in the *Sale of Goods Act* (Alberta). Bidell is not responsible for any consequential, incidental, indirect or special damages whatsoever. In addition, Bidell shall not be liable for, including without limitation, lost revenues, downtime, diminished goodwill and damage to, or replacement of other equipment and property whether such damages are consequential, incidental, incidental, indirect or special, or otherwise. Bidell is not responsible for any punitive damages that may arise due to damage or loss.

5.4 Modifications and Repair by Others – Bidell shall not be responsible for modifications or repairs made by others unless Bidell authorizes such actions in writing prior to the time such modifications or repairs are made. Such modifications and repairs made by other than Bidell shall, unless authorized by Bidell, void Bidell’s Parts and Service Warranty on the equipment.

5.5 Claims – All warranty claims must be filed with Bidell in writing within thirty (30) days after the claim arises.

6. Security Interest – The parts shall remain the property of Bidell until the price is fully paid, and the Customer hereby grants to Bidell a security interest in the parts (and all proceeds thereof) to secure the Customer’s obligation to pay for the parts. Until the price of the parts is paid in full, the Customer covenants: (a) to keep the parts (or any proceeds thereof) free and clear of all security interests, mortgages, charges, liens and other encumbrances except as hereafter approved in writing by Bidell prior to their creation or assumption; (b) to pay Bidell all reasonable costs and expenses incurred in connection with enforcing Bidell security interests in the parts, or any other remedies which Bidell is entitled to exercise, and (c) not to sell, lease or otherwise dispose of the parts or any proceeds thereof, without prior written consent of Bidell. The parts shall be entirely at the Customer’s risk and will be insured by the Customer with all loss payable to Bidell between the date of notification of readiness for the delivery by Bidell, and the date of full payment. In the event of default of any payment, the unpaid balance of the price shall become due and payable immediately, and Bidell may enter the premises where the parts are located and repossess them without further demand, and may resell them notwithstanding that a part of the price may have been paid. In the event of any such default, Bidell will be entitled to exercise any additional rights and remedies available to it at law, or in equity, or under the *Personal Property Security Act of Alberta*, or otherwise arising. The Customer waives the benefit of any laws which restrict Bidell from exercising the remedies

outlined herein and waives its right to receive a copy of a financing statement, financing charges statement, or a verification statement relating to the security interest granted herein.

7. Delivery and Completion – Delivery and completion dates in the quotation are approximate only and are subject to confirmation by Bidell within fifteen (15) days of time of order. Bidell may adjust delivery dates in its sole and unfettered discretion if, at any time during the currency of the contract, Bidell does not receive from the Customer in a timely fashion, all necessary information with respect to the parts or services. Upon notification of readiness to ship by Bidell, any delay of Customer accepting delivery shall cause storage charges for the Customer’s account. If any parts are shipped in error, then Bidell’s sole liability to Customer is to ship correct parts or materials f.o.b. original point of shipment as soon as such parts or material is available. This is Bidell’s sole remedy for any shipment.

8. Substitutions – In the event that any drawings or specifications do not specify parts and/or specific services, Bidell shall be at liberty to utilize such materials and methods as it may deem advisable, consistent with reasonable industry practices. Any costs associated with additions, deletions or revisions to Bidell normal design required by local codes or their application or interpretation shall be for the Customer’s account.

9. Intellectual Property – All right, title and interest in and to any intellectual property disclosed by, embedded in or necessary for the operation of the parts shall at all times remain with Bidell and its suppliers and Customer shall acquire no right whatsoever to all or any part of such intellectual property except the right to use same in connection with the operation of the parts.

10. Force Majeure – Failure on the part of Bidell to perform any contract of sale or deliver the service thereunder on or about the required date shall not constitute default, or give rise to claim for damages if caused by Force Majeure. Force Majeure includes acts of God, strikes, lockouts or other significant industrial disturbances, sabotage, fire, civil disturbances, explosions, breakage of or accidents to machinery, inability to obtain the necessary materials, parts or equipment, any legislative, administrative or judicial restrictions, road conditions, weather, or any other act, omission or event outside the control of Bidell, which could not have been prevented by the exercise of due diligence by Bidell. Bidell shall advise the Customer of any difficulty in performing under the contract by reason of Force Majeure and the parties shall agree to either cancel the contract as provided in Clause 10 or complete the contract with such adjustments as are reasonably compelled by the Force Majeure.

11. Cancellation and Delay – The contract shall not be subject to cancellation or delay by the Customer except with the written consent of Bidell. Customer’s cancellation of contract is subject to a cancellation charge of 10% of the total price of the contract plus Bidell’s actual expenses to which Bidell has become committed for fulfillment of the contract before notice of cancellation is received. In the event cancellation or delay is occasioned by the Customer, then the Customer shall indemnify and save harmless Bidell from all direct and indirect costs, losses, liabilities and commitments including loss of profit arising from the cancellation or delay.

12. Damages – Subject to the balance of the provisions of this clause, Bidell shall only be liable for the cost of replacement of any defective parts or services provided under this contract. Bidell shall not be liable to the Customer for any consequential, indirect or special damage whatsoever. In addition, Bidell shall not be liable for, including without limitation, loss of profits or revenue, loss of use of equipment and facilities, and claims by or payments to customers, suppliers or other parties who have a relationship with the Customer, whether such damages are consequential, indirect, special or otherwise. The disclaimer applies to consequential, indirect or special damages based on upon any cause of action whatever asserted against Bidell including causes of action arising out of any breach of warranty, express or applied, guarantee, product liability, negligence, tort, or any other cause pertaining to the performance or non-performance of this contract by Bidell. Bidell shall not be responsible for losses or damages arising out of the negligence of the Customer, its employees, agents or third party contractors. In no event will Bidell’s maximum liability to the Customer in connection with this contract including without limitation resulting from breach of contract or any other performance or non-performance of this contract exceed the aggregate amount of the price paid to Bidell for the parts and services provided hereunder.

13. Applicable Laws and Forums – This contract shall be interpreted in accordance with and shall be governed by the laws of the *Province of Alberta*, and the parties agree that any disputes hereunder or with respect to this quotation or the resulting contract between the parties shall be determined exclusively by the Courts in the Province of Alberta and the parties hereby expressly attorn to the exclusive jurisdiction of the Courts in the Province of Alberta.

PRIVACY NOTICE: By requesting Bidell’s products and services, or by supplying products and services to Bidell, you hereby consent to the collection, use and disclosure of your personal information for the purposes described in Bidell’s External Privacy Policy including for the purpose of providing products and services described in this document. For further information, please refer to Bidell’s External Privacy Policy, or contact Bidell’s Privacy Office by phone at (403)235-5877.

Parts and Service Warranty Policy

Bidell Gas Compression warrants all workmanship for (3) months from time of repair on routine maintenance.

Bidell Gas Compression warrants all workmanship for (12) months from time of repair on all major overhauls whether completed in the field or in the shop.

Bidell Gas Compression warrants all new parts supplied by us to the extent of manufacturer's warranty against defects.

Customer Responsibilities

Engine must be maintained in accordance with published maintenance practices. Regular lube oil sampling must be performed and analyzed by a Bidell Gas Compression approved laboratory. Records of analysis must be made available to Bidell Gas Compression upon request. A Bidell Gas Compression representative must perform the initial 500-hour inspection.

Items not included

- All premiums, travel labour and truck kilometers.
- Any parts or components that were not fully inspected or replaced at time of overhaul and any machining or not-genuine replacement parts which were not approved by Bidell Gas Compression at time of overhaul.
- Performance complaints (including, but not limited to, lower power, poor fuel economy, etc.), unless caused by a failing or failed part.
- Fuel systems and final adjustments.
- Lubricating oil, coolant, filters, V-belts, hoses and other maintenance items replaced during any covered period unless such items are made unusable by a covered failure.
- Third party labour and expenses. Hiring of special cranes, hoists or other lifting devices to facilitate engine removal. Special transportation costs, (such as hotshot services, air freight, etc.)
- In no event will Bidell Gas Compression be responsible for consequential damages or loss of production as a result of a failure during a covered period.

BIDELL SERVICE TERMS AND CONDITIONS OF SALE

1. Quotation and Contract – The quotation from Bidell Gas Compression (hereinafter referred to as “Bidell”), is the document to which these terms and conditions are attached and apply. Other documents which are now or may be attached to or form part of the quotation, including addenda, specifications and drawings, and these terms and conditions, form an integral part of the quotation and resulting contract for the provision of parts or services to the Customer.

2. Conflicting Terms – These terms and conditions take priority over any conflicting terms of any contract or order issued, or other document forming part of the contract between the parties. No modifications of any order accepted by Bidell or these terms and conditions of sale shall be binding on Bidell unless specifically modified in writing and signed by an authorized representative of Bidell. All communications written and verbal, between the parties hereto with reference to the subject of the sale prior to the date of its acceptance are merged herein and this contract shall constitute the sole and entire agreement and contract between the parties as to the subject matter thereof.

3. Price – The final price for the sale of the goods or services shall be Bidell's quoted price as adjusted for any changes in scope or supply. The price is exclusive of all applicable Federal and Provincial custom tariffs, duties, sales taxes, value added taxes and other direct and similar taxes of every nature and kind whatsoever imposed. The risk of foreign currency exchange fluctuations in the cost of supplying parts shall be passed on to and assumed by the Customer.

4. Payment – Terms of payment shall be net cash within 30 days from the date of invoice, unless otherwise stated in the invoice. Invoices will be issued upon provision of service and/or upon each shipment of parts from the f.o.b. point. No holdbacks are applicable after delivery unless otherwise agreed to in writing by both parties. Payments not received by the due date shall be subject to interest at the prevailing rate on the outstanding balance until payment is received, plus any expenses incurred by Bidell in collecting overdue amounts.

5. Warranty – Bidell Service, warrants parts, rebuilt parts & service provided by Bidell to be free of defects in material or workmanship. This warranty is limited for a period of 90 days from the date of use or service, or 12 months from the date of shipment, whichever comes first.

5.1 Repair and Replacement – Bidell Parts and Service Warranty is limited to the repair or replacement of defective parts or components at Bidell's nearest repair facility. The warranty on replacement parts or services is limited in duration for a period of 90 days from the replacement date or the duration of the original warranty period, whichever is longer. Customer is responsible to pay for any transportation costs to and from a Bidell repair facility. Customer is also responsible to pay Bidell's out-of-pocket costs for transportation, lodging and subsistence, as well as additional and premium labour for any repairs taking place at other than Bidell repair facility and /or being performed outside of normal business hours.

5.2 Repairs Not Covered – This Warranty shall not apply to a rebuilt engine or power unit and any rebuilt parts used therein which in the opinion of Bidell have been damaged as a result of excessive loading, over or under speeding, heating, fire or abnormal combustion, ingestion of foreign materials, inadequate maintenance, misalignment, accident, improper installations, improper storage, improper use or any other condition or event not within the control of Bidell. Engine failures caused by REGROUND or CHROME PLATED crankshafts or failures caused by fatigue or outside force misalignment with other equipment are not covered by this Warranty. This Warranty does not obligate Bidell to provide “tune-up service” for any rebuilt engine or power unit.

5.3 Limited Warranty – The warranty provided herein by Bidell is the sole and exclusive warranty provided to the Customer and is in lieu of all other warranties, whether expressed or implied, including those found in the *Sale of Goods Act* (Alberta). Bidell is not responsible for any consequential, incidental, indirect or special damages whatsoever. In addition, Bidell shall not be liable for, including without limitation, lost revenues, downtime, diminished goodwill and damage to, or replacement of other equipment and property whether such damages are consequential, incidental, incidental, indirect or special, or otherwise. Bidell is not responsible for any punitive damages that may arise due to damage or loss.

5.4 Modifications and Repair by Others – Bidell shall not be responsible for modifications or repairs made by others unless Bidell authorizes such actions in writing prior to the time such modifications or repairs are made. Such modifications and repairs made by other than Bidell shall, unless authorized by Bidell, void Bidell's Parts and Service Warranty on the equipment.

5.5 Claims – All warranty claims must be filed with Bidell in writing within thirty (30) days after the claim arises.

6. Security Interest – The parts shall remain the property of Bidell until the price is fully paid, and the Customer hereby grants to Bidell a security interest in the parts (and all proceeds thereof) to secure the Customer's obligation to pay for the parts. Until the price of the parts is paid in full, the Customer covenants: (a) to keep the parts (or any proceeds thereof) free and clear of all security interests, mortgages, charges, liens and other encumbrances except as hereafter approved in writing by Bidell prior to their creation or assumption; (b) to pay Bidell all reasonable costs and expenses incurred in connection with enforcing Bidell security interests in the parts, or any other remedies which Bidell is entitled to exercise, and (c) not to sell, lease or otherwise dispose of the parts or any proceeds thereof, without prior written consent of Bidell. The parts shall be entirely at the Customer's risk and will be insured by the Customer with all loss payable to Bidell between the date of notification of readiness for the delivery by Bidell, and the date of full payment. In the event of default of any payment, the unpaid balance of the price shall become due and payable immediately, and Bidell may enter the premises where the parts are located and repossess them without further demand, and may resell them notwithstanding that a part of the price may have been paid. In the event of any such default, Bidell will be entitled to exercise any additional rights and remedies available to it at law, or in equity, or under the *Personal Property Security Act of Alberta*, or otherwise arising. The Customer waives the benefit of any laws which restrict Bidell from exercising the remedies

outlined herein and waives its right to receive a copy of a financing statement, financing charges statement, or a verification statement relating to the security interest granted herein.

7. Delivery and Completion – Delivery and completion dates in the quotation are approximate only and are subject to confirmation by Bidell within fifteen (15) days of time of order. Bidell may adjust delivery dates in its sole and unfettered discretion if, at any time during the currency of the contract, Bidell does not receive from the Customer in a timely fashion, all necessary information with respect to the parts or services. Upon notification of readiness to ship by Bidell, any delay of Customer accepting delivery shall cause storage charges for the Customer's account. If any parts are shipped in error, then Bidell's sole liability to Customer is to ship correct parts or materials f.o.b. original point of shipment as soon as such parts or material is available. This is Bidell's sole remedy for any shipment.

8. Substitutions and Additions – In the event that any drawings or specifications do not specify parts and/or specific services, Bidell shall be at liberty to utilize such materials and methods as it may deem advisable, consistent with reasonable industry practices. Any costs associated with additions, deletions or revisions to Bidell normal design required by local codes or their application or interpretation shall be for the Customer's account.

9. Intellectual Property – All right, title and interest in and to any intellectual property disclosed by, embedded in or necessary for the operation of the parts shall at all times remain with Bidell and its suppliers and Customer shall acquire no right whatsoever to all or any part of such intellectual property except the right to use same in connection with the operation of the parts.

10. Force Majeure – Failure on the part of Bidell to perform any contract of sale or deliver the service thereunder on or about the required date shall not constitute default, or give rise to claim for damages if caused by Force Majeure. Force Majeure includes acts of God, strikes, lockouts or other significant industrial disturbances, sabotage, fire, civil disturbances, explosions, breakage of or accidents to machinery, inability to obtain the necessary materials, parts or equipment, any legislative, administrative or judicial restrictions, road conditions, weather, or any other act, omission or event outside the control of Bidell, which could not have been prevented by the exercise of due diligence by Bidell. Bidell shall advise the Customer of any difficulty in performing under the contract by reason of Force Majeure and the parties shall agree to either cancel the contract as provided in Clause 10 or complete the contract with such adjustments as are reasonably compelled by the Force Majeure.

11. Cancellation and Delay – The contract shall not be subject to cancellation or delay by the Customer except with the written consent of Bidell. Customer's cancellation of contract is subject to a cancellation charge of 10% of the total price of the contract plus Bidell's actual expenses to which Bidell has become committed for fulfillment of the contract before notice of cancellation is received. In the event cancellation or delay is occasioned by the Customer, then the Customer shall indemnify and save harmless Bidell from all direct and indirect costs, losses, liabilities and commitments including loss of profit arising from the cancellation or delay.

12. Damages – Subject to the balance of the provisions of this clause, Bidell shall only be liable for the cost of replacement of any defective parts or services provided under this contract. Bidell shall not be liable to the Customer for any consequential, indirect or special damage whatsoever. In addition, Bidell shall not be liable for, including without limitation, loss of profits or revenue, loss of use of equipment and facilities, and claims by or payments to customers, suppliers or other parties who have a relationship with the Customer, whether such damages are consequential, indirect, special or otherwise. The disclaimer applies to consequential, indirect or special damages based on upon any cause of action whatever asserted against Bidell including causes of action arising out of any breach of warranty, express or applied, guarantee, product liability, negligence, tort, or any other cause pertaining to the performance or non-performance of this contract by Bidell. Bidell shall not be responsible for losses or damages arising out of the negligence of the Customer, its employees, agents or third party contractors. In no event will Bidell's maximum liability to the Customer in connection with this contract including without limitation resulting from breach of contract or any other performance or non-performance of this contract exceed the aggregate amount of the price paid to Bidell for the parts and services provided hereunder.

13. Applicable Laws and Forums – This contract shall be interpreted in accordance with and shall be governed by the laws of the *Province of Alberta*, and the parties agree that any disputes hereunder or with respect to this quotation or the resulting contract between the parties shall be determined exclusively by the Courts in the Province of Alberta and the parties hereby expressly attorn to the exclusive jurisdiction of the Courts in the Province of Alberta.

Parts and Service Warranty Policy

Bidell Gas Compression warrants all workmanship for (3) months from time of repair on routine maintenance.

Bidell Gas Compression warrants all workmanship for (12) months from time of repair on all major overhauls whether completed in the field or in the shop.

Bidell Gas Compression warrants all new parts supplied by us to the extent of manufacturer's warranty against defects.

Customer Responsibilities

Engine must be maintained in accordance with published maintenance practices. Regular lube oil sampling must be performed and analyzed by a Bidell Gas Compression approved laboratory. Records of analysis must be made available to Bidell Gas Compression upon request. A Bidell Gas Compression representative must perform the initial 500-hour inspection.

Items not included

- All premiums, travel labour and truck kilometers.
- Any parts of components that were not fully inspected or replaced at time of overhaul and any machining or not-genuine replacement parts which were not approved by Bidell Gas Compression at time of overhaul.
- Performance complaints (including, but not limited to, lower power, poor fuel economy, etc.), unless caused by a failing or failed part.
- Fuel systems and final adjustments.
- Lubricating oil, coolant, filters, V-belts, hoses and other maintenance items replaced during any covered period unless such items are made unusable by a covered failure.
- Third party labour and expenses. Hiring of special cranes, hoists or other lifting devices to facilitate engine removal. Special transportation costs, (such as hotshot services, air freight, etc.)
- In no event will Bidell Gas Compression be responsible for consequential damages or loss of production as a result of a failure during a covered period.

BIDELL SERVICE TERMS AND CONDITIONS OF SALE

1. **Quotation and Contract** – The quotation from Bidell Gas Compression (hereinafter referred to as "Bidell"), is the document to which these terms and conditions are attached and apply. Other documents which are now or may be attached to or form part of the quotation, including addenda, specifications and drawings, and these terms and conditions, form an integral part of the quotation and resulting contract for the provision of parts or services to the Customer.

2. **Conflicting Terms** – These terms and conditions take priority over any conflicting terms of any contract or order issued, or other document forming part of the contract between the parties. No modifications of any order accepted by Bidell or these terms and conditions of sale shall be binding on Bidell unless specifically modified in writing and signed by an authorized representative of Bidell. All communications written and verbal, between the parties hereto with reference to the subject of the sale prior to the date of its acceptance are merged herein and this contract shall constitute the sole and entire agreement and contract between the parties as to the subject matter thereof.

3. **Price** – The final price for the sale of the goods or services shall be Bidell's quoted price as adjusted for any changes in scope or supply. The price is exclusive of all applicable Federal and Provincial custom tariffs, duties, sales taxes, value added taxes and other direct and similar taxes of every nature and kind whatsoever imposed. The risk of foreign currency exchange fluctuations in the cost of supplying parts shall be passed on to and assumed by the Customer.

4. **Payment** – Terms of payment shall be net cash within 30 days from the date of invoice, unless otherwise stated in the invoice. Invoices will be issued upon provision of service and/or upon each shipment of parts from the f.o.b. point. No holdbacks are applicable after delivery unless otherwise agreed to in writing by both parties. Payments not received by the due date shall be subject to interest at the prevailing rate on the outstanding balance until payment is received, plus any expenses incurred by Bidell in collecting overdue amounts.

5. **Warranty** – Bidell Service, warrants parts, rebuilt parts & service provided by Bidell to be free of defects in material or workmanship. This warranty is limited for a period of 90 days from the date of use or service, or 12 months from the date of shipment, whichever comes first.

5.1 **Repair and Replacement** – Bidell Parts and Service Warranty is limited to the repair or replacement of defective parts or components at Bidell's nearest repair facility. The warranty on replacement parts or services is limited in duration for a period of 90 days from the replacement date or the duration of the original warranty period, whichever is longer. Customer is responsible to pay for any transportation costs to and from a Bidell repair facility. Customer is also responsible to pay Bidell's out-of-pocket costs for transportation, lodging and subsistence, as well as additional and premium labour for any repairs taking place at other than Bidell repair facility and /or being performed outside of normal business hours.

5.2 **Repairs Not Covered** – This Warranty shall not apply to a rebuilt engine or power unit and any rebuilt parts used therein which in the opinion of Bidell have been damaged as a result of excessive loading, over or under speeding, heating, fire or abnormal combustion, ingestion of foreign materials, inadequate maintenance, misalignment, accident, improper installations, improper storage, improper use or any other condition or event not within the control of Bidell. Engine failures caused by REGROUND or CHROME PLATED crankshafts or failures caused by fatigue or outside force misalignment with other equipment are not covered by this Warranty. This Warranty does not obligate Bidell to provide "tune-up service" for any rebuilt engine or power unit.

5.3 **Limited Warranty** – The warranty provided herein by Bidell is the sole and exclusive warranty provided to the Customer and is in lieu of all other warranties, whether expressed or implied, including those found in the *Sale of Goods Act* (Alberta). Bidell is not responsible for any consequential, incidental, indirect or special damages whatsoever. In addition, Bidell shall not be liable for, including without limitation, lost revenues, downtime, diminished goodwill and damage to, or replacement of other equipment and property whether such damages are consequential, incidental, incidental, indirect or special, or otherwise. Bidell is not responsible for any punitive damages that may arise due to damage or loss.

5.4 **Modifications and Repair by Others** – Bidell shall not be responsible for modifications or repairs made by others unless Bidell authorizes such actions in writing prior to the time such modifications or repairs are made. Such modifications and repairs made by other than Bidell shall, unless authorized by Bidell, void Bidell's Parts and Service Warranty on the equipment.

5.5 **Claims** – All warranty claims must be filed with Bidell in writing within thirty (30) days after the claim arises.

6. **Security Interest** – The parts shall remain the property of Bidell until the price is fully paid, and the Customer hereby grants to Bidell a security interest in the parts (and all proceeds thereof) to secure the Customer's obligation to pay for the parts. Until the price of the parts is paid in full, the Customer covenants: (a) to keep the parts (or any proceeds thereof) free and clear of all security interests, mortgages, charges, liens and other encumbrances except as hereafter approved in writing by Bidell prior to their creation or assumption; (b) to pay Bidell all reasonable costs and expenses incurred in connection with enforcing Bidell security interests in the parts, or any other remedies which Bidell is entitled to exercise, and (c) not to sell, lease or otherwise dispose of the parts or any proceeds thereof, without prior written consent of Bidell. The parts shall be entirely at the Customer's risk and will be insured by the Customer with all loss payable to Bidell between the date of notification of readiness for the delivery by Bidell, and the date of full payment. In the event of default of any payment, the unpaid balance of the price shall become due and payable immediately, and Bidell may enter the premises where the parts are located and repossess them without further demand, and may resell them notwithstanding that a part of the price may have been paid. In the event of any such default, Bidell will be entitled to exercise any additional rights and remedies available to it at law, or in equity, or under the *Personal Property Security Act of Alberta*, or otherwise arising. The Customer waives the benefit of any laws which restrict Bidell from exercising the remedies outlined herein and waives its right to receive a copy of a financing statement, financing charges statement, or a verification statement relating to the security interest granted herein.

7. **Delivery and Completion** – Delivery and completion dates in the quotation are approximate only and are subject to confirmation by Bidell within fifteen (15) days of time of order. Bidell may adjust delivery dates in its sole and unfettered discretion if, at any time during the currency of the contract, Bidell does not receive from the Customer in a timely fashion, all necessary information with respect to the parts or services. Upon notification of readiness to ship by Bidell, any delay of Customer accepting delivery shall cause storage charges for the Customer's account. If any parts are shipped in error, then Bidell's sole liability to Customer is to ship correct parts or materials f.o.b. original point of shipment as soon as such parts or material is available. This is Bidell's sole remedy for any shipment.

8. **Substitutions and Additions** – In the event that any drawings or specifications do not specify parts and/or specific services, Bidell shall be at liberty to utilize such materials and methods as it may deem advisable, consistent with reasonable industry practices. Any costs associated with additions, deletions or revisions to Bidell normal design required by local codes or their application or interpretation shall be for the Customer's account.

9. **Intellectual Property** – All right, title and interest in and to any intellectual property disclosed by, embedded in or necessary for the operation of the parts shall at all times remain with Bidell and its suppliers and Customer shall acquire no right whatsoever to all or any part of such intellectual property except the right to use same in connection with the operation of the parts.

10. **Force Majeure** – Failure on the part of Bidell to perform any contract of sale or deliver the service thereunder on or about the required date shall not constitute default, or give rise to claim for damages if caused by Force Majeure. Force Majeure includes acts of God, strikes, lockouts or other significant industrial disturbances, sabotage, fire, civil disturbances, explosions, breakage of or accidents to machinery, inability to obtain the necessary materials, parts or equipment, any legislative, administrative or judicial restrictions, road conditions, weather, or any other act, omission or event outside the control of Bidell, which could not have been prevented by the exercise of due diligence by Bidell. Bidell shall advise the Customer of any difficulty in performing under the contract by reason of Force Majeure and the parties shall agree to either cancel the contract as provided in Clause 10 or complete the contract with such adjustments as are reasonably compelled by the Force Majeure.

11. **Cancellation and Delay** – The contract shall not be subject to cancellation or delay by the Customer except with the written consent of Bidell. Customer's cancellation of contract is subject to a cancellation charge of 10% of the total price of the contract plus Bidell's actual expenses to which Bidell has become committed for fulfillment of the contract before notice of cancellation is received. In the event cancellation or delay is occasioned by the Customer, then the Customer shall indemnify and save harmless Bidell from all direct and indirect costs, losses, liabilities and commitments including loss of profit arising from the cancellation or delay.

12. **Damages** – Subject to the balance of the provisions of this clause, Bidell shall only be liable for the cost of replacement of any defective parts or services provided under this contract. Bidell shall not be liable to the Customer for any consequential, indirect or special damage whatsoever. In addition, Bidell shall not be liable for, including without limitation, loss of profits or revenue, loss of use of equipment and facilities, and claims by or payments to customers, suppliers or other parties who have a relationship with the Customer, whether such damages are consequential, indirect, special or otherwise. The disclaimer applies to consequential, indirect or special damages based on upon any cause of action whatever asserted against Bidell including causes of action arising out of any breach of warranty, express or applied, guarantee, product liability, negligence, tort, or any other cause pertaining to the performance or non-performance of this contract by Bidell. Bidell shall not be responsible for losses or damages arising out of the negligence of the Customer, its employees, agents or third party contractors. In no event will Bidell's maximum liability to the Customer in connection with this contract including without limitation resulting from breach of contract or any other performance or non-performance of this contract exceed the aggregate amount of the price paid to Bidell for the parts and services provided hereunder.

13. **Applicable Laws and Forums** – This contract shall be interpreted in accordance with and shall be governed by the laws of the *Province of Alberta*, and the parties agree that any disputes hereunder or with respect to this quotation or the resulting contract between the parties shall be determined exclusively by the Courts in the Province of Alberta and the parties hereby expressly attorn to the exclusive jurisdiction of the Courts in the Province of Alberta.

PRIVACY NOTICE: By requesting Bidell's products and services, or by supplying products and services to Bidell, you hereby consent to the collection, use and disclosure of your personal information for the purposes described in Bidell's External Privacy Policy including for the purpose of providing products and services described in this document. For further information, please refer to Bidell's External Privacy Policy, or contact Bidell's Privacy Office by phone at (403)235-5877.

Load parts and travel to site obtain permit and fill out JHA
Removed all valve covers and plugs. Found bad hole
Drain coolant remove head on cylinder # 2 left bank.
Installed new piston liner and head torqued con rod and checked for clearance all good. Torqued head to 345 ft/lbs
Drained oil, and set valves
Installed all spark plugs, coils and valve covers
Filled unit with new oil and old coolant (customer said use old coolant because they are going to flush system)
Started unit but unit would not load up. Removed air cleaners and found left turbo not spinning
Shut unit down free up turbo and started unit needs new turbos ordered parts
Cleaned up and traveled home

Assisted By: Krls

Load truck and travel to site obtain permit and fill out JHA
Check engine temps coolant 92 oil 83. Exhaust temps 639 average
Shoot head temps still about 10 degrees diff between new and old heads
Shut unit down and drained coolant (still dirty)
Removed cylinder 3 right bank head and inspected. Coolant passage to exhaust manifold (small hole thru exhaust gasket) plugged in
head manifold ok. Removed frost plugs from head lots of black sludgy stuff
Piston and liner look good
Installed new head and checked turbo lines (had some stuff in them)
Filled hydraulic oil day tank
Monday

BIDELL SERVICE TERMS AND CONDITIONS OF SALE

1. **Quotation and Contract** – The quotation from Bidell Gas Compression (hereinafter referred to as “Bidell”), is the document to which these terms and conditions are attached and apply. Other documents which are now or may be attached to or form part of the quotation, including addenda, specifications and drawings, and these terms and conditions, form an integral part of the quotation and resulting contract for the provision of parts or services to the Customer.

2. **Conflicting Terms** – These terms and conditions take priority over any conflicting terms of any contract or order issued, or other document forming part of the contract between the parties. No modifications of any order accepted by Bidell or these terms and conditions of sale shall be binding on Bidell unless specifically modified in writing and signed by an authorized representative of Bidell. All communications written and verbal, between the parties hereto with reference to the subject of the sale prior to the date of its acceptance are merged herein and this contract shall constitute the sole and entire agreement and contract between the parties as to the subject matter thereof.

3. **Price** – The final price for the sale of the goods or services shall be Bidell’s quoted price as adjusted for any changes in scope or supply. The price is exclusive of all applicable Federal and Provincial custom tariffs, duties, sales taxes, value added taxes and other direct and similar taxes of every nature and kind whatsoever imposed. The risk of foreign currency exchange fluctuations in the cost of supplying parts shall be passed on to and assumed by the Customer.

4. **Payment** – Terms of payment shall be net cash within 30 days from the date of invoice, unless otherwise stated in the invoice. Invoices will be issued upon provision of service and/or upon each shipment of parts from the f.o.b. point. No holdbacks are applicable after delivery unless otherwise agreed to in writing by both parties. Payments not received by the due date shall be subject to interest at the prevailing rate on the outstanding balance until payment is received, plus any expenses incurred by Bidell in collecting overdue amounts.

5. **Warranty** – Bidell Service, warrants parts, rebuilt parts & service provided by Bidell to be free of defects in material or workmanship. This warranty is limited for a period of 90 days from the date of use or service, or 12 months from the date of shipment, whichever comes first.

5.1 **Repair and Replacement** – Bidell Parts and Service Warranty is limited to the repair or replacement of defective parts or components at Bidell’s nearest repair facility. The warranty on replacement parts or services is limited in duration for a period of 90 days from the replacement date or the duration of the original warranty period, whichever is longer. Customer is responsible to pay for any transportation costs to and from a Bidell repair facility. Customer is also responsible to pay Bidell’s out-of-pocket costs for transportation, lodging and subsistence, as well as additional and premium labour for any repairs taking place at other than Bidell repair facility and /or being performed outside of normal business hours.

5.2 **Repairs Not Covered** – This Warranty shall not apply to a rebuilt engine or power unit and any rebuilt parts used therein which in the opinion of Bidell have been damaged as a result of excessive loading, over or under speeding, heating, fire or abnormal combustion, ingestion of foreign materials, inadequate maintenance, misalignment, accident, improper installations, improper storage, improper use or any other condition or event not within the control of Bidell. Engine failures caused by REGROUND or CHROME PLATED crankshafts or failures caused by fatigue or outside force misalignment with other equipment are not covered by this Warranty. This Warranty does not obligate Bidell to provide “tune-up service” for any rebuilt engine or power unit.

5.3 **Limited Warranty** – The warranty provided herein by Bidell is the sole and exclusive warranty provided to the Customer and is in lieu of all other warranties, whether expressed or implied, including those found in the *Sale of Goods Act* (Alberta). Bidell is not responsible for any consequential, incidental, indirect or special damages whatsoever. In addition, Bidell shall not be liable for, including without limitation, lost revenues, downtime, diminished goodwill and damage to, or replacement of other equipment and property whether such damages are consequential, incidental, incidental, indirect or special, or otherwise. Bidell is not responsible for any punitive damages that may arise due to damage or loss.

5.4 **Modifications and Repair by Others** – Bidell shall not be responsible for modifications or repairs made by others unless Bidell authorizes such actions in writing prior to the time such modifications or repairs are made. Such modifications and repairs made by other than Bidell shall, unless authorized by Bidell, void Bidell’s Parts and Service Warranty on the equipment.

5.5 **Claims** – All warranty claims must be filed with Bidell in writing within thirty (30) days after the claim arises.

6. **Security Interest** – The parts shall remain the property of Bidell until the price is fully paid, and the Customer hereby grants to Bidell a security interest in the parts (and all proceeds thereof) to secure the Customer’s obligation to pay for the parts. Until the price of the parts is paid in full, the Customer covenants: (a) to keep the parts (or any proceeds thereof) free and clear of all security interests, mortgages, charges, liens and other encumbrances except as hereafter approved in writing by Bidell prior to their creation or assumption; (b) to pay Bidell all reasonable costs and expenses incurred in connection with enforcing Bidell security interests in the parts, or any other remedies which Bidell is entitled to exercise, and (c) not to sell, lease or otherwise dispose of the parts or any proceeds thereof, without prior written consent of Bidell. The parts shall be entirely at the Customer’s risk and will be insured by the Customer with all loss payable to Bidell between the date of notification of readiness for the delivery by Bidell, and the date of full payment. In the event of default of any payment, the unpaid balance of the price shall become due and payable immediately, and Bidell may enter the premises where the parts are located and repossess them without further demand, and may resell them notwithstanding that a part of the price may have been paid. In the event of any such default, Bidell will be entitled to exercise any additional rights and remedies available to it at law, or in equity, or under the *Personal Property Security Act of Alberta*, or otherwise arising. The Customer waives the benefit of any laws which restrict Bidell from exercising the remedies outlined herein and waives its right to receive a copy of a financing statement, financing charges statement, or a verification statement relating to the security interest granted herein.

7. **Delivery and Completion** – Delivery and completion dates in the quotation are approximate only and are subject to confirmation by Bidell within fifteen (15) days of time of order. Bidell may adjust delivery dates in its sole and unfettered discretion if, at any time during the currency of the contract, Bidell does not receive from the Customer in a timely fashion, all necessary information with respect to the parts or services. Upon notification of readiness to ship by Bidell, any delay of Customer accepting delivery shall cause storage charges for the Customer’s account. If any parts are shipped in error, then Bidell’s sole liability to Customer is to ship correct parts or materials f.o.b. original point of shipment as soon as such parts or material is available. This is Bidell’s sole remedy for any shipment.

8. **Substitutions and Additions** – In the event that any drawings or specifications do not specify parts and/or specific services, Bidell shall be at liberty to utilize such materials and methods as it may deem advisable, consistent with reasonable industry practices. Any costs associated with additions, deletions or revisions to Bidell normal design required by local codes or their application or interpretation shall be for the Customer’s account.

9. **Intellectual Property** – All right, title and interest in and to any intellectual property disclosed by, embedded in or necessary for the operation of the parts shall at all times remain with Bidell and its suppliers and Customer shall acquire no right whatsoever to all or any part of such Intellectual property except the right to use same in connection with the operation of the parts.

10. **Force Majeure** – Failure on the part of Bidell to perform any contract of sale or deliver the service thereunder on or about the required date shall not constitute default, or give rise to claim for damages if caused by Force Majeure. Force Majeure includes acts of God, strikes, lockouts or other significant industrial disturbances, sabotage, fire, civil disturbances, explosions, breakage of or accidents to machinery, inability to obtain the necessary materials, parts or equipment, any legislative, administrative or judicial restrictions, road conditions, weather, or any other act, omission or event outside the control of Bidell, which could not have been prevented by the exercise of due diligence by Bidell. Bidell shall advise the Customer of any difficulty in performing under the contract by reason of Force Majeure and the parties shall agree to either cancel the contract as provided in Clause 10 or complete the contract with such adjustments as are reasonably compelled by the Force Majeure.

11. **Cancellation and Delay** – The contract shall not be subject to cancellation or delay by the Customer except with the written consent of Bidell. Customer’s cancellation of contract is subject to a cancellation charge of 10% of the total price of the contract plus Bidell’s actual expenses to which Bidell has become committed for fulfillment of the contract before notice of cancellation is received. In the event cancellation or delay is occasioned by the Customer, then the Customer shall indemnify and save harmless Bidell from all direct and indirect costs, losses, liabilities and commitments including loss of profit arising from the cancellation or delay.

12. **Damages** – Subject to the balance of the provisions of this clause, Bidell shall only be liable for the cost of replacement of any defective parts or services provided under this contract. Bidell shall not be liable to the Customer for any consequential, indirect or special damage whatsoever. In addition, Bidell shall not be liable for, including without limitation, loss of profits or revenue, loss of use of equipment and facilities, and claims by or payments to customers, suppliers or other parties who have a relationship with the Customer, whether such damages are consequential, indirect, special or otherwise. The disclaimer applies to consequential, indirect or special damages based on upon any cause of action whatever asserted against Bidell including causes of action arising out of any breach of warranty, express or applied, guarantee, product liability, negligence, tort, or any other cause pertaining to the performance or non-performance of this contract by Bidell. Bidell shall not be responsible for losses or damages arising out of the negligence of the Customer, its employees, agents or third party contractors. In no event will Bidell’s maximum liability to the Customer in connection with this contract including without limitation resulting from breach of contract or any other performance or non-performance of this contract exceed the aggregate amount of the price paid to Bidell for the parts and services provided hereunder.

13. **Applicable Laws and Forums** – This contract shall be interpreted in accordance with and shall be governed by the laws of the *Province of Alberta*, and the parties agree that any disputes hereunder or with respect to this quotation or the resulting contract between the parties shall be determined exclusively by the Courts in the Province of Alberta and the parties hereby expressly attorn to the exclusive jurisdiction of the Courts in the Province of Alberta.

PRIVACY NOTICE: By requesting Bidell’s products and services, or by supplying products and services to Bidell, you hereby consent to the collection, use and disclosure of your personal information for the purposes described in Bidell’s External Privacy Policy including for the purpose of providing products and services described in this document. For further information, please refer to Bidell’s External Privacy Policy, or contact Bidell’s Privacy Office by phone at (403)235-5877.

Parts and Service Warranty Policy

Bidell Gas Compression warrants all workmanship for (3) months from time of repair on routine maintenance.

Bidell Gas Compression warrants all workmanship for (12) months from time of repair on all major overhauls whether completed in the field or in the shop.

Bidell Gas Compression warrants all new parts supplied by us to the extent of manufacturer's warranty against defects.

Customer Responsibilities

Engine must be maintained in accordance with published maintenance practices. Regular lube oil sampling must be performed and analyzed by a Bidell Gas Compression approved laboratory. Records of analysis must be made available to Bidell Gas Compression upon request. A Bidell Gas Compression representative must perform the initial 500-hour inspection.

Items not included

- All premiums, travel labour and truck kilometers.
- Any parts or components that were not fully inspected or replaced at time of overhaul and any machining or not-genuine replacement parts which were not approved by Bidell Gas Compression at time of overhaul.
- Performance complaints (including, but not limited to, lower power, poor fuel economy, etc.), unless caused by a failing or failed part.
- Fuel systems and final adjustments.
- Lubricating oil, coolant, filters, V-belts, hoses and other maintenance items replaced during any covered period unless such items are made unusable by a covered failure.
- Third party labour and expenses. Hiring of special cranes, hoists or other lifting devices to facilitate engine removal. Special transportation costs, (such as hotshot services, air freight, etc.)
- In no event will Bidell Gas Compression be responsible for consequential damages or loss of production as a result of a failure during a covered period.

BIDELL SERVICE TERMS AND CONDITIONS OF SALE

1. **Quotation and Contract** – The quotation from Bidell Gas Compression (hereinafter referred to as “Bidell”), is the document to which these terms and conditions are attached and apply. Other documents which are now or may be attached to or form part of the quotation, including addenda, specifications and drawings, and these terms and conditions, form an integral part of the quotation and resulting contract for the provision of parts or services to the Customer.
2. **Conflicting Terms** – These terms and conditions take priority over any conflicting terms of any contract or order issued, or other document forming part of the contract between the parties. No modifications of any order accepted by Bidell or these terms and conditions of sale shall be binding on Bidell unless specifically modified in writing and signed by an authorized representative of Bidell. All communications written and verbal, between the parties hereto with reference to the subject of the sale prior to the date of its acceptance are merged herein and this contract shall constitute the sole and entire agreement and contract between the parties as to the subject matter thereof.
3. **Price** – The final price for the sale of the goods or services shall be Bidell's quoted price as adjusted for any changes in scope or supply. The price is exclusive of all applicable Federal and Provincial custom tariffs, duties, sales taxes, value added taxes and other direct and similar taxes of every nature and kind whatsoever imposed. The risk of foreign currency exchange fluctuations in the cost of supplying parts shall be passed on to and assumed by the Customer.
4. **Payment** – Terms of payment shall be net cash within 30 days from the date of invoice, unless otherwise stated in the invoice. Invoices will be issued upon provision of service and/or upon each shipment of parts from the f.o.b. point. No holdbacks are applicable after delivery unless otherwise agreed to in writing by both parties. Payments not received by the due date shall be subject to interest at the prevailing rate on the outstanding balance until payment is received, plus any expenses incurred by Bidell in collecting overdue amounts.
5. **Warranty** – Bidell Service, warrants parts, rebuilt parts & service provided by Bidell to be free of defects in material or workmanship. This warranty is limited for a period of 90 days from the date of use or service, or 12 months from the date of shipment, whichever comes first.
 - 5.1 **Repair and Replacement** – Bidell Parts and Service Warranty is limited to the repair or replacement of defective parts or components at Bidell's nearest repair facility. The warranty on replacement parts or services is limited in duration for a period of 90 days from the replacement date or the duration of the original warranty period, whichever is longer. Customer is responsible to pay for any transportation costs to and from a Bidell repair facility. Customer is also responsible to pay Bidell's out-of-pocket costs for transportation, lodging and subsistence, as well as additional and premium labour for any repairs taking place at other than Bidell repair facility and /or being performed outside of normal business hours.
 - 5.2 **Repairs Not Covered** – This Warranty shall not apply to a rebuilt engine or power unit and any rebuilt parts used therein which in the opinion of Bidell have been damaged as a result of excessive loading, over or under speeding, heating, fire or abnormal combustion, ingestion of foreign materials, inadequate maintenance, misalignment, accident, improper installations, improper storage, improper use or any other condition or event not within the control of Bidell. Engine failures caused by REGROUND or CHROME PLATED crankshafts or failures caused by fatigue or outside force misalignment with other equipment are not covered by this Warranty. This Warranty does not obligate Bidell to provide “tune-up service” for any rebuilt engine or power unit.
 - 5.3 **Limited Warranty** – The warranty provided herein by Bidell is the sole and exclusive warranty provided to the Customer and is in lieu of all other warranties, whether expressed or implied, including those found in the *Sale of Goods Act* (Alberta). Bidell is not responsible for any consequential, incidental, indirect or special damages whatsoever. In addition, Bidell shall not be liable for, including without limitation, lost revenues, downtime, diminished goodwill and damage to, or replacement of other equipment and property whether such damages are consequential, incidental, incidental, indirect or special, or otherwise. Bidell is not responsible for any punitive damages that may arise due to damage or loss.
 - 5.4 **Modifications and Repair by Others** – Bidell shall not be responsible for modifications or repairs made by others unless Bidell authorizes such actions in writing prior to the time such modifications or repairs are made. Such modifications and repairs made by other than Bidell shall, unless authorized by Bidell, void Bidell's Parts and Service Warranty on the equipment.
 - 5.5 **Claims** – All warranty claims must be filed with Bidell in writing within thirty (30) days after the claim arises.
6. **Security Interest** – The parts shall remain the property of Bidell until the price is fully paid, and the Customer hereby grants to Bidell a security interest in the parts (and all proceeds thereof) to secure the Customer's obligation to pay for the parts. Until the price of the parts is paid in full, the Customer covenants: (a) to keep the parts (or any proceeds thereof) free and clear of all security interests, mortgages, charges, liens and other encumbrances except as hereafter approved in writing by Bidell prior to their creation or assumption; (b) to pay Bidell all reasonable costs and expenses incurred in connection with enforcing Bidell security interests in the parts, or any other remedies which Bidell is entitled to exercise, and (c) not to sell, lease or otherwise dispose of the parts or any proceeds thereof, without prior written consent of Bidell. The parts shall be entirely at the Customer's risk and will be insured by the Customer with all loss payable to Bidell between the date of notification of readiness for the delivery by Bidell, and the date of full payment. In the event of default of any payment, the unpaid balance of the price shall become due and payable immediately, and Bidell may enter the premises where the parts are located and repossess them without further demand, and may resell them notwithstanding that a part of the price may have been paid. In the event of any such default, Bidell will be entitled to exercise any additional rights and remedies available to it at law, or in equity, or under the *Personal Property Security Act of Alberta*, or otherwise arising. The Customer waives the benefit of any laws which restrict Bidell from exercising the remedies outlined herein and waives its right to receive a copy of a financing statement, financing charges statement, or a verification statement relating to the security interest granted herein.
7. **Delivery and Completion** – Delivery and completion dates in the quotation are approximate only and are subject to confirmation by Bidell within fifteen (15) days of time of order. Bidell may adjust delivery dates in its sole and unfettered discretion if, at any time during the currency of the contract, Bidell does not receive from the Customer in a timely fashion, all necessary information with respect to the parts or services. Upon notification of readiness to ship by Bidell, any delay of Customer accepting delivery shall cause storage charges for the Customer's account. If any parts are shipped in error, then Bidell's sole liability to Customer is to ship correct parts or materials f.o.b. original point of shipment as soon as such parts or material is available. This is Bidell's sole remedy for any shipment.

8. **Substitutions and Additions** – In the event that any drawings or specifications are not specified parts and/or specific services, Bidell shall be at liberty to utilize such materials and methods as it may deem advisable, consistent with reasonable industry practices. Any costs associated with additions, deletions or revisions to Bidell normal design required by local codes or their application or interpretation shall be for the Customer's account.
9. **Intellectual Property** – All right, title and interest in and to any intellectual property disclosed by, embedded in or necessary for the operation of the parts shall at all times remain with Bidell and its suppliers and Customer shall acquire no right whatsoever to all or any part of such intellectual property except the right to use same in connection with the operation of the parts.
10. **Force Majeure** – Failure on the part of Bidell to perform any contract of sale or deliver the service thereunder on or about the required date shall not constitute default, or give rise to claim for damages if caused by Force Majeure. Force Majeure includes acts of God, strikes, lockouts or other significant industrial disturbances, sabotage, fire, civil disturbances, explosions, breakage of or accidents to machinery, inability to obtain the necessary materials, parts or equipment, any legislative, administrative or judicial restrictions, road conditions, weather, or any other act, omission or event outside the control of Bidell, which could not have been prevented by the exercise of due diligence by Bidell. Bidell shall advise the Customer of any difficulty in performing under the contract by reason of Force Majeure and the parties shall agree to either cancel the contract as provided in Clause 10 or complete the contract with such adjustments as are reasonably compelled by the Force Majeure.
11. **Cancellation and Delay** – The contract shall not be subject to cancellation or delay by the Customer except with the written consent of Bidell. Customer's cancellation of contract is subject to a cancellation charge of 10% of the total price of the contract plus Bidell's actual expenses to which Bidell has become committed for fulfillment of the contract before notice of cancellation is received. In the event cancellation or delay is occasioned by the Customer, then the Customer shall indemnify and save harmless Bidell from all direct and indirect costs, losses, liabilities and commitments including loss of profit arising from the cancellation or delay.
12. **Damages** – Subject to the balance of the provisions of this clause, Bidell shall only be liable for the cost of replacement of any defective parts or services provided under this contract. Bidell shall not be liable to the Customer for any consequential, indirect or special damage whatsoever. In addition, Bidell shall not be liable for, including without limitation, loss of profits or revenue, loss of use of equipment and facilities, and claims by or payments to customers, suppliers or other parties who have a relationship with the Customer, whether such damages are consequential, indirect, special or otherwise. The disclaimer applies to consequential, indirect or special damages based on upon any cause of action whatever asserted against Bidell including causes of action arising out of any breach of warranty, express or applied, guarantee, product liability, negligence, tort, or any other cause pertaining to the performance or non-performance of this contract by Bidell. Bidell shall not be responsible for losses or damages arising out of the negligence of the Customer, its employees, agents or third party contractors. In no event will Bidell's maximum liability to the Customer in connection with this contract including without limitation resulting from breach of contract or any other performance or non-performance of this contract exceed the aggregate amount of the price paid to Bidell for the parts and services provided hereunder.
13. **Applicable Laws and Forums** – This contract shall be interpreted in accordance with and shall be governed by the laws of the *Province of Alberta*, and the parties agree that any disputes hereunder or with respect to this quotation or the resulting contract between the parties shall be determined exclusively by the Courts in the Province of Alberta and the parties hereby expressly attorn to the exclusive jurisdiction of the Courts in the Province of Alberta.

PRIVACY NOTICE: By requesting Bidell's products and services, or by supplying products and services to Bidell, you hereby consent to the collection, use and disclosure of your personal information for the purposes described in Bidell's External Privacy Policy including for the purpose of providing products and services described in this document. For further information, please refer to Bidell's External Privacy Policy, or contact Bidell's Privacy Office by phone at (403)235-5877.

Parts and Service Warranty Policy

Bidell Gas Compression warrants all workmanship for (3) months from time of repair on routine maintenance.

Bidell Gas Compression warrants all workmanship for (12) months from time of repair on all major overhauls whether completed in the field or in the shop.

Bidell Gas Compression warrants all new parts supplied by us to the extent of manufacturer's warranty against defects.

Customer Responsibilities

Engine must be maintained in accordance with published maintenance practices. Regular lube oil sampling must be performed and analyzed by a Bidell Gas Compression approved laboratory. Records of analysis must be made available to Bidell Gas Compression upon request. A Bidell Gas Compression representative must perform the initial 500-hour inspection.

Items not included

- All premiums, travel labour and truck kilometers.
- Any parts of components that were not fully inspected or replaced at time of overhaul and any machining or not-genuine replacement parts which were not approved by Bidell Gas Compression at time of overhaul.
- Performance complaints (including, but not limited to, lower power, poor fuel economy, etc.), unless caused by a failing or failed part.
- Fuel systems and final adjustments.
- Lubricating oil, coolant, filters, V-belts, hoses and other maintenance items replaced during any covered period unless such items are made unusable by a covered failure.
- Third party labour and expenses. Hiring of special cranes, hoists or other lifting devices to facilitate engine removal. Special transportation costs, (such as hotshot services, air freight, etc.)
- In no event will Bidell Gas Compression be responsible for consequential damages or loss of production as a result of a failure during a covered period.

Work Completed:

Pre trip inspection at FSJ Bidell, gather tooling and supplies. Travel from FSJ out to location and meet with Operator. Build Permits Jsa and head over to Unit. Unit is currently down on low oil level. Fill driver with oil, Prelube and adjust, replace both crankcase breathers and rebuild raycore diaphragm. Start and idle unit, monitor temps and pressures, found unit running on all cylinders but suspect left turbo has failed. Shut Unit down and check turbos, found that the left bank turbo oil seal has failed and the right bank turbo has excessive play and should be inspected.

Lock Unit out and depressure, remove both turbos so they can be replaced in the am. Left bank had a failed oil seal and right bank has had something go through it from previous failure.

Clean workspace and tools, order parts and travel from location back to FSJ.

Conditions: Good

Temp: 2°C

Work Completed:

Pre trip inspection at FSJ Bidell, gather parts,tooling, and supplies. Travel from FSJ out to location. Meet with Operator and build Permits/Jsa. Head over to Unit and install new left and right turbo cartridges (pre-lubed and verified oil flowing), set up frost fighter and warm Unit to temp so it can be started.

Start and idle Unit to temp (Unit was hard starting due to cold temp and poor cranking speed). Load Unit with current gas available and allow exhaust to burn off remainder of oil. Once Unit got up to temp it was performing with good stability and power, operator brought on remaining wells to load Unit 100% of its normal capacity. Unit was able to carry all the extra load without issue. (500kpa suction 5200Kpa discharge @ 34"hg manifold 10"reserve approx 7.6-8.1% O2). Recommend rechecking tune after Unit has ran long enough to clear oil from exhaust (possible O2 sensor recal/replace due to oil contamination). Noticed #7 cylinder showing higher than normal exhaust temp, recommend compression test/borescope (possible valve train issue). Will have to monitor closely over the next day.

Clean workspace and tools, fill out paperwork and reports, get signatures and travel from location back to FSJ.

Work Completed:

Prep load tools into border truck, travel to site, sign onto permits, shut down, reseal leaking fuel gas piping, install new breather clamps, reseal hydraulic pump fittings, reseal hydraulic control valve, replace faulty pyros, replace compressor crankcase breather and reseal loose piping, start unit and monitor, clean up and travel back to fsj. Get call unit is smoking badly, travel back to site, found unit burning oil and detonating, shut down, inspect turbos found oil from crankcase breather being drawn through turbos. measure crankcase pressure had -5.5inH2O. found filter saturated and not draining back to crankcase. inspect breather diaphragm found saturated and folded over on itself causing excessive vacuum. Blow through drain lines. clean out fuel gas regulator that was full of oil. start unit, do all running checks all good. unit still smoking due to exhaust being full of oil. clean up and travel back to fsj. unload border truck, do paperwork.

Wait for parts load and prep boarder jumper. Travel to site, Permit, JHA and lock outs. Change out dressers on fuel gas pipe to carb, change out relief valves on hyd fan block, replaced o rings on hyd pump fittings. Replaced breather on compressor crank case, re pipe sealed compressor crank case fill tube piping. Re sealed explosion doors, and new clamps on ccv breather filters on cylinders 1&2. Fired up machine and monitored for leaks, found Hyd lines from pump leaking from crimps. hoses faulty. Measurements made. Unit operating normally. Travel back to town. Get call from rob. Unit blowing blue smoke, load up more parts and tools travel back to site. Monitor and do running checks found ccv filter box full of oil, drained and changed filter, ran and monitored, lots of oil through system still blowing smoke, adjusted venturi and crank case pressure to acceptable level, engine running smoth but still smoking. found diaphram in ccv filter assembly rolled over and failed, parts ordered all filters on ccv system and rebuild kit. travel back to shop. Unload truck and do paperwork.

Pick up parts and travel to location. Sign in. Sign on permit. Unit has hyd fan speed issues and alarms. Try adjusting motor control and pump pressure to achieve pump speed. Motor is by passing. Shut unit down and lock out. Replace hyd fan motor. Unlock unit and go to start. Stater amot valve is stuck. Lock out start gas. Disassemble and clean valve. Check engine oil level. Kenco is over full. Found oil sensing line to kenco from crank case was plugged. It was plugged due to breather system drain being tied in to same line. Blow out line. Adjust Kenco height. Breather filter should be raised and drain repositioned. Engine was really low on oil. Add 1 1/2 barrels of oil. Start up engine. Set cooler fan speed and operating psi. Engine has a 100 rpm surge and Detonation alarms. Set waste gate reserve. Engine leveled out. Calibrate O2 sensor. Hook up testo. Set emissions and tune governor. Detonation and engine alarms clear. Monitor unit at full load. Everything ok. Fire detection alarm is on in panel. Clean up site. Sign out and return to GP.

Shut unit down and lock out. Replace hyd fan motor. Unlock unit and go to start. Stater amot valve is stuck. Lock out start gas. Disassemble and clean valve. Check engine oil level. Kenco is over full. Found oil sensing line to kenco from crank case was plugged. It was plugged due to breather system drain being tied in to same line. Blow out line. Adjust Kenco height. Breather filter should be raised and drain repositioned. Engine was really low on oil. Add 1 1/2 barrels of oil. Start up engine. Set cooler fan speed and operating psi. Engine has a 100 rpm surge and Detonation alarms. Set waste gate reserve. Engine leveled out. Calibrate O2 sensor. Hook up testo. Set emissions and tune governor. Detonation and engine alarms clear. Monitor unit at full load. Everything ok. Fire detection alarm is on in panel. Clean up site. Sign out and return to GP.

Work Performed: ☒ Field ☐ Shop

Pre trip inspection at FSJ Bldell. Gather service kit and pick up new starter from hoerbigger, travel from FSJ out to location. Meet with operator Tim and build Permits/Jsa. Unit went down on under speed and now won't restart. Operator says it cranked over but then powered out and can hear gas hissing in the starter. Operator has verified unit Barres by hand.

Attempt to start unit and found the starter just powered out like the operator had said (Start gas pressure holding), Remove and replace the starter, the old starter looked gummy inside. Attempt to start the Unit again and found no improvement. Manually bar the engine through 360° and found it could not be barred over completely. Suspect the Driver or Compressor has had a failure.

Lock Unit out and put locks on Lock Box, pull side doors and two valves per cylinder on the compressor to inspect for damage, cylinders looked wet but had no damage and the crosshead pins spin freely. Pull plugs on the driver to inspect for damage and found that Left Bank #8 plug would not come out (dropped valve).

Drain the main cooling system, and remove Left Bank #8 head, found it has 3 dropped valves and the piston and liner are both destroyed. (Will require a power pack) order parts for the am. Reassemble the compressor and torque all to spec, clean and prep the driver for a new Left Bank #8 power pack in the am. Will then run the unit and get up to temp, suspect that the left bank turbo will need to be replaced due to the debris and will need replaced also after boosting. At that point the unit can be shut down and dump oil and filters while the turbo is being replaced.

Clean workspace and tools, check out and travel from location back to FSJ. Stop at Bldell to gather parts and tooling for the am.

Pre trip inspection at FSJ Bidell, gather parts and load up. Travel from FSJ out to location and meet with Operator Tim, sign onto permits/Jsa and verify lock out. Unload parts and set up tooling. Remove Left Bank #8 piston and liner assembly, clean all parts and prep for reassembly.

Install new Left Bank #8 power pack, install new Left Bank #8 head. Set bridges and lash valves, replace driver oil filters, replace plugs and service transformers, check air cleaners, check belts, Fill Unit with coolant and check for leaks (none), Fill Unit with oil and prelube and adjust.

Pull locks, purge Unit and ready for a start, start and idle unit to temp, monitor temps and pressures (good). Put a slight load on the unit to check boost and reserve and found that the Left Bank Turbo is making chirping noise and reserve is low. Left Bank Turbo needs to be replaced, will run the unit at a light load for the night to clear exhaust and come back in the am to replace turbo and tune.

Clean workspace and tools, fill out paperwork and reports, get signatures and coding, check out and travel from location back to FSJ.

Pre trip inspection at FSJ Bidell, gather parts and load up. Travel from FSJ out to location and meet with Operator Tim, sign onto permits/Jsa.

Head over to Unit and shutdown and lotto, remove and replace left bank turbo (fins on the hot side we're all damaged), check fan pitch, good at summer 20.0. Restart and warm Unit to temp, bring Unit online at reduced load due to current process conditions, perform running checks, unit running with good stability and power.

Clean workspace and tools, fill out paperwork and reports, get signatures and coding, check out and travel from location back to FSJ.

Calgary, AB T2X 3J3
Telephone: (403) 278-9411
Facsimile: (403) 271-1769

Attention: Shane B. King
File No.: 141813/SBK

NOTICE TO THE DEFENDANT:

You are being sued. You are a Defendant.

Go to the end of this document to see what you can do and when you must do it.

THE PARTIES

1. The Plaintiff, Bidell Gas Compression Ltd. ("Bidell") is a corporation incorporated pursuant to the laws of the Province of Alberta. Bidell carries on business providing energy equipment and solutions in and around the Province of Alberta.
2. The Defendant, Glenogle Energy Inc. ("Glenogle"), is a body corporate, incorporated pursuant to the laws of the Province of Alberta, and carries on business in and around the Province of Alberta.

THE INTEREST

3. Pursuant to a Petroleum and Natural Gas Licence, Glenogle has an interest in the Crown minerals located in the following lands, pursuant to the following agreement:

Agreement Type / Number	Land
054 5414040196	6-13-081:33-NE

{the "Lands" and the "Interest"}.

THE AGREEMENT AND THE SERVICES

4. Bidell and Glenogle entered into an agreement (the "Agreement"), whereby Bidell rented equipment and performed certain field services and maintenance work as set out therein, which equipment and services included, but were not limited to, *inter alia*:

- a. A Caterpillar G3516 Compressor;
- b. Equipment service and maintenance;
- c. Cleaning, service and parts; and
- d. Such other equipment and services, the particulars of which will be proven at the trial of this Action;

(the "Equipment" and the "Services").

5. From on or about July 11, 2019, to on or about April 20, 2020, Bidell provided the Equipment and the Services to Glenogle in a good and workmanlike manner, according to industry standards, and pursuant to the terms of the Agreement.

THE INVOICES

6. It was a term of the Agreement that Glenogle would pay for the Equipment and the Services. During the term of the Agreement, Bidell issued various invoices to Glenogle. It was an explicit term, or in the alternative, implicit term, of the invoices that the invoices would be paid by Glenogle within thirty (30) days of receipt, otherwise interest was to be incurred, charged and paid at 24% annually.

GLENOGLE FAILS TO PAY BIDELL'S INVOICES

7. Bidell has issued, and Glenogle has refused or neglected to pay Bidell's invoices for the Equipment and the Services in the total amount of \$527,990.20. These invoices include, but may not be limited to, *inter alia*:

GLENOGLE ENERGY INC. Outstanding Invoices Summary

RTI18820	April 21, 2020	\$44,325.75	16-33-81-13 W6M	n/a	Unit rental for June 2020
Total		\$527,990.20			

("the Invoices").

8. Bidell last supplied the Equipment and performed the Services on behalf of Glenogle on or about April 20, 2020.
9. The total amount owing to Bidell as at or about April 30, 2020, was \$527,990.20, plus interest since this date. Pursuant to the terms of the Agreement, interest was to be incurred, charged and paid at 24% annually. Despite repeated demands by

Bidell, the Defendant has refused or neglected to pay the balance of \$527,990.20 outstanding on the Invoices (the "Debt").

10. As a result of the Defendant's refusal to pay the Debt, the Defendant has breached the terms of the Agreement, whereby Bidell has suffered losses and damages in the amount of \$527,990.20, plus interest, or in such other amount as will be proven at the trial of this Action.

THE STATEMENTS OF LIEN UPON INTEREST IN CROWN MINERALS

11. As at or about April 30, 2020, the amount of \$527,990.20, plus solicitor and client costs and interest was due and owing by the Defendant to Bidell.
12. Pursuant to the *Builders' Lien Act*, R.S.A. 2000, c. B-7, Bidell caused to be registered with the Minister of Energy at the Alberta Department of Energy, the following Statements of Lien Upon Interest in Crown Minerals, against the Interest in the Lands:

Registration Date	Registration No.	Lands	Sum claimed as due
March 16, 2020	2000691	6-13-081:33-NE	\$394,237.68
May 26, 2020	2001488	6-13-081:33-NE	\$133,752.52

(the "Liens").

13. By reason of the supply of the Equipment and the Services performed, the Lands have increased in value in an amount not less than the amount for which Bidell claims to be entitled to, pursuant to the Liens.

BIDELL IS ENTITLED TO THE DEBT ON A QUANTUM MERUIT BASIS

14. By reason of the supply of the Equipment and the Services performed, the Lands have increased in value in an amount not less than the amount for which Bidell claims to be entitled to.
15. Bidell states the Defendant has received the benefit of the Equipment and the Services performed on the Lands, and therefore, the Defendant has been unjustly enriched to Bidell's deprivation, without there being any juristic reason for the enrichment. Accordingly, Bidell claims restitution on a *quantum meruit* basis in the

amount of \$527,990.20, plus interest and solicitor and client costs, or in such other amount to be determined by this Honourable Court at the trial of this Action.

16. Further, Bidell has suffered the following additional losses and damages, with such losses and damages to be proven at the trial of this Action:
 - a. Loss of economic opportunity; and
 - b. Such other losses and damages as will be proven in the trial of this Action.
17. Bidell pleads and relies upon the provisions of the *Builders' Lien Act*, R.S.A. 2000, c. B-7, and amendments thereto.
18. Bidell pleads and relies upon the provisions of the *Excise Tax Act*, R.S.C. 1985, c. E-15, Part IX, and amendments thereto.
19. Bidell pleads and relies upon the provisions of the *Judgment Interest Act*, R.S.A. 2000, c. J-1 and amendments thereto.
20. Bidell pleads and relies upon the provisions of the *Tort-feasors Act*, R.S.A. 2000, c. T-5, and amendments thereto.
21. Bidell proposes the Trial of this action be heard in the City of Calgary, that this is a standard case and will take less than 10 days to try.

REMEDY SOUGHT

WHEREFORE THE PLAINTIFF, BIDELE GAS COMPRESSION LTD., CLAIMS AGAINST THE DEFENDANT, GLENOGLE ENERGY INC.:

- a. Judgment in the amount \$527,990.20, plus interest, or in an amount as will be proven at the trial of this Action;
- b. In the alternative, damages in the amount of \$527,990.20, plus interest, or in an amount as will be proven at the trial of this Action;
- c. Damages for loss of economic opportunity, in an amount as will be proven at the trial of this Action;
- d. A Judgment Declaration Order that the Plaintiff is entitled to a valid and subsisting charge under the *Builders' Lien Act* upon the said Interest in Lands herein described;
- e. In default of payment of the Plaintiff's claim, together with interest allowed and the costs of this action, that the Interest in the Lands be sold

pursuant to the *Builders' Lien Act* and the proceeds thereafter be applied in payment of the Plaintiff's claim as aforesaid or other claims against the said Lands in order of their priority;

- f. For the purposes aforesaid and for all other of the purposes hereof, all proper directions, enquiries and accounts;
- g. In the alternative, damages in the sum of \$527,990.20, plus interest, based on *quantum meruit*, or in an amount as will be proven at the trial of this Action;
- h. Solicitor and his own client costs on a full indemnity basis;
- i. Any applicable Goods and Services tax pursuant to the terms of the *Excise Tax Act*, R.S.C. 1985, c. E-15, Part IX, and amendments thereto;
- j. Interest on the above claimed awards at the contractually agreed upon rate of 24% per annum, or pursuant to the *Judgment Interest Act*, R.S.A. 2000, c. J-1;
- k. Interest on the above claimed awards pursuant to the *Judgment Interest Act*, R.S.A. 2000, c. J-1; and
- l. Such further and other relief as to this Honourable Court may seem just.

NOTICE TO THE DEFENDANT:

You only have a short time to do something to defend yourself against this claim:

20 days if you are served in Alberta

1 month if you are served outside Alberta but in Canada

2 months if you are served outside Canada.

You can respond by filing a statement of defence or a demand for notice in the office of the clerk of the Court of Queen's Bench at Calgary, Alberta, AND serving your statement of defence or a demand for notice on the plaintiff's address for service.

WARNING

If you do not file and serve a statement of defence or a demand for notice within your time period, you risk losing the law suit automatically. If you do not file, or do not serve, or are late in doing either of these things, a court may give a judgment to the plaintiff against you.

PLEASE TAKE NOTICE that this Notice of Revision or Disallowance is being sent pursuant to an order of the Honourable Justice J.T. Neilson of the Court of Queen's Bench of Alberta, Judicial Centre of Calgary, dated May 12, 2022 (the "**Claims Procedure Order**"). All capitalized terms not otherwise defined in this Notice of Revision or Disallowance shall bear the meaning given to them in the Claims Procedure Order, which is posted on the website of the Monitor, at www.ey.com/ca/glenogleenergy (the "**Monitor's Website**").

The Monitor has reviewed your Proof of Claim dated May 27, 2022 and has revised or disallowed your Secured/Priority Claim or D&O Claim for the following reasons:

Your claim relates to work performed at the 16-33 battery, which location's underlying mineral leases were lienied by you. Glenogle Energy Inc. does not own any mineral rights at the lienied property, and therefore, the claimed security is not valid.

On this basis, the Monitor is disallowing the entirety of your claim as it is an unsecured claim. Unsecured claims are not being considered under this Claims Procedure since there are no funds available for unsecured creditors.

Subject to further dispute by you in accordance with the provisions of the Claims Procedure Order, your Secured/Priority Claim or D&O Claim will be allowed as follows:

	Submitted	Allowed
Debtor Entity / D&O	Glenogle Energy Inc.	N/A
Classification	Secured	N/A
Claim Value	\$527,990.20	\$0

If you intend to dispute this Notice of Revision or Disallowance, you must, **no later than 5:00 p.m. (Calgary time) on the day that is 15 Calendar Days after your receipt of this Notice of Revision or Disallowance**, deliver a Notice of Dispute by registered mail, e-mail (in PDF format), courier or facsimile transmission to the following address:

Ernst & Young Inc.
Monitor of Glenogle Energy Inc.
Suite 2200, 215 – 2nd Street S.W.
Calgary, Alberta T2P 1M4
Attention: Jessica Murray
Fax: 403-206-5075
Phone: 403-206-5394
E-mail: Jessica.Murray@parthenon.ey.com

Any Claimant who fails to deliver a Notice of Dispute by the date and time set out above shall be deemed to accept the classification and the amount of its Secured/Priority Claim or D&O Claim as set out in this Notice of Revision or Disallowance and such Secured/Priority Claim or D&O Claim as set out herein shall constitute a Secured/Priority Claim or D&O Claim, and the Claimant will have those rights set out in the Claims Procedure Order with respect to such Secured/Priority Claim or D&O Claim.

If you do not deliver a Notice of Dispute of Revision or Disallowance by the deadline stated above, you shall be forever barred from making or enforcing any Secured/Priority Claim or D&O Claim against any of the Applicants, their Directors and their Officers (other than with respect to such Claim as has been allowed in this Notice of Revision or Disallowance), and all such Secured/Priority Claims and D&O Claims will be forever extinguished.

Dated at Calgary, Alberta, this 27th day of June, 2022

Ernst & Young Inc.

Licensed Insolvency Trustee

acting solely in its capacity as the Monitor of Glenogle Energy Inc.,
Glenogle Energy Limited Partnership and 1651558 Alberta Inc.
and not in its personal or corporate capacity

APPENDIX F

NOTICE OF DISPUTE – BIDELL

**NOTICE OF DISPUTE OF REVISION OR DISALLOWANCE OF THE CLAIMANT
LISTED HEREIN**

IN THE MATTER OF THE CCAA PROCEEDINGS OF GLENOGLE ENERGY INC., GLENOGLE ENERGY LIMITED PARTNERSHIP AND 1651558 ALBERTA INC. (collectively, "Glenogle", the "Company", or the "Applicants")

By order of the Court of Queen's Bench of Alberta (the "Court") dated May 12, 2022 (as may be amended, restated or supplemented from time to time (the "Claims Procedure Order"), in the proceeding commenced by the Applicants under the *Companies' Creditors Arrangement Act*, R.S.C. 1985, c. C-36, as amended (the "CCAA"), the Monitor has been authorized to conduct a secured and priority claims process (the "Claims Procedure"). A copy of the Claims Procedure Order, with all schedules, may be found on the Monitor's website at: www.ev.com/ca/glenogleenergy (the "Monitor's Website"). Capitalized terms used in this Notice of Dispute not otherwise defined in this letter shall have the meaning given to them in the Claims Procedure Order.

Name of Claimant: Bidell Gas Compression Ltd.
Address: c/o McLeod Law LLP
300, 14505 Bannister Road SE, Calgary, AB, T2X 3J3
Attention: Shane B. King
Telephone Number: 403-254-3849
Facsimile Number: 403-271-1769
E-mail Address: sking@mcleod-law.com

PLEASE TAKE NOTICE THAT, pursuant to the Claims Procedure Order, we hereby give you notice of our intention to dispute the Notice of Revision or Disallowance dated June 27, 2022 issued by the Monitor, in respect of our Secured/Priority Claim. We accept / dispute the following portion(s) of our Secured/Priority Claim as revised and / or disallowed in the said Notice of Revision or Disallowance:

	Allowed (per Notice of Revision or Disallowance)	Revised per Claimant
Debtor Entity / D&O	N/A	Glenogle Energy Inc.
Classification	N/A	Secured
Claim Value	\$0	\$527,990.20

Reason for the dispute (attach copies of any supporting documentation):

It is the submission of Bidell the work performed was for the benefit of both Agreements 054 5496070142 as well as 054 5414040196, thus this is and ought to be seen and determined as a Common Interest Lien

or a Common Purpose Lien. The work performed by Bidell, while liening Agreement 054 5414040196, served the joint benefit for Agreement 054 5496070142, thus rightly attaches to the property of Glenogle.

We understand the items used for the improvements were delivered to 16-33-81-13W6M, but worked on both Agreements, including that held by Glenogle, and should be deemed liening the Glenogle Agreement as well.

Attached hereto is the Alberta Mineral Information Land Index Search Detail Report, evidencing the Agreements, the liens in question, as well as all invoices supporting same.

Address for Service of Notice of Dispute of Revision or Disallowance:

Ernst & Young Inc.
Monitor of Glenogle Energy Inc.
Suite 2200, 215 – 2nd Street S.W.
Calgary, Alberta T2P 1M4
Attention: Jessica Murray
Fax: 403-206-5075
Phone: 403-206-5394
Email: Jessica.Murray@parthenon.ey.com

THIS FORM AND ANY REQUIRED SUPPORTING DOCUMENTATION MUST BE RETURNED TO THE MONITOR BY PREPAID REGISTERED MAIL, E-MAIL (IN PDF FORMAT), FACSIMILE OR COURIER TO THE ADDRESS INDICATED ABOVE AND MUST BE ACTUALLY RECEIVED BY THE MONITOR BY 5:00 P.M. (CALGARY TIME) ON THE DAY WHICH IS TEN CALENDAR DAYS AFTER THE DATE OF THE NOTICE OF REVISION OR DISALLOWANCE.

DATED this 7 day of July, 2022

BIDELL SERVICE TERMS AND CONDITIONS OF SALE

1. Quotation and Contract - The quotation from Bidell Gas Compression (hereinafter referred to as "Bidell"), is the document to which these terms and conditions are attached and apply. Other documents which are now or may be attached to or form part of the quotation, including addenda, specifications and drawings, and these terms and conditions, form an integral part of the quotation and resulting contract for the provision of parts or services to the Customer.

2. Conflicting Terms - These terms and conditions take priority over any conflicting terms of any contract or order issued, or other document forming part of the contract between the parties. No modifications of any order accepted by Bidell or these terms and conditions of sale shall be binding on Bidell unless specifically modified in writing and signed by an authorized representative of Bidell. All communications written and verbal, between the parties hereto with reference to the subject of the sale prior to the date of its acceptance are merged herein and this contract shall constitute the sole and entire agreement and contract between the parties as to the subject matter thereof.

3. Price - The final price for the sale of the goods or services shall be Bidell's quoted price as adjusted for any changes in scope or supply. The price is exclusive of all applicable Federal and Provincial custom tariffs, duties, sales taxes, value added taxes and other direct and similar taxes of every nature and kind whatsoever imposed. The risk of foreign currency exchange fluctuations in the cost of supplying parts shall be passed on to and assumed by the Customer.

4. Payment - Terms of payment shall be net cash within 30 days from the date of invoice, unless otherwise stated in the invoice. Invoices will be issued upon provision of service and/or upon each shipment of parts from the f.o.b. point. No holdbacks are applicable after delivery unless otherwise agreed to in writing by both parties. Payments not received by the due date shall be subject to interest at the prevailing rate on the outstanding balance until payment is received, plus any expenses incurred by Bidell in collecting overdue amounts.

5. Warranty - Bidell Service, warrants parts, rebuilt parts & service provided by Bidell to be free of defects in material or workmanship. This warranty is limited for a period of 90 days from the date of use or service, or 12 months from the date of shipment, whichever comes first.

5.1 Repair and Replacement - Bidell Parts and Service Warranty is limited to the repair or replacement of defective parts or components at Bidell's nearest repair facility. The warranty on replacement parts or services is limited in duration for a period of 90 days from the replacement date or the duration of the original warranty period, whichever is longer. Customer is responsible to pay for any transportation costs to and from a Bidell repair facility. Customer is also responsible to pay Bidell's out-of-pocket costs for transportation, lodging and subsistence, as well as additional and premium labour for any repairs taking place at other than Bidell repair facility and /or being performed outside of normal business hours.

5.2 Repairs Not Covered - This Warranty shall not apply to a rebuilt engine or power unit and any rebuilt parts used therein which in the opinion of Bidell have been damaged as a result of excessive loading, over or under speeding, heating, fire or abnormal combustion, ingestion of foreign materials, inadequate maintenance, misalignment, accident, improper installations, improper storage, improper use or any other condition or event not within the control of Bidell. Engine failures caused by REGROUND or CHROME PLATED crankshafts or failures caused by fatigue or outside force misalignment with other equipment are not covered by this Warranty. This Warranty does not obligate Bidell to provide "tune-up service" for any rebuilt engine or power unit.

5.3 Limited Warranty - The warranty provided herein by Bidell is the sole and exclusive warranty provided to the Customer and is in lieu of all other warranties, whether expressed or implied, including those found in the *Sale of Goods Act* (Alberta). Bidell is not responsible for any consequential, incidental, indirect or special damages whatsoever. In addition, Bidell shall not be liable for, including without limitation, lost revenues, downtime, diminished goodwill and damage to, or replacement of other equipment and property whether such damages are consequential, incidental, incidental, indirect or special, or otherwise. Bidell is not responsible for any punitive damages that may arise due to damage or loss.

5.4 Modifications and Repair by Others - Bidell shall not be responsible for modifications or repairs made by others unless Bidell authorizes such actions in writing prior to the time such modifications or repairs are made. Such modifications and repairs made by other than Bidell, shall, unless authorized by Bidell, void Bidell's Parts and Service Warranty on the equipment.

5.5 Claims - All warranty claims must be filed with Bidell in writing within thirty (30) days after the claim arises.

6. Security Interest - The parts shall remain the property of Bidell until the price is fully paid, and the Customer hereby grants to Bidell a security interest in the parts (and all proceeds thereof) to secure the Customer's obligation to pay for the parts. Until the price of the parts is paid in full, the Customer covenants: (a) to keep the parts (or any proceeds thereof) free and clear of all security interests, mortgages, charges, liens and other encumbrances except as hereafter approved in writing by Bidell prior to their creation or assumption; (b) to pay Bidell all reasonable costs and expenses incurred in connection with enforcing Bidell security interests in the parts, or any other remedies which Bidell is entitled to exercise, and (c) not to sell, lease or otherwise dispose of the parts or any proceeds thereof, without prior written consent of Bidell. The parts shall be entirely at the Customer's risk and will be insured by the Customer with all loss payable to Bidell between the date of notification of readiness for the delivery by Bidell, and the date of full payment. In the event of default of any payment, the unpaid balance of the price shall become due and payable immediately, and Bidell may enter the premises where the parts are located and repossess them without further demand, and may resell them notwithstanding that a part of the price may have been paid. In the event of any such default, Bidell will be entitled to exercise any additional rights and remedies available to it at law, or in equity, or under the *Personal Property Security Act* of Alberta, or otherwise arising. The Customer waives the benefit of any laws which restrict Bidell from exercising the remedies

stated herein and waives its right to receive a copy of a financing statement, financing charges statement, or a verification statement relating to the security interest granted herein.

7. Delivery and Completion - Delivery and completion dates in the quotation are approximate only and are subject to confirmation by Bidell within fifteen (15) days of time of order. Bidell may just delivery dates in its sole and unfettered discretion if, at any time during the currency of the contract, Bidell does not receive from the Customer in a timely fashion, all necessary information with respect to the parts or services. Upon notification of readiness to ship by Bidell, any delay of Customer accepting delivery shall cause storage charges for the Customer's account. If any parts are shipped in error, then Bidell's sole liability to Customer is to ship correct parts or materials to the original point of shipment as soon as such parts or material is available. This is Bidell's sole remedy for any shipment.

8. Substitutions and Additions - In the event that any drawings or specifications do not specify parts and/or specific services, Bidell shall be at liberty to utilize such materials and methods as it may deem advisable, consistent with reasonable industry practices. Any costs associated with additions, deletions or revisions to Bidell normal design required by local codes or their application or interpretation shall be for the Customer's account.

9. Intellectual Property - All right, title and interest in and to any intellectual property disclosed by, embedded in or necessary for the operation of the parts shall at all times remain with Bidell and its suppliers and Customer shall acquire no right whatsoever to all or any part of such intellectual property except the right to use same in connection with the operation of the parts.

10. Force Majeure - Failure on the part of Bidell to perform any contract of sale or deliver the service thereunder on or about the required date shall not constitute default, or give rise to claim for damages if caused by Force Majeure. Force Majeure includes acts of God, strikes, lockouts or other significant industrial disturbances, sabotage, fire, civil disturbances, explosions, breakage of or accidents to machinery, inability to obtain the necessary materials, parts or equipment, any legislative, administrative or judicial restrictions, road conditions, weather, or any other act, omission or event outside the control of Bidell, which could not have been prevented by the exercise of due diligence by Bidell. Bidell shall advise the Customer of any difficulty in performing under the contract by reason of Force Majeure and the parties shall agree to either cancel the contract as provided in Clause 10 or complete the contract with such adjustments as are reasonably compelled by the Force Majeure.

11. Cancellation and Delay - The contract shall not be subject to cancellation or delay by the Customer except with the written consent of Bidell. Customer's cancellation of contract is subject to a cancellation charge of 10% of the total price of the contract plus Bidell's actual expenses to which Bidell has become committed for fulfillment of the contract before notice of cancellation is received. In the event cancellation or delay is occasioned by the Customer, then the Customer shall indemnify and save harmless Bidell from all direct and indirect costs, losses, liabilities and commitments including loss of profit arising from the cancellation or delay.

12. Damages - Subject to the balance of the provisions of this clause, Bidell shall only be liable for the cost of replacement of any defective parts or services provided under this contract. Bidell shall not be liable to the Customer for any consequential, indirect or special damage whatsoever. In addition, Bidell shall not be liable for, including without limitation, loss of profits or revenue, loss of use of equipment and facilities, and claims by or payments to customers, suppliers or other parties who have a relationship with the Customer, whether such damages are consequential, indirect, special or otherwise. The disclaimer applies to consequential, indirect or special damages based on upon any cause of action whatever asserted against Bidell including causes of action arising out of any breach of warranty, express or implied, guarantee, product liability, negligence, tort, or any other cause pertaining to the performance or non-performance of this contract by Bidell. Bidell shall not be responsible for losses or damages arising out of the negligence of the Customer, its employees, agents or third party contractors. In no event will Bidell's maximum liability to the Customer in connection with this contract including without limitation resulting from breach of contract or any other performance or non-performance of this contract exceed the aggregate amount of the price paid to Bidell for the parts and services provided hereunder.

13. Applicable Laws and Forums - This contract shall be interpreted in accordance with and shall be governed by the laws of the Province of Alberta, and the parties agree that any disputes hereunder or with respect to this quotation or the resulting contract between the parties shall be determined exclusively by the Courts in the Province of Alberta and the parties hereby expressly attorn to the exclusive jurisdiction of the Courts in the Province of Alberta.

PRIVACY NOTICE: By requesting Bidell's products and services, or by supplying products and services to Bidell, you hereby consent to the collection, use and disclosure of your personal information for the purposes described in Bidell's External Privacy Policy including for the purpose of providing products and services described in this document. For further information, please refer to Bidell's External Privacy Policy, or contact Bidell's Privacy Office by phone at (403)235-5877.

Parts and Service Warranty Policy

Bidell Gas Compression warrants all workmanship for (3) months from time of repair on routine maintenance.

Bidell Gas Compression warrants all workmanship for (12) months from time of repair on all major overhauls whether completed in the field or in the shop.

Bidell Gas Compression warrants all new parts supplied by us to the extent of manufacturer's warranty against defects.

Customer Responsibilities

Engine must be maintained in accordance with published maintenance practices. Regular lube oil sampling must be performed and analyzed by a Bidell Gas Compression approved laboratory. Records of analysis must be made available to Bidell Gas Compression upon request. A Bidell Gas Compression representative must perform the initial 500-hour inspection.

Items not included

- All premiums, travel labour and truck kilometers.
- Any parts or components that were not fully inspected or replaced at time of overhaul and any machining or not-genuine replacement parts which were not approved by Bidell Gas Compression at time of overhaul.
- Performance complaints (including, but not limited to, lower power, poor fuel economy, etc.), unless caused by a failing or failed part.
- Fuel systems and final adjustments.
- Lubricating oil, coolant, filters, V-belts, hoses and other maintenance items replaced during any covered period unless such items are made unusable by a covered failure.
- Third party labour and expenses. Hiring of special cranes, hoists or other lifting devices to facilitate engine removal. Special transportation costs, (such as hotshot services, air freight, etc.)
- In no event will Bidell Gas Compression be responsible for consequential damages or loss of production as a result of a failure during a covered period.

BIDELL SERVICE TERMS AND CONDITIONS OF SALE

1. **Quotation and Contract** – The quotation from Bidell Gas Compression (hereinafter referred to as "Bidell"), is the document to which these terms and conditions are attached and apply. Other documents which are now or may be attached to or form part of the quotation, including addenda, specifications and drawings, and these terms and conditions, form an integral part of the quotation and resulting contract for the provision of parts or services to the Customer.

2. **Conflicting Terms** – These terms and conditions take priority over any conflicting terms of any contract or order issued, or other document forming part of the contract between the parties. No modifications of any order accepted by Bidell or these terms and conditions of sale shall be binding on Bidell unless specifically modified in writing and signed by an authorized representative of Bidell. All communications written and verbal, between the parties hereto with reference to the subject of the sale prior to the date of its acceptance are merged herein and this contract shall constitute the sole and entire agreement and contract between the parties as to the subject matter thereof.

3. **Price** – The final price for the sale of the goods or services shall be Bidell's quoted price as adjusted for any changes in scope or supply. The price is exclusive of all applicable Federal and Provincial custom tariffs, duties, sales taxes, value added taxes and other direct and similar taxes of every nature and kind whatsoever imposed. The risk of foreign currency exchange fluctuations in the cost of supplying parts shall be passed on to and assumed by the Customer.

4. **Payment** – Terms of payment shall be net cash within 30 days from the date of invoice, unless otherwise stated in the invoice. Invoices will be issued upon provision of service and/or upon each shipment of parts from the f.o.b. point. No holdbacks are applicable after delivery unless otherwise agreed to in writing by both parties. Payments not received by the due date shall be subject to interest at the prevailing rate on the outstanding balance until payment is received, plus any expenses incurred by Bidell in collecting overdue amounts.

5. **Warranty** – Bidell Service, warrants parts, rebuilt parts & service provided by Bidell to be free of defects in material or workmanship. This warranty is limited for a period of 90 days from the date of use or service, or 12 months from the date of shipment, whichever comes first.

5.1 **Repair and Replacement** – Bidell Parts and Service Warranty is limited to the repair or replacement of defective parts or components at Bidell's nearest repair facility. The warranty on replacement parts or services is limited in duration for a period of 90 days from the replacement date or the duration of the original warranty period, whichever is longer. Customer is responsible to pay for any transportation costs to and from a Bidell repair facility. Customer is also responsible to pay Bidell's out-of-pocket costs for transportation, lodging and subsistence, as well as additional and premium labour for any repairs taking place at other than Bidell repair facility and /or being performed outside of normal business hours.

5.2 **Repairs Not Covered** – This Warranty shall not apply to a rebuilt engine or power unit and any rebuilt parts used therein which in the opinion of Bidell have been damaged as a result of excessive loading, over or under speeding, heating, fire or abnormal combustion, ingestion of foreign materials, inadequate maintenance, misalignment, accident, improper installations, improper storage, improper use or any other condition or event not within the control of Bidell. Engine failures caused by REGROUND or CHROME PLATED crankshafts or failures caused by fatigue or outside force misalignment with other equipment are not covered by this Warranty. This Warranty does not obligate Bidell to provide "tune-up service" for any rebuilt engine or power unit.

5.3 **Limited Warranty** – The warranty provided herein by Bidell is the sole and exclusive warranty provided to the Customer and is in lieu of all other warranties, whether expressed or implied, including those found in the *Sale of Goods Act* (Alberta). Bidell is not responsible for any consequential, incidental, indirect or special damages whatsoever. In addition, Bidell shall not be liable for, including without limitation, lost revenues, downtime, diminished goodwill and damage to, or replacement of other equipment and property whether such damages are consequential, incidental, incidental, indirect or special, or otherwise. Bidell is not responsible for any punitive damages that may arise due to damage or loss.

5.4 **Modifications and Repair by Others** – Bidell shall not be responsible for modifications or repairs made by others unless Bidell authorizes such actions in writing prior to the time such modifications or repairs are made. Such modifications and repairs made by other than Bidell shall, unless authorized by Bidell, void Bidell's Parts and Service Warranty on the equipment.

5.5 **Claims** – All warranty claims must be filed with Bidell in writing within thirty (30) days after the claim arises.

6. **Security Interest** – The parts shall remain the property of Bidell until the price is fully paid, and the Customer hereby grants to Bidell a security interest in the parts (and all proceeds thereof) to secure the Customer's obligation to pay for the parts. Until the price of the parts is paid in full, the Customer covenants: (a) to keep the parts (or any proceeds thereof) free and clear of all security interests, mortgages, charges, liens and other encumbrances except as hereafter approved in writing by Bidell prior to their creation or assumption; (b) to pay Bidell all reasonable costs and expenses incurred in connection with enforcing Bidell security interests in the parts, or any other remedies which Bidell is entitled to exercise, and (c) not to sell, lease or otherwise dispose of the parts or any proceeds thereof, without prior written consent of Bidell. The parts shall be entirely at the Customer's risk and will be insured by the Customer with all loss payable to Bidell between the date of notification of readiness for the delivery by Bidell, and the date of full payment. In the event of default of any payment, the unpaid balance of the price shall become due and payable immediately, and Bidell may enter the premises where the parts are located and repossess them without further demand, and may resell them notwithstanding that a part of the price may have been paid. In the event of any such default, Bidell will be entitled to exercise any additional rights and remedies available to it at law, or in equity, or under the *Personal Property Security Act of Alberta*, or otherwise arising. The Customer waives the benefit of any laws which restrict Bidell from exercising the remedies outlined herein and waives its right to receive a copy of a financing statement, financing charges statement, or a verification statement relating to the security interest granted herein.

7. **Delivery and Completion** – Delivery and completion dates in the quotation are approximate only and are subject to confirmation by Bidell within fifteen (15) days of time of order. Bidell may adjust delivery dates in its sole and unfettered discretion if, at any time during the currency of the contract, Bidell does not receive from the Customer in a timely fashion, all necessary information with respect to the parts or services. Upon notification of readiness to ship by Bidell, any delay of Customer accepting delivery shall cause storage charges for the Customer's account. If any parts are shipped in error, then Bidell's sole liability to Customer is to ship correct parts or materials f.o.b. original point of shipment as soon as such parts or material is available. This is Bidell's sole remedy for any shipment.

8. **Substitutions and Additions** – In the event that any drawings or specifications do not specify parts and/or specific services, Bidell shall be at liberty to utilize such materials and methods as it may deem advisable, consistent with reasonable industry practices. Any costs associated with additions, deletions or revisions to Bidell normal design required by local codes or their application or interpretation shall be for the Customer's account.

9. **Intellectual Property** – All right, title and interest in and to any intellectual property disclosed by, embedded in or necessary for the operation of the parts shall at all times remain with Bidell and its suppliers and Customer shall acquire no right whatsoever to all or any part of such intellectual property except the right to use same in connection with the operation of the parts.

10. **Force Majeure** – Failure on the part of Bidell to perform any contract of sale or deliver the service thereunder on or about the required date shall not constitute default, or give rise to claim for damages if caused by Force Majeure. Force Majeure includes acts of God, strikes, lockouts or other significant industrial disturbances, sabotage, fire, civil disturbances, explosions, breakage of or accidents to machinery, inability to obtain the necessary materials, parts or equipment, any legislative, administrative or judicial restrictions, road conditions, weather, or any other act, omission or event outside the control of Bidell, which could not have been prevented by the exercise of due diligence by Bidell. Bidell shall advise the Customer of any difficulty in performing under the contract by reason of Force Majeure and the parties shall agree to either cancel the contract as provided in Clause 10 or complete the contract with such adjustments as are reasonably compelled by the Force Majeure.

11. **Cancellation and Delay** – The contract shall not be subject to cancellation or delay by the Customer except with the written consent of Bidell. Customer's cancellation of contract is subject to a cancellation charge of 10% of the total price of the contract plus Bidell's actual expenses to which Bidell has become committed for fulfillment of the contract before notice of cancellation is received. In the event cancellation or delay is occasioned by the Customer, then the Customer shall indemnify and save harmless Bidell from all direct and indirect costs, losses, liabilities and commitments including loss of profit arising from the cancellation or delay.

12. **Damages** – Subject to the balance of the provisions of this clause, Bidell shall only be liable for the cost of replacement of any defective parts or services provided under this contract. Bidell shall not be liable to the Customer for any consequential, indirect or special damage whatsoever. In addition, Bidell shall not be liable for, including without limitation, loss of profits or revenue, loss of use of equipment and facilities, and claims by or payments to customers, suppliers or other parties who have a relationship with the Customer, whether such damages are consequential, indirect, special or otherwise. The disclaimer applies to consequential, indirect or special damages based on upon any cause of action whatever asserted against Bidell including causes of action arising out of any breach of warranty, express or implied, guarantee, product liability, negligence, tort, or any other cause pertaining to the performance or non-performance of this contract by Bidell. Bidell shall not be responsible for losses or damages arising out of the negligence of the Customer, its employees, agents or third party contractors. In no event will Bidell's maximum liability to the Customer in connection with this contract including without limitation resulting from breach of contract or any other performance or non-performance of this contract exceed the aggregate amount of the price paid to Bidell for the parts and services provided hereunder.

13. **Applicable Laws and Forums** – This contract shall be interpreted in accordance with and shall be governed by the laws of the *Province of Alberta*, and the parties agree that any disputes hereunder or with respect to this quotation or the resulting contract between the parties shall be determined exclusively by the Courts in the Province of Alberta and the parties hereby expressly attorn to the exclusive jurisdiction of the Courts in the Province of Alberta.

PRIVACY NOTICE: By requesting Bidell's products and services, or by supplying products and services to Bidell, you hereby consent to the collection, use and disclosure of your personal information for the purposes described in Bidell's External Privacy Policy including for the purpose of providing products and services described in this document. For further information, please refer to Bidell's External Privacy Policy, or contact Bidell's Privacy Office by phone at (403)235-5877.

Parts and Service Warranty Policy

Bidell Gas Compression warrants all workmanship for (3) months from time of repair on routine maintenance.

Bidell Gas Compression warrants all workmanship for (12) months from time of repair on all major overhauls whether completed in the field or in the shop.

Bidell Gas Compression warrants all new parts supplied by us to the extent of manufacturer's warranty against defects.

Customer Responsibilities

Engine must be maintained in accordance with published maintenance practices. Regular lube oil sampling must be performed and analyzed by a Bidell Gas Compression approved laboratory. Records of analysis must be made available to Bidell Gas Compression upon request. A Bidell Gas Compression representative must perform the initial 500-hour inspection.

Items not included

- All premiums, travel labour and truck kilometers.
- Any parts of components that were not fully inspected or replaced at time of overhaul and any machining or not-genuine replacement parts which were not approved by Bidell Gas Compression at time of overhaul.
- Performance complaints (including, but not limited to, lower power, poor fuel economy, etc.), unless caused by a failing or failed part.
- Fuel systems and final adjustments.
- Lubricating oil, coolant, filters, V-belts, hoses and other maintenance items replaced during any covered period unless such items are made unusable by a covered failure.
- Third party labour and expenses. Hiring of special cranes, hoists or other lifting devices to facilitate engine removal. Special transportation costs, (such as hotshot services, air freight, etc.)
- In no event will Bidell Gas Compression be responsible for consequential damages or loss of production as a result of a failure during a covered period.

BIDELL SERVICE TERMS AND CONDITIONS OF SALE

1. **Quotation and Contract** – The quotation from Bidell Gas Compression (hereinafter referred to as "Bidell"), is the document to which these terms and conditions are attached and apply. Other documents which are now or may be attached to or form part of the quotation, including addenda, specifications and drawings, and these terms and conditions, form an integral part of the quotation and resulting contract for the provision of parts or services to the Customer.
2. **Conflicting Terms** – These terms and conditions take priority over any conflicting terms of any contract or order issued, or other document forming part of the contract between the parties. No modifications of any order accepted by Bidell or these terms and conditions of sale shall be binding on Bidell unless specifically modified in writing and signed by an authorized representative of Bidell. All communications written and verbal, between the parties hereto with reference to the subject of the sale prior to the date of its acceptance are merged herein and this contract shall constitute the sole and entire agreement and contract between the parties as to the subject matter thereof.
3. **Price** – The final price for the sale of the goods or services shall be Bidell's quoted price as adjusted for any changes in scope or supply. The price is exclusive of all applicable Federal and Provincial custom tariffs, duties, sales taxes, value added taxes and other direct and similar taxes of every nature and kind whatsoever imposed. The risk of foreign currency exchange fluctuations in the cost of supplying parts shall be passed on to and assumed by the Customer.
4. **Payment** – Terms of payment shall be net cash within 30 days from the date of invoice, unless otherwise stated in the invoice. Invoices will be issued upon provision of service and/or upon each shipment of parts from the f.o.b. point. No holdbacks are applicable after delivery unless otherwise agreed to in writing by both parties. Payments not received by the due date shall be subject to interest at the prevailing rate on the outstanding balance until payment is received, plus any expenses incurred by Bidell in collecting overdue amounts.
5. **Warranty** – Bidell Service, warrants parts, rebuilt parts & service provided by Bidell to be free of defects in material or workmanship. This warranty is limited for a period of 90 days from the date of use or service, or 12 months from the date of shipment, whichever comes first.
 - 5.1 **Repair and Replacement** – Bidell Parts and Service Warranty is limited to the repair or replacement of defective parts or components at Bidell's nearest repair facility. The warranty on replacement parts or services is limited in duration for a period of 90 days from the replacement date or the duration of the original warranty period, whichever is longer. Customer is responsible to pay for any transportation costs to and from a Bidell repair facility. Customer is also responsible to pay Bidell's out-of-pocket costs for transportation, lodging and subsistence, as well as additional and premium labour for any repairs taking place at other than Bidell repair facility and /or being performed outside of normal business hours.
 - 5.2 **Repairs Not Covered** – This Warranty shall not apply to a rebuilt engine or power unit and any rebuilt parts used therein which in the opinion of Bidell have been damaged as a result of excessive loading, over or under speeding, heating, fire or abnormal combustion, ingestion of foreign materials, inadequate maintenance, misalignment, accident, improper installations, improper storage, improper use or any other condition or event not within the control of Bidell. Engine failures caused by REGROUND or CHROME PLATED crankshafts or failures caused by fatigue or outside force misalignment with other equipment are not covered by this Warranty. This Warranty does not obligate Bidell to provide "tune-up service" for any rebuilt engine or power unit.
 - 5.3 **Limited Warranty** – The warranty provided herein by Bidell is the sole and exclusive warranty provided to the Customer and is in lieu of all other warranties, whether expressed or implied, including those found in the *Sale of Goods Act* (Alberta). Bidell is not responsible for any consequential, incidental, indirect or special damages whatsoever. In addition, Bidell shall not be liable for, including without limitation, lost revenues, downtime, diminished goodwill and damage to, or replacement of other equipment and property whether such damages are consequential, incidental, incidental, indirect or special, or otherwise. Bidell is not responsible for any punitive damages that may arise due to damage or loss.
 - 5.4 **Modifications and Repair by Others** – Bidell shall not be responsible for modifications or repairs made by others unless Bidell authorizes such actions in writing prior to the time such modifications or repairs are made. Such modifications and repairs made by other than Bidell shall, unless authorized by Bidell, void Bidell's Parts and Service Warranty on the equipment.
 - 5.5 **Claims** – All warranty claims must be filed with Bidell in writing within thirty (30) days after the claim arises.
6. **Security Interest** – The parts shall remain the property of Bidell until the price is fully paid, and the Customer hereby grants to Bidell a security interest in the parts (and all proceeds thereof) to secure the Customer's obligation to pay for the parts. Until the price of the parts is paid in full, the Customer covenants: (a) to keep the parts (or any proceeds thereof) free and clear of all security interests, mortgages, charges, liens and other encumbrances except as hereafter approved in writing by Bidell prior to their creation or assumption; (b) to pay Bidell all reasonable costs and expenses incurred in connection with enforcing Bidell security interests in the parts, or any other remedies which Bidell is entitled to exercise, and (c) not to sell, lease or otherwise dispose of the parts or any proceeds thereof, without prior written consent of Bidell. The parts shall be entirely at the Customer's risk and will be insured by the Customer with all loss payable to Bidell between the date of notification of readiness for the delivery by Bidell, and the date of full payment. In the event of default of any payment, the unpaid balance of the price shall become due and payable immediately, and Bidell may enter the premises where the parts are located and repossess them without further demand, and may resell them notwithstanding that a part of the price may have been paid. In the event of any such default, Bidell will be entitled to exercise any additional rights and remedies available to it at law, or in equity, or under the *Personal Property Security Act of Alberta*, or otherwise arising. The Customer waives the benefit of any laws which restrict Bidell from exercising the remedies outlined herein and waives its right to receive a copy of a financing statement, financing charges statement, or a verification statement relating to the security interest granted herein.
7. **Delivery and Completion** – Delivery and completion dates in the quotation are approximate only and are subject to confirmation by Bidell within fifteen (15) days of time of order. Bidell may adjust delivery dates in its sole and unfettered discretion if, at any time during the currency of the contract, Bidell does not receive from the Customer in a timely fashion, all necessary information with respect to the parts or services. Upon notification of readiness to ship by Bidell, any delay of Customer accepting delivery shall cause storage charges for the Customer's account. If any parts are shipped in error, then Bidell's sole liability to Customer is to ship correct parts or materials f.o.b. original point of shipment as soon as such parts or material is available. This is Bidell's sole remedy for any shipment.

8. **Substitutions and Additions** – In the event that any drawings or specifications do not specify parts and/or specific services, Bidell shall be at liberty to utilize such materials and methods as it may deem advisable, consistent with reasonable industry practices. Any costs associated with additions, deletions or revisions to Bidell normal design required by local codes or their application or interpretation shall be for the Customer's account.

9. **Intellectual Property** – All right, title and interest in and to any intellectual property disclosed by, embedded in or necessary for the operation of the parts shall at all times remain with Bidell and its suppliers and Customer shall acquire no right whatsoever to all or any part of such intellectual property except the right to use same in connection with the operation of the parts.

10. **Force Majeure** – Failure on the part of Bidell to perform any contract of sale or deliver the service thereunder on or about the required date shall not constitute default, or give rise to claim for damages if caused by Force Majeure. Force Majeure includes acts of God, strikes, lockouts or other significant industrial disturbances, sabotage, fire, civil disturbances, explosions, breakage of or accidents to machinery, inability to obtain the necessary materials, parts or equipment, any legislative, administrative or judicial restrictions, road conditions, weather, or any other act, omission or event outside the control of Bidell, which could not have been prevented by the exercise of due diligence by Bidell. Bidell shall advise the Customer of any difficulty in performing under the contract by reason of Force Majeure and the parties shall agree to either cancel the contract as provided in Clause 10 or complete the contract with such adjustments as are reasonably compelled by the Force Majeure.

11. **Cancellation and Delay** – The contract shall not be subject to cancellation or delay by the Customer except with the written consent of Bidell. Customer's cancellation of contract is subject to a cancellation charge of 10% of the total price of the contract plus Bidell's actual expenses to which Bidell has become committed for fulfillment of the contract before notice of cancellation is received. In the event cancellation or delay is occasioned by the Customer, then the Customer shall indemnify and save harmless Bidell from all direct and indirect costs, losses, liabilities and commitments including loss of profit arising from the cancellation or delay.

12. **Damages** – Subject to the balance of the provisions of this clause, Bidell shall only be liable for the cost of replacement of any defective parts or services provided under this contract. Bidell shall not be liable to the Customer for any consequential, indirect or special damage whatsoever. In addition, Bidell shall not be liable for, including without limitation, loss of profits or revenue, loss of use of equipment and facilities, and claims by or payments to customers, suppliers or other parties who have a relationship with the Customer, whether such damages are consequential, indirect, special or otherwise. The disclaimer applies to consequential, indirect or special damages based on upon any cause of action whatever asserted against Bidell including causes of action arising out of any breach of warranty, express or applied, guarantee, product liability, negligence, tort, or any other cause pertaining to the performance or non-performance of this contract by Bidell. Bidell shall not be responsible for losses or damages arising out of the negligence of the Customer, its employees, agents or third party contractors. In no event will Bidell's maximum liability to the Customer in connection with this contract including without limitation resulting from breach of contract or any other performance or non-performance of this contract exceed the aggregate amount of the price paid to Bidell for the parts and services provided hereunder.

13. **Applicable Laws and Forums** – This contract shall be interpreted in accordance with and shall be governed by the laws of the *Province of Alberta*, and the parties agree that any disputes hereunder or with respect to this quotation or the resulting contract between the parties shall be determined exclusively by the Courts in the Province of Alberta and the parties hereby expressly attorn to the exclusive jurisdiction of the Courts in the Province of Alberta.

PRIVACY NOTICE: By requesting Bidell's products and services, or by supplying products and services to Bidell, you hereby consent to the collection, use and disclosure of your personal information for the purposes described in Bidell's External Privacy Policy including for the purpose of providing products and services described in this document. For further information, please refer to Bidell's External Privacy Policy, or contact Bidell's Privacy Office by phone at (403)235-5877.

BIDELL SERVICE TERMS AND CONDITIONS OF SALE

1. Quotation and Contract – The quotation from Bidell Gas Compression (hereinafter referred to as "Bidell"), is the document to which these terms and conditions are attached and apply. Other documents which are now or may be attached to or form part of the quotation, including addenda, specifications and drawings, and these terms and conditions, form an integral part of the quotation and resulting contract for the provision of parts or services to the Customer.

2. Conflicting Terms – These terms and conditions take priority over any conflicting terms of any contract or order issued, or other document forming part of the contract between the parties. No modifications of any order accepted by Bidell or these terms and conditions of sale shall be binding on Bidell unless specifically modified in writing and signed by an authorized representative of Bidell. All communications written and verbal, between the parties hereto with reference to the subject of the sale prior to the date of its acceptance are merged herein and this contract shall constitute the sole and entire agreement and contract between the parties as to the subject matter thereof.

3. Price – The final price for the sale of the goods or services shall be Bidell's quoted price as adjusted for any changes in scope or supply. The price is exclusive of all applicable Federal and Provincial custom tariffs, duties, sales taxes, value added taxes and other direct and similar taxes of every nature and kind whatsoever imposed. The risk of foreign currency exchange fluctuations in the cost of supplying parts shall be passed on to and assumed by the Customer.

4. Payment – Terms of payment shall be net cash within 30 days from the date of invoice, unless otherwise stated in the Invoice. Invoices will be issued upon provision of service and/or upon each shipment of parts from the f.o.b. point. No holdbacks are applicable after delivery unless otherwise agreed to in writing by both parties. Payments not received by the due date shall be subject to interest at the prevailing rate on the outstanding balance until payment is received, plus any expenses incurred by Bidell in collecting overdue amounts.

5. Warranty – Bidell Service, warrants parts, rebuilt parts & service provided by Bidell to be free of defects in material or workmanship. This warranty is limited for a period of 90 days from the date of use or service, or 12 months from the date of shipment, whichever comes first.

5.1 Repair and Replacement – Bidell Parts and Service Warranty is limited to the repair or replacement of defective parts or components at Bidell's nearest repair facility. The warranty on replacement parts or services is limited in duration for a period of 90 days from the replacement date or the duration of the original warranty period, whichever is longer. Customer is responsible to pay for any transportation costs to and from a Bidell repair facility. Customer is also responsible to pay Bidell's out-of-pocket costs for transportation, lodging and subsistence, as well as additional and premium labour for any repairs taking place at other than Bidell repair facility and /or being performed outside of normal business hours.

5.2 Repairs Not Covered – This Warranty shall not apply to a rebuilt engine or power unit and any rebuilt parts used therein which in the opinion of Bidell have been damaged as a result of excessive loading, over or under speeding, heating, fire or abnormal combustion, ingestion of foreign materials, inadequate maintenance, misalignment, accident, improper installations, improper storage, improper use or any other condition or event not within the control of Bidell. Engine failures caused by REGROUND or CHROME PLATED crankshafts or failures caused by fatigue or outside force misalignment with other equipment are not covered by this Warranty. This Warranty does not obligate Bidell to provide "tune-up service" for any rebuilt engine or power unit.

5.3 Limited Warranty – The warranty provided herein by Bidell is the sole and exclusive warranty provided to the Customer and is in lieu of all other warranties, whether expressed or implied, including those found in the *Sale of Goods Act* (Alberta). Bidell is not responsible for any consequential, incidental, indirect or special damages whatsoever. In addition, Bidell shall not be liable for, including without limitation, lost revenues, downtime, diminished goodwill and damage to, or replacement of other equipment and property whether such damages are consequential, incidental, incidental, indirect or special, or otherwise. Bidell is not responsible for any punitive damages that may arise due to damage or loss.

5.4 Modifications and Repair by Others – Bidell shall not be responsible for modifications or repairs made by others unless Bidell authorizes such actions in writing prior to the time such modifications or repairs are made. Such modifications and repairs made by other than Bidell shall, unless authorized by Bidell, void Bidell's Parts and Service Warranty on the equipment.

5.5 Claims – All warranty claims must be filed with Bidell in writing within thirty (30) days after the claim arises.

6. Security Interest – The parts shall remain the property of Bidell until the price is fully paid, and the Customer hereby grants to Bidell a security interest in the parts (and all proceeds thereof) to secure the Customer's obligation to pay for the parts. Until the price of the parts is paid in full, the Customer covenants: (a) to keep the parts (or any proceeds thereof) free and clear of all security interests, mortgages, charges, liens and other encumbrances except as hereafter approved in writing by Bidell prior to their creation or assumption; (b) to pay Bidell all reasonable costs and expenses incurred in connection with enforcing Bidell security interests in the parts, or any other remedies which Bidell is entitled to exercise, and (c) not to sell, lease or otherwise dispose of the parts or any proceeds thereof, without prior written consent of Bidell. The parts shall be entirely at the Customer's risk and will be insured by the Customer with all loss payable to Bidell between the date of notification of readiness for the delivery by Bidell, and the date of full payment. In the event of default of any payment, the unpaid balance of the price shall become due and payable immediately, and Bidell may enter the premises where the parts are located and repossess them without further demand, and may resell them notwithstanding that a part of the price may have been paid. In the event of any such default, Bidell will be entitled to exercise any additional rights and remedies available to it at law, or in equity, or under the *Personal Property Security Act of Alberta*, or otherwise arising. The Customer waives the benefit of any laws which restrict Bidell from exercising the remedies

outlined herein and waives its right to receive a copy of a financing statement, financing charges statement, or a verification statement relating to the security interest granted herein.

7. Delivery and Completion – Delivery and completion dates in the quotation are approximate only and are subject to confirmation by Bidell within fifteen (15) days of time of order. Bidell may adjust delivery dates in its sole and unfettered discretion if, at any time during the currency of the contract, Bidell does not receive from the Customer in a timely fashion, all necessary information with respect to the parts or services. Upon notification of readiness to ship by Bidell, any delay of Customer accepting delivery shall cause storage charges for the Customer's account. If any parts are shipped in error, then Bidell's sole liability to Customer is to ship correct parts or materials f.o.b. original point of shipment as soon as such parts or material is available. This is Bidell's sole remedy for any shipment.

8. Substitutions – In the event that any drawings or specifications do not specify parts and/or specific services, Bidell shall be at liberty to utilize such materials and methods as it may deem advisable, consistent with reasonable industry practices. Any costs associated with additions, deletions or revisions to Bidell normal design required by local codes or their application or interpretation shall be for the Customer's account.

9. Intellectual Property – All right, title and interest in and to any intellectual property disclosed by, embedded in or necessary for the operation of the parts shall at all times remain with Bidell and its suppliers and Customer shall acquire no right whatsoever to all or any part of such intellectual property except the right to use same in connection with the operation of the parts.

10. Force Majeure – Failure on the part of Bidell to perform any contract of sale or deliver the service thereunder on or about the required date shall not constitute default, or give rise to claim for damages if caused by Force Majeure. Force Majeure includes acts of God, strikes, lockouts or other significant industrial disturbances, sabotage, fire, civil disturbances, explosions, breakage of or accidents to machinery, inability to obtain the necessary materials, parts or equipment, any legislative, administrative or judicial restrictions, road conditions, weather, or any other act, omission or event outside the control of Bidell, which could not have been prevented by the exercise of due diligence by Bidell. Bidell shall advise the Customer of any difficulty in performing under the contract by reason of Force Majeure and the parties shall agree to either cancel the contract as provided in Clause 10 or complete the contract with such adjustments as are reasonably compelled by the Force Majeure.

11. Cancellation and Delay – The contract shall not be subject to cancellation or delay by the Customer except with the written consent of Bidell. Customer's cancellation of contract is subject to a cancellation charge of 10% of the total price of the contract plus Bidell's actual expenses to which Bidell has become committed for fulfillment of the contract before notice of cancellation is received. In the event cancellation or delay is occasioned by the Customer, then the Customer shall indemnify and save harmless Bidell from all direct and indirect costs, losses, liabilities and commitments including loss of profit arising from the cancellation or delay.

12. Damages – Subject to the balance of the provisions of this clause, Bidell shall only be liable for the cost of replacement of any defective parts or services provided under this contract. Bidell shall not be liable to the Customer for any consequential, indirect or special damage whatsoever. In addition, Bidell shall not be liable for, including without limitation, loss of profits or revenue, loss of use of equipment and facilities, and claims by or payments to customers, suppliers or other parties who have a relationship with the Customer, whether such damages are consequential, indirect, special or otherwise. The disclaimer applies to consequential, indirect or special damages based on upon any cause of action whatever asserted against Bidell including causes of action arising out of any breach of warranty, express or applied, guarantee, product liability, negligence, tort, or any other cause pertaining to the performance or non-performance of this contract by Bidell. Bidell shall not be responsible for losses or damages arising out of the negligence of the Customer, its employees, agents or third party contractors. In no event will Bidell's maximum liability to the Customer in connection with this contract including without limitation resulting from breach of contract or any other performance or non-performance of this contract exceed the aggregate amount of the price paid to Bidell for the parts and services provided hereunder.

13. Applicable Laws and Forums – This contract shall be interpreted in accordance with and shall be governed by the laws of the *Province of Alberta*, and the parties agree that any disputes hereunder or with respect to this quotation or the resulting contract between the parties shall be determined exclusively by the Courts in the Province of Alberta and the parties hereby expressly attorn to the exclusive jurisdiction of the Courts in the Province of Alberta.

PRIVACY NOTICE: By requesting Bidell's products and services, or by supplying products and services to Bidell, you hereby consent to the collection, use and disclosure of your personal information for the purposes described in Bidell's External Privacy Policy including for the purpose of providing products and services described in this document. For further information, please refer to Bidell's External Privacy Policy, or contact Bidell's Privacy Office by phone at (403)235-5877.

Parts and Service Warranty Policy

Bidell Gas Compression warrants all workmanship for (3) months from time of repair on routine maintenance.

Bidell Gas Compression warrants all workmanship for (12) months from time of repair on all major overhauls whether completed in the field or in the shop.

Bidell Gas Compression warrants all new parts supplied by us to the extent of manufacturer's warranty against defects.

Customer Responsibilities

Engine must be maintained in accordance with published maintenance practices. Regular lube oil sampling must be performed and analyzed by a Bidell Gas Compression approved laboratory. Records of analysis must be made available to Bidell Gas Compression upon request. A Bidell Gas Compression representative must perform the initial 500-hour inspection.

Items not included

- All premiums, travel labour and truck kilometers.
- Any parts or components that were not fully inspected or replaced at time of overhaul and any machining or not-genuine replacement parts which were not approved by Bidell Gas Compression at time of overhaul.
- Performance complaints (including, but not limited to, lower power, poor fuel economy, etc.), unless caused by a failing or failed part.
- Fuel systems and final adjustments.
- Lubricating oil, coolant, filters, V-belts, hoses and other maintenance items replaced during any covered period unless such items are made unusable by a covered failure.
- Third party labour and expenses. Hiring of special cranes, hoists or other lifting devices to facilitate engine removal. Special transportation costs, (such as hotshot services, air freight, etc.)
- In no event will Bidell Gas Compression be responsible for consequential damages or loss of production as a result of a failure during a covered period.

BIDELL SERVICE TERMS AND CONDITIONS OF SALE

1. Quotation and Contract – The quotation from Bidell Gas Compression (hereinafter referred to as “Bidell”), is the document to which these terms and conditions are attached and apply. Other documents which are now or may be attached to or form part of the quotation, including addenda, specifications and drawings, and these terms and conditions, form an integral part of the quotation and resulting contract for the provision of parts or services to the Customer.

2. Conflicting Terms – These terms and conditions take priority over any conflicting terms of any contract or order issued, or other document forming part of the contract between the parties. No modifications of any order accepted by Bidell or these terms and conditions of sale shall be binding on Bidell unless specifically modified in writing and signed by an authorized representative of Bidell. All communications written and verbal, between the parties hereto with reference to the subject of the sale prior to the date of its acceptance are merged herein and this contract shall constitute the sole and entire agreement and contract between the parties as to the subject matter thereof.

3. Price – The final price for the sale of the goods or services shall be Bidell's quoted price as adjusted for any changes in scope or supply. The price is exclusive of all applicable Federal and Provincial custom tariffs, duties, sales taxes, value added taxes and other direct and similar taxes of every nature and kind whatsoever imposed. The risk of foreign currency exchange fluctuations in the cost of supplying parts shall be passed on to and assumed by the Customer.

4. Payment – Terms of payment shall be net cash within 30 days from the date of invoice, unless otherwise stated in the invoice. Invoices will be issued upon provision of service and/or upon each shipment of parts from the f.o.b. point. No holdbacks are applicable after delivery unless otherwise agreed to in writing by both parties. Payments not received by the due date shall be subject to interest at the prevailing rate on the outstanding balance until payment is received, plus any expenses incurred by Bidell in collecting overdue amounts.

5. Warranty – Bidell Service, warrants parts, rebuilt parts & service provided by Bidell to be free of defects in material or workmanship. This warranty is limited for a period of 90 days from the date of use or service, or 12 months from the date of shipment, whichever comes first.

5.1 Repair and Replacement – Bidell Parts and Service Warranty is limited to the repair or replacement of defective parts or components at Bidell's nearest repair facility. The warranty on replacement parts or services is limited in duration for a period of 90 days from the replacement date or the duration of the original warranty period, whichever is longer. Customer is responsible to pay for any transportation costs to and from a Bidell repair facility. Customer is also responsible to pay Bidell's out-of-pocket costs for transportation, lodging and subsistence, as well as additional and premium labour for any repairs taking place at other than Bidell repair facility and /or being performed outside of normal business hours.

5.2 Repairs Not Covered – This Warranty shall not apply to a rebuilt engine or power unit and any rebuilt parts used therein which in the opinion of Bidell have been damaged as a result of excessive loading, over or under speeding, heating, fire or abnormal combustion, ingestion of foreign materials, inadequate maintenance, misalignment, accident, improper installations, improper storage, improper use or any other condition or event not within the control of Bidell. Engine failures caused by REGROUND or CHROME PLATED crankshafts or failures caused by fatigue or outside force misalignment with other equipment are not covered by this Warranty. This Warranty does not obligate Bidell to provide “tune-up service” for any rebuilt engine or power unit.

5.3 Limited Warranty – The warranty provided herein by Bidell is the sole and exclusive warranty provided to the Customer and is in lieu of all other warranties, whether expressed or implied, including those found in the *Sale of Goods Act* (Alberta). Bidell is not responsible for any consequential, incidental, indirect or special damages whatsoever. In addition, Bidell shall not be liable for, including without limitation, lost revenues, downtime, diminished goodwill and damage to, or replacement of other equipment and property whether such damages are consequential, incidental, incidental, indirect or special, or otherwise. Bidell is not responsible for any punitive damages that may arise due to damage or loss.

5.4 Modifications and Repair by Others – Bidell shall not be responsible for modifications or repairs made by others unless Bidell authorizes such actions in writing prior to the time such modifications or repairs are made. Such modifications and repairs made by other than Bidell shall, unless authorized by Bidell, void Bidell's Parts and Service Warranty on the equipment.

5.5 Claims – All warranty claims must be filed with Bidell in writing within thirty (30) days after the claim arises.

6. Security Interest – The parts shall remain the property of Bidell until the price is fully paid, and the Customer hereby grants to Bidell a security interest in the parts (and all proceeds thereof) to secure the Customer's obligation to pay for the parts. Until the price of the parts is paid in full, the Customer covenants: (a) to keep the parts (or any proceeds thereof) free and clear of all security interests, mortgages, charges, liens and other encumbrances except as hereafter approved in writing by Bidell prior to their creation or assumption; (b) to pay Bidell all reasonable costs and expenses incurred in connection with enforcing Bidell security interests in the parts, or any other remedies which Bidell is entitled to exercise, and (c) not to sell, lease or otherwise dispose of the parts or any proceeds thereof, without prior written consent of Bidell. The parts shall be entirely at the Customer's risk and will be insured by the Customer with all loss payable to Bidell between the date of notification of readiness for the delivery by Bidell, and the date of full payment. In the event of default of any payment, the unpaid balance of the price shall become due and payable immediately, and Bidell may enter the premises where the parts are located and repossess them without further demand, and may resell them notwithstanding that a part of the price may have been paid. In the event of any such default, Bidell will be entitled to exercise any additional rights and remedies available to it at law, or in equity, or under the *Personal Property Security Act of Alberta*, or otherwise arising. The Customer waives the benefit of any laws which restrict Bidell from exercising the remedies

outlined herein and waives its right to receive a copy of a financing statement, financing charges statement, or a verification statement relating to the security interest granted herein.

7. Delivery and Completion – Delivery and completion dates in the quotation are approximate only and are subject to confirmation by Bidell within fifteen (15) days of time of order. Bidell may adjust delivery dates in its sole and unfettered discretion if, at any time during the currency of the contract, Bidell does not receive from the Customer in a timely fashion, all necessary information with respect to the parts or services. Upon notification of readiness to ship by Bidell, any delay of Customer accepting delivery shall cause storage charges for the Customer's account. If any parts are shipped in error, then Bidell's sole liability to Customer is to ship correct parts or materials f.o.b. original point of shipment as soon as such parts or material is available. This is Bidell's sole remedy for any shipment.

8. Substitutions and Additions – In the event that any drawings or specifications do not specify parts and/or specific services, Bidell shall be at liberty to utilize such materials and methods as it may deem advisable, consistent with reasonable industry practices. Any costs associated with additions, deletions or revisions to Bidell normal design required by local codes or their application or interpretation shall be for the Customer's account.

9. Intellectual Property – All right, title and interest in and to any intellectual property disclosed by, embedded in or necessary for the operation of the parts shall at all times remain with Bidell and its suppliers and Customer shall acquire no right whatsoever to all or any part of such intellectual property except the right to use same in connection with the operation of the parts.

10. Force Majeure – Failure on the part of Bidell to perform any contract of sale or deliver the service thereunder on or about the required date shall not constitute default, or give rise to claim for damages if caused by Force Majeure. Force Majeure includes acts of God, strikes, lockouts or other significant industrial disturbances, sabotage, fire, civil disturbances, explosions, breakage of or accidents to machinery, inability to obtain the necessary materials, parts or equipment, any legislative, administrative or judicial restrictions, road conditions, weather, or any other act, omission or event outside the control of Bidell, which could not have been prevented by the exercise of due diligence by Bidell. Bidell shall advise the Customer of any difficulty in performing under the contract by reason of Force Majeure and the parties shall agree to either cancel the contract as provided in Clause 10 or complete the contract with such adjustments as are reasonably compelled by the Force Majeure.

11. Cancellation and Delay – The contract shall not be subject to cancellation or delay by the Customer except with the written consent of Bidell. Customer's cancellation of contract is subject to a cancellation charge of 10% of the total price of the contract plus Bidell's actual expenses to which Bidell has become committed for fulfillment of the contract before notice of cancellation is received. In the event cancellation or delay is occasioned by the Customer, then the Customer shall indemnify and save harmless Bidell from all direct and indirect costs, losses, liabilities and commitments including loss of profit arising from the cancellation or delay.

12. Damages – Subject to the balance of the provisions of this clause, Bidell shall only be liable for the cost of replacement of any defective parts or services provided under this contract. Bidell shall not be liable to the Customer for any consequential, indirect or special damage whatsoever. In addition, Bidell shall not be liable for, including without limitation, loss of profits or revenue, loss of use of equipment and facilities, and claims by or payments to customers, suppliers or other parties who have a relationship with the Customer, whether such damages are consequential, indirect, special or otherwise. The disclaimer applies to consequential, indirect or special damages based on upon any cause of action whatever asserted against Bidell including causes of action arising out of any breach of warranty, express or applied, guarantee, product liability, negligence, tort, or any other cause pertaining to the performance or non-performance of this contract by Bidell. Bidell shall not be responsible for losses or damages arising out of the negligence of the Customer, its employees, agents or third party contractors. In no event will Bidell's maximum liability to the Customer in connection with this contract including without limitation resulting from breach of contract or any other performance or non-performance of this contract exceed the aggregate amount of the price paid to Bidell for the parts and services provided hereunder.

13. Applicable Laws and Forums – This contract shall be interpreted in accordance with and shall be governed by the laws of the *Province of Alberta*, and the parties agree that any disputes hereunder or with respect to this quotation or the resulting contract between the parties shall be determined exclusively by the Courts in the Province of Alberta and the parties hereby expressly attorn to the exclusive jurisdiction of the Courts in the Province of Alberta.

Parts and Service Warranty Policy

Bidell Gas Compression warrants all workmanship for (3) months from time of repair on routine maintenance.

Bidell Gas Compression warrants all workmanship for (12) months from time of repair on all major overhauls whether completed in the field or in the shop.

Bidell Gas Compression warrants all new parts supplied by us to the extent of manufacturer's warranty against defects.

Customer Responsibilities

Engine must be maintained in accordance with published maintenance practices. Regular lube oil sampling must be performed and analyzed by a Bidell Gas Compression approved laboratory. Records of analysis must be made available to Bidell Gas Compression upon request. A Bidell Gas Compression representative must perform the initial 500-hour inspection.

Items not included

- All premiums, travel labour and truck kilometers.
- Any parts of components that were not fully inspected or replaced at time of overhaul and any machining or not-genuine replacement parts which were not approved by Bidell Gas Compression at time of overhaul.
- Performance complaints (including, but not limited to, lower power, poor fuel economy, etc.), unless caused by a failing or failed part.
- Fuel systems and final adjustments.
- Lubricating oil, coolant, filters, V-belts, hoses and other maintenance items replaced during any covered period unless such items are made unusable by a covered failure.
- Third party labour and expenses. Hiring of special cranes, hoists or other lifting devices to facilitate engine removal. Special transportation costs, (such as hotshot services, air freight, etc.)
- In no event will Bidell Gas Compression be responsible for consequential damages or loss of production as a result of a failure during a covered period.

BIDELL SERVICE TERMS AND CONDITIONS OF SALE

1. **Quotation and Contract** – The quotation from Bidell Gas Compression (hereinafter referred to as "Bidell"), is the document to which these terms and conditions are attached and apply. Other documents which are now or may be attached to or form part of the quotation, including addenda, specifications and drawings, and these terms and conditions, form an integral part of the quotation and resulting contract for the provision of parts or services to the Customer.

2. **Conflicting Terms** – These terms and conditions take priority over any conflicting terms of any contract or order issued, or other document forming part of the contract between the parties. No modifications of any order accepted by Bidell or these terms and conditions of sale shall be binding on Bidell unless specifically modified in writing and signed by an authorized representative of Bidell. All communications written and verbal, between the parties hereto with reference to the subject of the sale prior to the date of its acceptance are merged herein and this contract shall constitute the sole and entire agreement and contract between the parties as to the subject matter thereof.

3. **Price** – The final price for the sale of the goods or services shall be Bidell's quoted price as adjusted for any changes in scope or supply. The price is exclusive of all applicable Federal and Provincial custom tariffs, duties, sales taxes, value added taxes and other direct and similar taxes of every nature and kind whatsoever imposed. The risk of foreign currency exchange fluctuations in the cost of supplying parts shall be passed on to and assumed by the Customer.

4. **Payment** – Terms of payment shall be net cash within 30 days from the date of invoice, unless otherwise stated in the invoice. Invoices will be issued upon provision of service and/or upon each shipment of parts from the f.o.b. point. No holdbacks are applicable after delivery unless otherwise agreed to in writing by both parties. Payments not received by the due date shall be subject to interest at the prevailing rate on the outstanding balance until payment is received, plus any expenses incurred by Bidell in collecting overdue amounts.

5. **Warranty** – Bidell Service, warrants parts, rebuilt parts & service provided by Bidell to be free of defects in material or workmanship. This warranty is limited for a period of 90 days from the date of use or service, or 12 months from the date of shipment, whichever comes first.

5.1 **Repair and Replacement** – Bidell Parts and Service Warranty is limited to the repair or replacement of defective parts or components at Bidell's nearest repair facility. The warranty on replacement parts or services is limited in duration for a period of 90 days from the replacement date or the duration of the original warranty period, whichever is longer. Customer is responsible to pay for any transportation costs to and from a Bidell repair facility. Customer is also responsible to pay Bidell's out-of-pocket costs for transportation, lodging and subsistence, as well as additional and premium labour for any repairs taking place at other than Bidell repair facility and /or being performed outside of normal business hours.

5.2 **Repairs Not Covered** – This Warranty shall not apply to a rebuilt engine or power unit and any rebuilt parts used therein which in the opinion of Bidell have been damaged as a result of excessive loading, over or under speeding, heating, fire or abnormal combustion, ingestion of foreign materials, inadequate maintenance, misalignment, accident, improper installations, improper storage, improper use or any other condition or event not within the control of Bidell. Engine failures caused by REGROUND or CHROME PLATED crankshafts or failures caused by fatigue or outside force misalignment with other equipment are not covered by this Warranty. This Warranty does not obligate Bidell to provide "tune-up service" for any rebuilt engine or power unit.

5.3 **Limited Warranty** – The warranty provided herein by Bidell is the sole and exclusive warranty provided to the Customer and is in lieu of all other warranties, whether expressed or implied, including those found in the *Sale of Goods Act* (Alberta). Bidell is not responsible for any consequential, incidental, indirect or special damages whatsoever. In addition, Bidell shall not be liable for, including without limitation, lost revenues, downtime, diminished goodwill and damage to, or replacement of other equipment and property whether such damages are consequential, incidental, incidental, indirect or special, or otherwise. Bidell is not responsible for any punitive damages that may arise due to damage or loss.

5.4 **Modifications and Repair by Others** – Bidell shall not be responsible for modifications or repairs made by others unless Bidell authorizes such actions in writing prior to the time such modifications or repairs are made. Such modifications and repairs made by other than Bidell shall, unless authorized by Bidell, void Bidell's Parts and Service Warranty on the equipment.

5.5 **Claims** – All warranty claims must be filed with Bidell in writing within thirty (30) days after the claim arises.

6. **Security Interest** – The parts shall remain the property of Bidell until the price is fully paid, and the Customer hereby grants to Bidell a security interest in the parts (and all proceeds thereof) to secure the Customer's obligation to pay for the parts. Until the price of the parts is paid in full, the Customer covenants: (a) to keep the parts (or any proceeds thereof) free and clear of all security interests, mortgages, charges, liens and other encumbrances except as hereafter approved in writing by Bidell prior to their creation or assumption; (b) to pay Bidell all reasonable costs and expenses incurred in connection with enforcing Bidell security interests in the parts, or any other remedies which Bidell is entitled to exercise, and (c) not to sell, lease or otherwise dispose of the parts or any proceeds thereof, without prior written consent of Bidell. The parts shall be entirely at the Customer's risk and will be insured by the Customer with all loss payable to Bidell between the date of notification of readiness for the delivery by Bidell, and the date of full payment. In the event of default of any payment, the unpaid balance of the price shall become due and payable immediately, and Bidell may enter the premises where the parts are located and repossess them without further demand, and may resell them notwithstanding that a part of the price may have been paid. In the event of any such default, Bidell will be entitled to exercise any additional rights and remedies available to it at law, or in equity, or under the *Personal Property Security Act of Alberta*, or otherwise arising. The Customer waives the benefit of any laws which restrict Bidell from exercising the remedies outlined herein and waives its right to receive a copy of a financing statement, financing charges statement, or a verification statement relating to the security interest granted herein.

7. **Delivery and Completion** – Delivery and completion dates in the quotation are approximate only and are subject to confirmation by Bidell within fifteen (15) days of time of order. Bidell may adjust delivery dates in its sole and unfettered discretion if, at any time during the currency of the contract, Bidell does not receive from the Customer in a timely fashion, all necessary information with respect to the parts or services. Upon notification of readiness to ship by Bidell, any delay of Customer accepting delivery shall cause storage charges for the Customer's account. If any parts are shipped in error, then Bidell's sole liability to Customer is to ship correct parts or materials f.o.b. original point of shipment as soon as such parts or material is available. This is Bidell's sole remedy for any shipment.

8. **Substitutions and Additions** – In the event that any drawings or specifications do not specify parts and/or specific services, Bidell shall be at liberty to utilize such materials and methods as it may deem advisable, consistent with reasonable industry practices. Any costs associated with additions, deletions or revisions to Bidell normal design required by local codes or their application or interpretation shall be for the Customer's account.

9. **Intellectual Property** – All right, title and interest in and to any intellectual property disclosed by, embedded in or necessary for the operation of the parts shall at all times remain with Bidell and its suppliers and Customer shall acquire no right whatsoever to all or any part of such intellectual property except the right to use same in connection with the operation of the parts.

10. **Force Majeure** – Failure on the part of Bidell to perform any contract of sale or deliver the service thereunder on or about the required date shall not constitute default, or give rise to claim for damages if caused by Force Majeure. Force Majeure includes acts of God, strikes, lockouts or other significant industrial disturbances, sabotage, fire, civil disturbances, explosions, breakage of or accidents to machinery, inability to obtain the necessary materials, parts or equipment, any legislative, administrative or judicial restrictions, road conditions, weather, or any other act, omission or event outside the control of Bidell, which could not have been prevented by the exercise of due diligence by Bidell. Bidell shall advise the Customer of any difficulty in performing under the contract by reason of Force Majeure and the parties shall agree to either cancel the contract as provided in Clause 10 or complete the contract with such adjustments as are reasonably compelled by the Force Majeure.

11. **Cancellation and Delay** – The contract shall not be subject to cancellation or delay by the Customer except with the written consent of Bidell. Customer's cancellation of contract is subject to a cancellation charge of 10% of the total price of the contract plus Bidell's actual expenses to which Bidell has become committed for fulfillment of the contract before notice of cancellation is received. In the event cancellation or delay is occasioned by the Customer, then the Customer shall indemnify and save harmless Bidell from all direct and indirect costs, losses, liabilities and commitments including loss of profit arising from the cancellation or delay.

12. **Damages** – Subject to the balance of the provisions of this clause, Bidell shall only be liable for the cost of replacement of any defective parts or services provided under this contract. Bidell shall not be liable to the Customer for any consequential, indirect or special damage whatsoever. In addition, Bidell shall not be liable for, including without limitation, loss of profits or revenue, loss of use of equipment and facilities, and claims by or payments to customers, suppliers or other parties who have a relationship with the Customer, whether such damages are consequential, indirect, special or otherwise. The disclaimer applies to consequential, indirect or special damages based on upon any cause of action whatever asserted against Bidell including causes of action arising out of any breach of warranty, express or applied, guarantee, product liability, negligence, tort, or any other cause pertaining to the performance or non-performance of this contract by Bidell. Bidell shall not be responsible for losses or damages arising out of the negligence of the Customer, its employees, agents or third party contractors. In no event will Bidell's maximum liability to the Customer in connection with this contract including without limitation resulting from breach of contract or any other performance or non-performance of this contract exceed the aggregate amount of the price paid to Bidell for the parts and services provided hereunder.

13. **Applicable Laws and Forums** – This contract shall be interpreted in accordance with and shall be governed by the laws of the *Province of Alberta*, and the parties agree that any disputes hereunder or with respect to this quotation or the resulting contract between the parties shall be determined exclusively by the Courts in the Province of Alberta and the parties hereby expressly attorn to the exclusive jurisdiction of the Courts in the Province of Alberta.

PRIVACY NOTICE: By requesting Bidell's products and services, or by supplying products and services to Bidell, you hereby consent to the collection, use and disclosure of your personal information for the purposes described in Bidell's External Privacy Policy including for the purpose of providing products and services described in this document. For further information, please refer to Bidell's External Privacy Policy, or contact Bidell's Privacy Office by phone at (403)235-5877.

Load parts and travel to site obtain permit and fill out JHA
Removed all valve covers and plugs. Found bad hole
Drain coolant remove head on cylinder # 2 left bank.
Installed new piston liner and head torqued con rod and checked for clearance all good. Torqued head to 345 ft/lbs
Drained oil, and set valves
Installed all spark plugs, coils and valve covers
Filled unit with new oil and old coolant (customer said use old coolant because they are going to flush system)
Started unit but unit would not load up. Removed air cleaners and found left turbo not spinning
Shut unit down free up turbo and started unit needs new turbos ordered parts
Cleaned up and traveled home

Assisted By: Krls

BIDELL SERVICE TERMS AND CONDITIONS OF SALE

1. **Quotation and Contract** – The quotation from Bidell Gas Compression (hereinafter referred to as “Bidell”), is the document to which these terms and conditions are attached and apply. Other documents which are now or may be attached to or form part of the quotation, including addenda, specifications and drawings, and these terms and conditions, form an integral part of the quotation and resulting contract for the provision of parts or services to the Customer.

2. **Conflicting Terms** – These terms and conditions take priority over any conflicting terms of any contract or order issued, or other document forming part of the contract between the parties. No modifications of any order accepted by Bidell or these terms and conditions of sale shall be binding on Bidell unless specifically modified in writing and signed by an authorized representative of Bidell. All communications written and verbal, between the parties hereto with reference to the subject of the sale prior to the date of its acceptance are merged herein and this contract shall constitute the sole and entire agreement and contract between the parties as to the subject matter thereof.

3. **Price** – The final price for the sale of the goods or services shall be Bidell’s quoted price as adjusted for any changes in scope or supply. The price is exclusive of all applicable Federal and Provincial custom tariffs, duties, sales taxes, value added taxes and other direct and similar taxes of every nature and kind whatsoever imposed. The risk of foreign currency exchange fluctuations in the cost of supplying parts shall be passed on to and assumed by the Customer.

4. **Payment** – Terms of payment shall be net cash within 30 days from the date of invoice, unless otherwise stated in the invoice. Invoices will be issued upon provision of service and/or upon each shipment of parts from the f.o.b. point. No holdbacks are applicable after delivery unless otherwise agreed to in writing by both parties. Payments not received by the due date shall be subject to interest at the prevailing rate on the outstanding balance until payment is received, plus any expenses incurred by Bidell in collecting overdue amounts.

5. **Warranty** – Bidell Service, warrants parts, rebuilt parts & service provided by Bidell to be free of defects in material or workmanship. This warranty is limited for a period of 90 days from the date of use or service, or 12 months from the date of shipment, whichever comes first.

5.1 **Repair and Replacement** – Bidell Parts and Service Warranty is limited to the repair or replacement of defective parts or components at Bidell’s nearest repair facility. The warranty on replacement parts or services is limited in duration for a period of 90 days from the replacement date or the duration of the original warranty period, whichever is longer. Customer is responsible to pay for any transportation costs to and from a Bidell repair facility. Customer is also responsible to pay Bidell’s out-of-pocket costs for transportation, lodging and subsistence, as well as additional and premium labour for any repairs taking place at other than Bidell repair facility and /or being performed outside of normal business hours.

5.2 **Repairs Not Covered** – This Warranty shall not apply to a rebuilt engine or power unit and any rebuilt parts used therein which in the opinion of Bidell have been damaged as a result of excessive loading, over or under speeding, heating, fire or abnormal combustion, ingestion of foreign materials, inadequate maintenance, misalignment, accident, improper installations, improper storage, improper use or any other condition or event not within the control of Bidell. Engine failures caused by REGROUND or CHROME PLATED crankshafts or failures caused by fatigue or outside force misalignment with other equipment are not covered by this Warranty. This Warranty does not obligate Bidell to provide “tune-up service” for any rebuilt engine or power unit.

5.3 **Limited Warranty** – The warranty provided herein by Bidell is the sole and exclusive warranty provided to the Customer and is in lieu of all other warranties, whether expressed or implied, including those found in the *Sale of Goods Act* (Alberta). Bidell is not responsible for any consequential, incidental, indirect or special damages whatsoever. In addition, Bidell shall not be liable for, including without limitation, lost revenues, downtime, diminished goodwill and damage to, or replacement of other equipment and property whether such damages are consequential, incidental, incidental, indirect or special, or otherwise. Bidell is not responsible for any punitive damages that may arise due to damage or loss.

5.4 **Modifications and Repair by Others** – Bidell shall not be responsible for modifications or repairs made by others unless Bidell authorizes such actions in writing prior to the time such modifications or repairs are made. Such modifications and repairs made by other than Bidell shall, unless authorized by Bidell, void Bidell’s Parts and Service Warranty on the equipment.

5.5 **Claims** – All warranty claims must be filed with Bidell in writing within thirty (30) days after the claim arises.

6. **Security Interest** – The parts shall remain the property of Bidell until the price is fully paid, and the Customer hereby grants to Bidell a security interest in the parts (and all proceeds thereof) to secure the Customer’s obligation to pay for the parts. Until the price of the parts is paid in full, the Customer covenants: (a) to keep the parts (or any proceeds thereof) free and clear of all security interests, mortgages, charges, liens and other encumbrances except as hereafter approved in writing by Bidell prior to their creation or assumption; (b) to pay Bidell all reasonable costs and expenses incurred in connection with enforcing Bidell security interests in the parts, or any other remedies which Bidell is entitled to exercise, and (c) not to sell, lease or otherwise dispose of the parts or any proceeds thereof, without prior written consent of Bidell. The parts shall be entirely at the Customer’s risk and will be insured by the Customer with all loss payable to Bidell between the date of notification of readiness for the delivery by Bidell, and the date of full payment. In the event of default of any payment, the unpaid balance of the price shall become due and payable immediately, and Bidell may enter the premises where the parts are located and repossess them without further demand, and may resell them notwithstanding that a part of the price may have been paid. In the event of any such default, Bidell will be entitled to exercise any additional rights and remedies available to it at law, or in equity, or under the *Personal Property Security Act of Alberta*, or otherwise arising. The Customer waives the benefit of any laws which restrict Bidell from exercising the remedies outlined herein and waives its right to receive a copy of a financing statement, financing charges statement, or a verification statement relating to the security interest granted herein.

7. **Delivery and Completion** – Delivery and completion dates in the quotation are approximate only and are subject to confirmation by Bidell within fifteen (15) days of time of order. Bidell may adjust delivery dates in its sole and unfettered discretion if, at any time during the currency of the contract, Bidell does not receive from the Customer in a timely fashion, all necessary information with respect to the parts or services. Upon notification of readiness to ship by Bidell, any delay of Customer accepting delivery shall cause storage charges for the Customer’s account. If any parts are shipped in error, then Bidell’s sole liability to Customer is to ship correct parts or materials f.o.b. original point of shipment as soon as such parts or material is available. This is Bidell’s sole remedy for any shipment.

8. **Substitutions and Additions** – In the event that any drawings or specifications do not specify parts and/or specific services, Bidell shall be at liberty to utilize such materials and methods as it may deem advisable, consistent with reasonable industry practices. Any costs associated with additions, deletions or revisions to Bidell normal design required by local codes or their application or interpretation shall be for the Customer’s account.

9. **Intellectual Property** – All right, title and interest in and to any intellectual property disclosed by, embedded in or necessary for the operation of the parts shall at all times remain with Bidell and its suppliers and Customer shall acquire no right whatsoever to all or any part of such intellectual property except the right to use same in connection with the operation of the parts.

10. **Force Majeure** – Failure on the part of Bidell to perform any contract of sale or deliver the service thereunder on or about the required date shall not constitute default, or give rise to claim for damages if caused by Force Majeure. Force Majeure includes acts of God, strikes, lockouts or other significant industrial disturbances, sabotage, fire, civil disturbances, explosions, breakage of or accidents to machinery, inability to obtain the necessary materials, parts or equipment, any legislative, administrative or judicial restrictions, road conditions, weather, or any other act, omission or event outside the control of Bidell, which could not have been prevented by the exercise of due diligence by Bidell. Bidell shall advise the Customer of any difficulty in performing under the contract by reason of Force Majeure and the parties shall agree to either cancel the contract as provided in Clause 10 or complete the contract with such adjustments as are reasonably compelled by the Force Majeure.

11. **Cancellation and Delay** – The contract shall not be subject to cancellation or delay by the Customer except with the written consent of Bidell. Customer’s cancellation of contract is subject to a cancellation charge of 10% of the total price of the contract plus Bidell’s actual expenses to which Bidell has become committed for fulfillment of the contract before notice of cancellation is received. In the event cancellation or delay is occasioned by the Customer, then the Customer shall indemnify and save harmless Bidell from all direct and indirect costs, losses, liabilities and commitments including loss of profit arising from the cancellation or delay.

12. **Damages** – Subject to the balance of the provisions of this clause, Bidell shall only be liable for the cost of replacement of any defective parts or services provided under this contract. Bidell shall not be liable to the Customer for any consequential, indirect or special damage whatsoever. In addition, Bidell shall not be liable for, including without limitation, loss of profits or revenue, loss of use of equipment and facilities, and claims by or payments to customers, suppliers or other parties who have a relationship with the Customer, whether such damages are consequential, indirect, special or otherwise. The disclaimer applies to consequential, indirect or special damages based on upon any cause of action whatever asserted against Bidell including causes of action arising out of any breach of warranty, express or applied, guarantee, product liability, negligence, tort, or any other cause pertaining to the performance or non-performance of this contract by Bidell. Bidell shall not be responsible for losses or damages arising out of the negligence of the Customer, its employees, agents or third party contractors. In no event will Bidell’s maximum liability to the Customer in connection with this contract including without limitation resulting from breach of contract or any other performance or non-performance of this contract exceed the aggregate amount of the price paid to Bidell for the parts and services provided hereunder.

13. **Applicable Laws and Forums** – This contract shall be interpreted in accordance with and shall be governed by the laws of the *Province of Alberta*, and the parties agree that any disputes hereunder or with respect to this quotation or the resulting contract between the parties shall be determined exclusively by the Courts in the Province of Alberta and the parties hereby expressly attorn to the exclusive jurisdiction of the Courts in the Province of Alberta.

PRIVACY NOTICE: By requesting Bidell’s products and services, or by supplying products and services to Bidell, you hereby consent to the collection, use and disclosure of your personal information for the purposes described in Bidell’s External Privacy Policy including for the purpose of providing products and services described in this document. For further information, please refer to Bidell’s External Privacy Policy, or contact Bidell’s Privacy Office by phone at (403)235-5877.

Parts and Service Warranty Policy

Bidell Gas Compression warrants all workmanship for (3) months from time of repair on routine maintenance.

Bidell Gas Compression warrants all workmanship for (12) months from time of repair on all major overhauls whether completed in the field or in the shop.

Bidell Gas Compression warrants all new parts supplied by us to the extent of manufacturer's warranty against defects.

Customer Responsibilities

Engine must be maintained in accordance with published maintenance practices. Regular lube oil sampling must be performed and analyzed by a Bidell Gas Compression approved laboratory. Records of analysis must be made available to Bidell Gas Compression upon request. A Bidell Gas Compression representative must perform the initial 500-hour inspection.

Items not included

- All premiums, travel labour and truck kilometers.
- Any parts or components that were not fully inspected or replaced at time of overhaul and any machining or not-genuine replacement parts which were not approved by Bidell Gas Compression at time of overhaul.
- Performance complaints (including, but not limited to, lower power, poor fuel economy, etc.), unless caused by a failing or failed part.
- Fuel systems and final adjustments.
- Lubricating oil, coolant, filters, V-belts, hoses and other maintenance items replaced during any covered period unless such items are made unusable by a covered failure.
- Third party labour and expenses. Hiring of special cranes, hoists or other lifting devices to facilitate engine removal. Special transportation costs, (such as hotshot services, air freight, etc.)
- In no event will Bidell Gas Compression be responsible for consequential damages or loss of production as a result of a failure during a covered period.

BIDELL SERVICE TERMS AND CONDITIONS OF SALE

1. **Quotation and Contract** – The quotation from Bidell Gas Compression (hereinafter referred to as “Bidell”), is the document to which these terms and conditions are attached and apply. Other documents which are now or may be attached to or form part of the quotation, including addenda, specifications and drawings, and these terms and conditions, form an integral part of the quotation and resulting contract for the provision of parts or services to the Customer.
2. **Conflicting Terms** – These terms and conditions take priority over any conflicting terms of any contract or order issued, or other document forming part of the contract between the parties. No modifications of any order accepted by Bidell or these terms and conditions of sale shall be binding on Bidell unless specifically modified in writing and signed by an authorized representative of Bidell. All communications written and verbal, between the parties hereto with reference to the subject of the sale prior to the date of its acceptance are merged herein and this contract shall constitute the sole and entire agreement and contract between the parties as to the subject matter thereof.
3. **Price** – The final price for the sale of the goods or services shall be Bidell's quoted price as adjusted for any changes in scope or supply. The price is exclusive of all applicable Federal and Provincial custom tariffs, duties, sales taxes, value added taxes and other direct and similar taxes of every nature and kind whatsoever imposed. The risk of foreign currency exchange fluctuations in the cost of supplying parts shall be passed on to and assumed by the Customer.
4. **Payment** – Terms of payment shall be net cash within 30 days from the date of invoice, unless otherwise stated in the invoice. Invoices will be issued upon provision of service and/or upon each shipment of parts from the f.o.b. point. No holdbacks are applicable after delivery unless otherwise agreed to in writing by both parties. Payments not received by the due date shall be subject to interest at the prevailing rate on the outstanding balance until payment is received, plus any expenses incurred by Bidell in collecting overdue amounts.
5. **Warranty** – Bidell Service, warrants parts, rebuilt parts & service provided by Bidell to be free of defects in material or workmanship. This warranty is limited for a period of 90 days from the date of use or service, or 12 months from the date of shipment, whichever comes first.
 - 5.1 **Repair and Replacement** – Bidell Parts and Service Warranty is limited to the repair or replacement of defective parts or components at Bidell's nearest repair facility. The warranty on replacement parts or services is limited in duration for a period of 90 days from the replacement date or the duration of the original warranty period, whichever is longer. Customer is responsible to pay for any transportation costs to and from a Bidell repair facility. Customer is also responsible to pay Bidell's out-of-pocket costs for transportation, lodging and subsistence, as well as additional and premium labour for any repairs taking place at other than Bidell repair facility and /or being performed outside of normal business hours.
 - 5.2 **Repairs Not Covered** – This Warranty shall not apply to a rebuilt engine or power unit and any rebuilt parts used therein which in the opinion of Bidell have been damaged as a result of excessive loading, over or under speeding, heating, fire or abnormal combustion, ingestion of foreign materials, inadequate maintenance, misalignment, accident, improper installations, improper storage, improper use or any other condition or event not within the control of Bidell. Engine failures caused by REGROUND or CHROME PLATED crankshafts or failures caused by fatigue or outside force misalignment with other equipment are not covered by this Warranty. This Warranty does not obligate Bidell to provide “tune-up service” for any rebuilt engine or power unit.
 - 5.3 **Limited Warranty** – The warranty provided herein by Bidell is the sole and exclusive warranty provided to the Customer and is in lieu of all other warranties, whether expressed or implied, including those found in the *Sale of Goods Act* (Alberta). Bidell is not responsible for any consequential, incidental, indirect or special damages whatsoever. In addition, Bidell shall not be liable for, including without limitation, lost revenues, downtime, diminished goodwill and damage to, or replacement of other equipment and property whether such damages are consequential, incidental, incidental, indirect or special, or otherwise. Bidell is not responsible for any punitive damages that may arise due to damage or loss.
 - 5.4 **Modifications and Repair by Others** – Bidell shall not be responsible for modifications or repairs made by others unless Bidell authorizes such actions in writing prior to the time such modifications or repairs are made. Such modifications and repairs made by other than Bidell shall, unless authorized by Bidell, void Bidell's Parts and Service Warranty on the equipment.
 - 5.5 **Claims** – All warranty claims must be filed with Bidell in writing within thirty (30) days after the claim arises.
6. **Security Interest** – The parts shall remain the property of Bidell until the price is fully paid, and the Customer hereby grants to Bidell a security interest in the parts (and all proceeds thereof) to secure the Customer's obligation to pay for the parts. Until the price of the parts is paid in full, the Customer covenants: (a) to keep the parts (or any proceeds thereof) free and clear of all security interests, mortgages, charges, liens and other encumbrances except as hereafter approved in writing by Bidell prior to their creation or assumption; (b) to pay Bidell all reasonable costs and expenses incurred in connection with enforcing Bidell security interests in the parts, or any other remedies which Bidell is entitled to exercise, and (c) not to sell, lease or otherwise dispose of the parts or any proceeds thereof, without prior written consent of Bidell. The parts shall be entirely at the Customer's risk and will be insured by the Customer with all loss payable to Bidell between the date of notification of readiness for the delivery by Bidell, and the date of full payment. In the event of default of any payment, the unpaid balance of the price shall become due and payable immediately, and Bidell may enter the premises where the parts are located and repossess them without further demand, and may resell them notwithstanding that a part of the price may have been paid. In the event of any such default, Bidell will be entitled to exercise any additional rights and remedies available to it at law, or in equity, or under the *Personal Property Security Act of Alberta*, or otherwise arising. The Customer waives the benefit of any laws which restrict Bidell from exercising the remedies outlined herein and waives its right to receive a copy of a financing statement, financing charges statement, or a verification statement relating to the security interest granted herein.
7. **Delivery and Completion** – Delivery and completion dates in the quotation are approximate only and are subject to confirmation by Bidell within fifteen (15) days of time of order. Bidell may adjust delivery dates in its sole and unfettered discretion if, at any time during the currency of the contract, Bidell does not receive from the Customer in a timely fashion, all necessary information with respect to the parts or services. Upon notification of readiness to ship by Bidell, any delay of Customer accepting delivery shall cause storage charges for the Customer's account. If any parts are shipped in error, then Bidell's sole liability to Customer is to ship correct parts or materials f.o.b. original point of shipment as soon as such parts or material is available. This is Bidell's sole remedy for any shipment.

8. **Substitutions and Additions** – In the event that any drawings or specifications are not specified parts and/or specific services, Bidell shall be at liberty to utilize such materials and methods as it may deem advisable, consistent with reasonable industry practices. Any costs associated with additions, deletions or revisions to Bidell normal design required by local codes or their application or interpretation shall be for the Customer's account.
9. **Intellectual Property** – All right, title and interest in and to any intellectual property disclosed by, embedded in or necessary for the operation of the parts shall at all times remain with Bidell and its suppliers and Customer shall acquire no right whatsoever to all or any part of such intellectual property except the right to use same in connection with the operation of the parts.
10. **Force Majeure** – Failure on the part of Bidell to perform any contract of sale or deliver the service thereunder on or about the required date shall not constitute default, or give rise to claim for damages if caused by Force Majeure. Force Majeure includes acts of God, strikes, lockouts or other significant industrial disturbances, sabotage, fire, civil disturbances, explosions, breakage of or accidents to machinery, inability to obtain the necessary materials, parts or equipment, any legislative, administrative or judicial restrictions, road conditions, weather, or any other act, omission or event outside the control of Bidell, which could not have been prevented by the exercise of due diligence by Bidell. Bidell shall advise the Customer of any difficulty in performing under the contract by reason of Force Majeure and the parties shall agree to either cancel the contract as provided in Clause 10 or complete the contract with such adjustments as are reasonably compelled by the Force Majeure.
11. **Cancellation and Delay** – The contract shall not be subject to cancellation or delay by the Customer except with the written consent of Bidell. Customer's cancellation of contract is subject to a cancellation charge of 10% of the total price of the contract plus Bidell's actual expenses to which Bidell has become committed for fulfillment of the contract before notice of cancellation is received. In the event cancellation or delay is occasioned by the Customer, then the Customer shall indemnify and save harmless Bidell from all direct and indirect costs, losses, liabilities and commitments including loss of profit arising from the cancellation or delay.
12. **Damages** – Subject to the balance of the provisions of this clause, Bidell shall only be liable for the cost of replacement of any defective parts or services provided under this contract. Bidell shall not be liable to the Customer for any consequential, indirect or special damage whatsoever. In addition, Bidell shall not be liable for, including without limitation, loss of profits or revenue, loss of use of equipment and facilities, and claims by or payments to customers, suppliers or other parties who have a relationship with the Customer, whether such damages are consequential, indirect, special or otherwise. The disclaimer applies to consequential, indirect or special damages based on upon any cause of action whatever asserted against Bidell including causes of action arising out of any breach of warranty, express or applied, guarantee, product liability, negligence, tort, or any other cause pertaining to the performance or non-performance of this contract by Bidell. Bidell shall not be responsible for losses or damages arising out of the negligence of the Customer, its employees, agents or third party contractors. In no event will Bidell's maximum liability to the Customer in connection with this contract including without limitation resulting from breach of contract or any other performance or non-performance of this contract exceed the aggregate amount of the price paid to Bidell for the parts and services provided hereunder.
13. **Applicable Laws and Forums** – This contract shall be interpreted in accordance with and shall be governed by the laws of the *Province of Alberta*, and the parties agree that any disputes hereunder or with respect to this quotation or the resulting contract between the parties shall be determined exclusively by the Courts in the Province of Alberta and the parties hereby expressly attorn to the exclusive jurisdiction of the Courts in the Province of Alberta.

PRIVACY NOTICE: By requesting Bidell's products and services, or by supplying products and services to Bidell, you hereby consent to the collection, use and disclosure of your personal information for the purposes described in Bidell's External Privacy Policy including for the purpose of providing products and services described in this document. For further information, please refer to Bidell's External Privacy Policy, or contact Bidell's Privacy Office by phone at (403)235-5877.

Parts and Service Warranty Policy

Bidell Gas Compression warrants all workmanship for (3) months from time of repair on routine maintenance.

Bidell Gas Compression warrants all workmanship for (12) months from time of repair on all major overhauls whether completed in the field or in the shop.

Bidell Gas Compression warrants all new parts supplied by us to the extent of manufacturer's warranty against defects.

Customer Responsibilities

Engine must be maintained in accordance with published maintenance practices. Regular lube oil sampling must be performed and analyzed by a Bidell Gas Compression approved laboratory. Records of analysis must be made available to Bidell Gas Compression upon request. A Bidell Gas Compression representative must perform the initial 500-hour inspection.

Items not included

- All premiums, travel labour and truck kilometers.
- Any parts of components that were not fully inspected or replaced at time of overhaul and any machining or not-genuine replacement parts which were not approved by Bidell Gas Compression at time of overhaul.
- Performance complaints (including, but not limited to, lower power, poor fuel economy, etc.), unless caused by a failing or failed part.
- Fuel systems and final adjustments.
- Lubricating oil, coolant, filters, V-belts, hoses and other maintenance items replaced during any covered period unless such items are made unusable by a covered failure.
- Third party labour and expenses. Hiring of special cranes, hoists or other lifting devices to facilitate engine removal. Special transportation costs, (such as hotshot services, air freight, etc.)
- In no event will Bidell Gas Compression be responsible for consequential damages or loss of production as a result of a failure during a covered period.

Work Completed:

Pre trip inspection at FSJ Bidell, gather tooling and supplies. Travel from FSJ out to location and meet with Operator. Build Permits Jsa and head over to Unit. Unit is currently down on low oil level. Fill driver with oil, Prelube and adjust, replace both crankcase breathers and rebuild raycore diaphragm. Start and idle unit, monitor temps and pressures, found unit running on all cylinders but suspect left turbo has failed. Shut Unit down and check turbos, found that the left bank turbo oil seal has failed and the right bank turbo has excessive play and should be inspected.

Lock Unit out and depressure, remove both turbos so they can be replaced in the am. Left bank had a failed oil seal and right bank has had something go through it from previous failure.

Clean workspace and tools, order parts and travel from location back to FSJ.

Work Completed:

Pre trip inspection at FSJ Bidell, gather parts, tooling, and supplies. Travel from FSJ out to location. Meet with Operator and build Permits/Jsa. Head over to Unit and install new left and right turbo cartridges (pre-lubed and verified oil flowing), set up frost fighter and warm Unit to temp so it can be started.

Start and idle Unit to temp (Unit was hard starting due to cold temp and poor cranking speed). Load Unit with current gas available and allow exhaust to burn off remainder of oil. Once Unit got up to temp it was performing with good stability and power, operator brought on remaining wells to load Unit 100% of its normal capacity. Unit was able to carry all the extra load without issue. (500kpa suction 5200Kpa discharge @ 34"hg manifold 10"reserve approx 7.6-8.1% O2). Recommend rechecking tune after Unit has ran long enough to clear oil from exhaust (possible O2 sensor recal/replace due to oil contamination). Noticed #7 cylinder showing higher than normal exhaust temp, recommend compression test/borescope (possible valve train issue). Will have to monitor closely over the next day.

Clean workspace and tools, fill out paperwork and reports, get signatures and travel from location back to FSJ.

Work Completed:

Prep load tools into border truck, travel to site, sign onto permits, shut down, reseal leaking fuel gas piping, install new breather clamps, reseal hydraulic pump fittings, reseal hydraulic control valve, replace faulty pyros, replace compressor crankcase breather and reseal loose piping, start unit and monitor, clean up and travel back to fsj. Get call unit is smoking badly, travel back to site, found unit burning oil and detonating, shut down, inspect turbos found oil from crankcase breather being drawn through turbos. measure crankcase pressure had -5.5inH2O. found filter saturated and not draining back to crankcase. inspect breather diaphragm found saturated and folded over on itself causing excessive vacuum. Blow through drain lines. clean out fuel gas regulator that was full of oil. start unit, do all running checks all good. unit still smoking due to exhaust being full of oil. clean up and travel back to fsj. unload border truck, do paperwork.

Wait for parts load and prep boarder jumper. Travel to site, Permit, JHA and lock outs. Change out dressers on fuel gas pipe to carb, change out relief valves on hyd fan block, replaced o rings on hyd pump fittings. Replaced breather on compressor crank case, re pipe sealed compressor crank case fill tube piping. Re sealed explosion doors, and new clamps on ccv breather filters on cylinders 1&2. Fired up machine and monitored for leaks, found Hyd lines from pump leaking from crimps. hoses faulty. Measurements made. Unit operating normally. Travel back to town. Get call from rob. Unit blowing blue smoke, load up more parts and tools travel back to site. Monitor and do running checks found ccv filter box full of oil, drained and changed filter, ran and monitored, lots of oil through system still blowing smoke, adjusted venturi and crank case pressure to acceptable level, engine running smoth but still smoking. found diaphram in ccv filter assembly rolled over and failed, parts ordered all filters on ccv system and rebuild kit. travel back to shop. Unload truck and do paperwork.

Pick up parts and travel to location. Sign in. Sign on permit. Unit has hyd fan speed issues and alarms. Try adjusting motor control and pump pressure to achieve pump speed. Motor is by passing. Shut unit down and lock out. Replace hyd fan motor. Unlock unit and go to start. Stater amot valve is stuck. Lock out start gas. Disassemble and clean valve. Check engine oil level. Kenco is over full. Found oil sensing line to kenco from crank case was plugged. It was plugged due to breather system drain being tied in to same line. Blow out line. Adjust Kenco height. Breather filter should be raised and drain repositioned. Engine was really low on oil. Add 1 1/2 barrels of oil. Start up engine. Set cooler fan speed and operating psi. Engine has a 100 rpm surge and Detonation alarms. Set waste gate reserve. Engine leveled out. Calibrate O2 sensor. Hook up testo. Set emissions and tune governor. Detonation and engine alarms clear. Monitor unit at full load. Everything ok. Fire detection alarm is on in panel. Clean up site. Sign out and return to GP.

Pre trip inspection at FSJ Bldell. Gather service kit and pick up new starter from hoerbigger, travel from FSJ out to location. Meet with operator Tim and build Permits/Jsa. Unit went down on under speed and now won't restart. Operator says it cranked over but then powered out and can hear gas hissing in the starter. Operator has verified unit Barres by hand.

Attempt to start unit and found the starter just powered out like the operator had said (Start gas pressure holding), Remove and replace the starter, the old starter looked gummy inside. Attempt to start the Unit again and found no improvement. Manually bar the engine through 360° and found it could not be barred over completely. Suspect the Driver or Compressor has had a failure.

Lock Unit out and put locks on Lock Box, pull side doors and two valves per cylinder on the compressor to inspect for damage, cylinders looked wet but had no damage and the crosshead pins spin freely. Pull plugs on the driver to inspect for damage and found that Left Bank #8 plug would not come out (dropped valve).

Drain the main cooling system, and remove Left Bank #8 head, found it has 3 dropped valves and the piston and liner are both destroyed. (Will require a power pack) order parts for the am. Reassemble the compressor and torque all to spec, clean and prep the driver for a new Left Bank #8 power pack in the am. Will then run the unit and get up to temp, suspect that the left bank turbo will need to be replaced due to the debris and will need replaced also after boosting. At that point the unit can be shut down and dump oil and filters while the turbo is being replaced.

Clean workspace and tools, check out and travel from location back to FSJ. Stop at Bldell to gather parts and tooling for the am.

Pre trip inspection at FSJ Bidell, gather parts and load up. Travel from FSJ out to location and meet with Operator Tim, sign onto permits/Jsa and verify lock out. Unload parts and set up tooling. Remove Left Bank #8 piston and liner assembly, clean all parts and prep for reassembly.

Install new Left Bank #8 power pack, install new Left Bank #8 head. Set bridges and lash valves, replace driver oil filters, replace plugs and service transformers, check air cleaners, check belts, Fill Unit with coolant and check for leaks (none), Fill Unit with oil and prelube and adjust.

Pull locks, purge Unit and ready for a start, start and idle unit to temp, monitor temps and pressures (good). Put a slight load on the unit to check boost and reserve and found that the Left Bank Turbo is making chirping noise and reserve is low. Left Bank Turbo needs to be replaced, will run the unit at a light load for the night to clear exhaust and come back in the am to replace turbo and tune.

Clean workspace and tools, fill out paperwork and reports, get signatures and coding, check out and travel from location back to FSJ.

Install new Left Bank #8 power pack, install new Left Bank #8 head. Start service, lash valves, replace engine oil filters, new plugs and clean transformers, check air cleaners, check belts, Fill Unit with coolant and check for leaks, Fill Unit with oil prelube

Pull locks, purge Unit and ready for a start, start and idle unit to temp, monitor temps and pressures. Put a slight load on the unit to check boost and reserve and found that the Left Bank Turbo is making chirping noise and reserve is low. Left Bank turbo will need to be swapped out, left unit running with a light load for the night to clear exhaust and come back in the am to replace turbo and complete service, Clean work area and tools, fill out paperwork, travel back to FSJ.

Assisted By: Mr Martin Hogg

Road

Conditions: Good

Temp: 17°C

Work Performed: ☒ Field ☐ Shop

Pre trip inspection at FSJ Bidell, gather parts and load up. Travel from FSJ out to location and meet with Operator Tim, sign onto permits/Jsa.

Head over to Unit and shutdown and lotto, remove and replace left bank turbo (fins on the hot side we're all damaged), check fan pitch, good at summer 20.0. Restart and warm Unit to temp, bring Unit online at reduced load due to current process conditions, perform running checks, unit running with good stability and power.

Clean workspace and tools, fill out paperwork and reports, get signatures and coding, check out and travel from location back to FSJ.
