Shorter journeys are more efficient on an electric bike than a car as the electric bike requires less power to travel the same distance (the electric bicycle has a more efficient power transfer). They can also access areas and require less space to maneuver making them a good way to relieve congestion around city hubs.

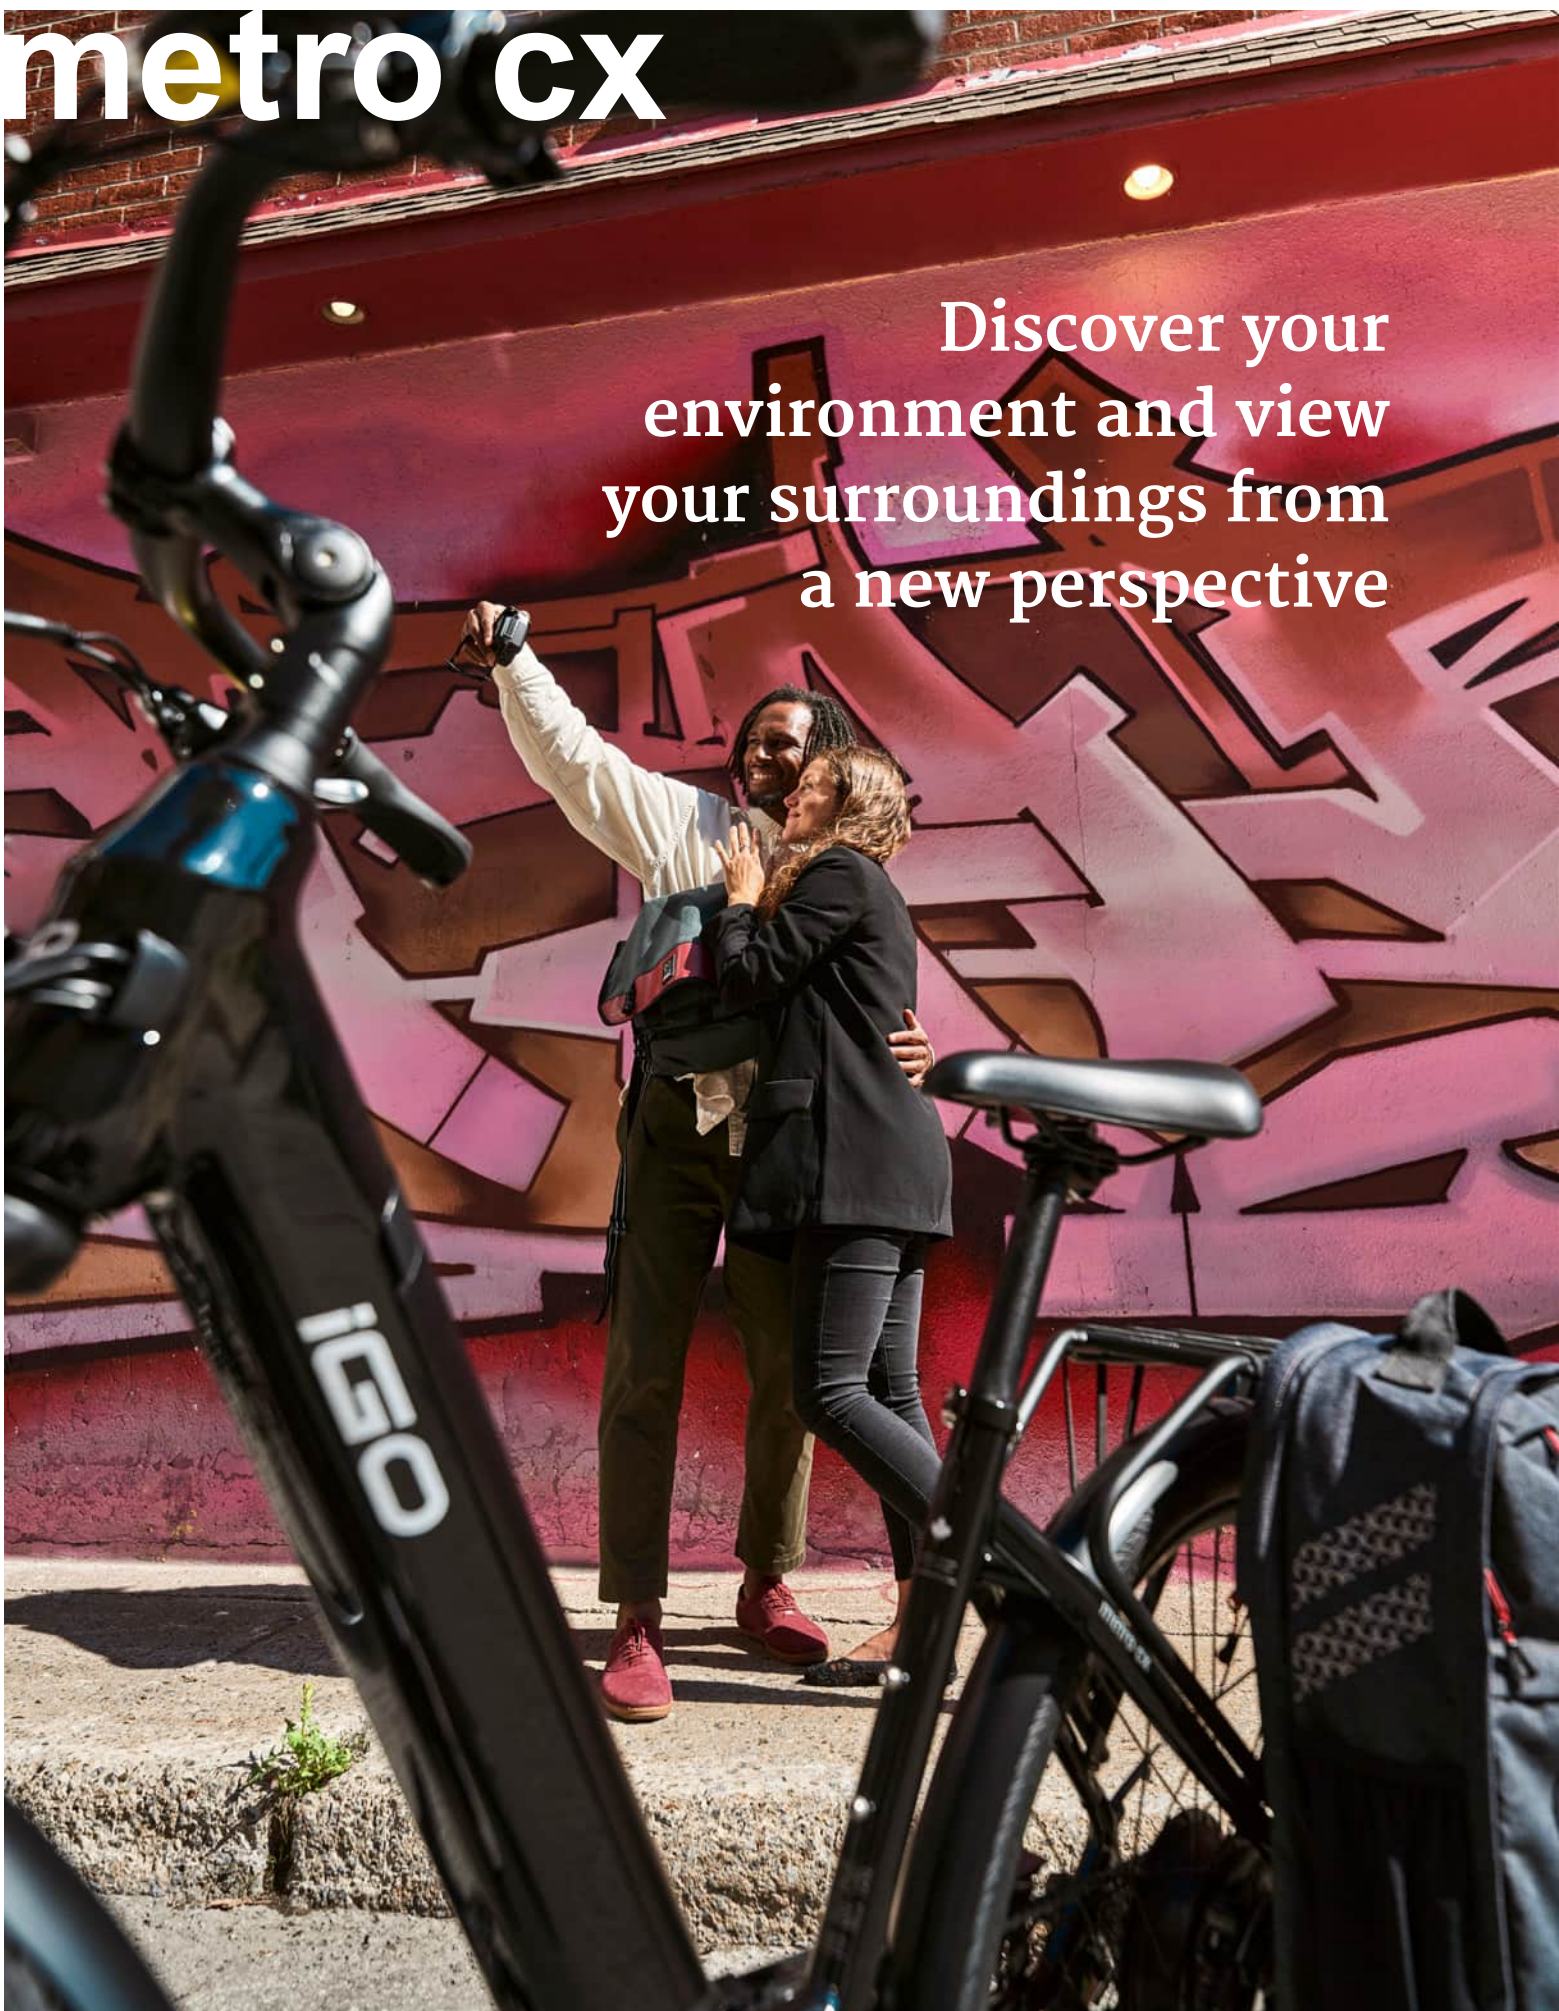

An electric bike is not restricted to a schedule like a bus or train allowing the rider freedom to move where and when they want and at their own pace.

As an amazingly affordable entry into eBikes the Metro CX delivers a level of excellence that can seem unbelievable.

ENVIRONMENT

A true zero emission vehicle with exceptionally low running costs. iGO are proud to present the Metro CX as an affordable option to aid in the ongoing and essential transition to electric vehicles use in North America.

Using vehicles that do not emit carbon by-products is one of the best ways to ensure a greener environment as they are an effective tool in the struggle to reduce the effects of global warming. Studies have shown switching to electric bikes can reduce our carbon footprint by up to 50%*

Major city hubs have a problem with air pollution. In addition to the environmental effect of the pollution this smog can lead to respiratory and other health issues. Increased electric bikes use in built up areas can greatly reduce smog.

Noise pollution is more than a nuisance. Studies have shown that there are direct links between noise and health** Electric bikes are near silent. This benefits the rider and the community in general.

call2recycle[®]
Leading the charge for recycling.™

As part of the national 'Call2Recycle' program iGO are committed to ensuring responsible reclamation and disposal of eBike batteries to minimize waste, maximise repurposing of assets and reduce the environmental impact of the increasing battery demand in our society.

SUPPORT

iGO is the original Canadian company dedicated to perfecting electric bike technology since 2006.

All iGO customers have access to a wealth of knowledge and information, assembly videos, general maintenance guides and everything necessary to be self-sustaining in the up-keep of your iGO electric bike. Our highly trained bilingual support staff are located in our Montreal head office where they have the resources to look further into any queries, consult our technical experts, and check inventory for parts and supplies.

iGO take the quality of our products seriously and back them with a guarantee by design and/or material defects for 12 months.
